Kinesis vehicle tracking and fleet telematics

To book a demo visit www.fissara.com or cal the fisara sales team on 0161 546 0336.

Driver App

Allow your drivers the control and support to find the sites, routes and manage WTN (waste transfer notes) all from a mobile device.

Save time by cutting out daily trips to the office by completing digital vehicle checks at the beginning / end of the working day increasing productivity. No hassle of paperwork and knowledge that your vehicles are road worthy. Ability to produce electronic waste transfer notes reduces errors and lost paperwork making the business more efficient.

Vehicle Check

Ensure safety for your drivers on the road by using our mobile App to perform vehicle inspections prior to starting their duties.

Let your drivers be drivers, they can constantly move and make you more money without the endless trips to the office. Have all compliance reporting in one place including vehicle maintenance. You can view all your vehicles, on and off the road and assign and swap drivers easily, so you have more time to focus on selling.

Job Allocation

Quick and simple job to vehicle allocation. Check the daily contributions by each vehicle to ensure each driver and vehicle on the road is profitable and accountable.

Make life simple with our Allocation function, this is like skill-based routing for vehicles that auto-allocates jobs to the appropriate driver based on their job type, vehicle type and location. This saves you time. You can trust in the system to manage your daily job allocation and provide a running total of the profit

each vehicle makes.

Quick Quote

Create quick quotes for new customers and quickly find prices for materials.

Create, send and track quotes in seconds, minimising the time spent on re-quoting and unnecessary admin. Digitises your sales force and improve customers' perception of your business.

Digital Waste Transfer Note (WTN)

Waste Transfer Notes are digitised, collected and completed automatically and kept on the system for future audit and compliance needs.

Move away from endless paper documents by capturing waste transfer notes, disposal notes and customer signatures digitally using the fissara app. Select which documents are automatically sent to your customers with every invoice.

Web Console

Streamline the entire process of waste and bulk transport management through an easy-to-use cloud-based software.

Digitally capture and store customer, vehicle and job information. Fissara MOVE files signatures, waste transfer notes, fuel purchases and photos and more from each job whilst on the move allowing simple searching to find information about any work you have done before.

Customer Management

Quickly find and update customer details. Define whether they're a

credit or cash customer. Define specific customer information such as frequency for invoice delivery and payment details.

Fissara MOVE makes doing business easier by keeping all your customer information in one place from quotation through to job completion this includes accurate quick quotations, progress notifications and better workflow. Manage your customer expectations by having instant access to information providing a better customer service than your competition.

User Management

Change and update user details and credentials including changing passwords with a simple reset function.

Provides all the information about your drivers in one place, giving you more structure and visibility of your workforce. This enables you to quickly replace drivers due to sickness/holiday at the touch of a button with little or no admin time lost. Create secure access to information to your employees depending on their job, making managing your business so much easier

Online Admin

Proactively manage jobs and vehicle loads, driver absence and holiday management. Utilise reporting with detailed drill down, vehicle contribution/profitability reporting and quote follow up.

Our admin function makes it easier to delegate and track all of the operational parts of your business in one system. fissara MOVE allows you to manage your costs, amend prices quickly to always stay ahead of your competition. Add to this our extensive

and highly accurate quotation function will give you the competitive edge to win more business.

Full Quotation

An easy-to-use quote process that generates very quick and accurate quotes for your customers.

Create quick and easy quotes in seconds, quotes can be accepted, called off and allocated to your drivers instantly. This improves your customer service, reducing admin costs and increasing productivity. Once created, it's just a click of a button from quote to job. You can be confident that your costs are covered for every quote you make.

Integrated Payment

Take the payment easily within the fissara platform with your current payment provider.

Improve cash flow and establish higher levels of financial control by reviewing the job and taking payment directly in the system from your customer. No more time spent searching for the card machine, payment details are included in a digital invoice that is triggered automatically the moment the job is complete.

Job Scheduling

Dynamic scheduling that will allow you to assign collections and deliveries minute by minute on a daily, weekly and monthly basis.

Manage your jobs, vehicle fleet and customer orders efficiently, fissara MOVE can handle any type and size of skip and even the most complex schedule that your customers need. Fissara MOVE achieves this by providing the most complete quoting information then allocating jobs to specific vehicles in a specific order exactly as your customer expects

Reporting

Full audit trails of journeys and waste movements are stored in fissara. Share them with the Environment Agency and other bodies with a single click.

Gain better visibility of your business and assets from our digital reporting, keeping electronic copies of documents in one place that can be included with automated invoicing. Access a full audit trail of digital waste transfer/disposal notes, digital invoicing and a whole host of business reports which give you instant access to important information. Save money by removing the time you would have spent looking for paperwork all at the click of a button.

Invoicing

Create quick and highly accurate quotes for new and existing customers incorporating fuel costs, distance, prices for materials and disposal. Automate invoice generation includes all the costs/prices created in the quote. Allows flexibility to tune invoice delivery for every customer.

Manage cash and credit customers easily ensuring you get paid for every job you do, you also have access to a number of different invoice reports and even receive alerts when your regulars are within 10% of their credit limits. Take away the time wasted and the pain of manual invoicing, improving your cash flow whilst giving flexibility to your customers.

Enhanced Invoicing

Complete invoice management from within the system. Tailor each invoice and recipient details on the fly.

Find and manage every invoice that is generated by the system. This make debt collection easier and gives you better visibility of your company's financial position and cashflow.

Sub Contractor

Allows you to manage subcontractors and your own drivers on one system.

Using subcontractors when the demands on your business are high or you need to grow quickly is essential. Fissara MOVE allows you to monitor the costs and activities of your subcontractors and allows them to self-bill for the work they've carried out.

CRM

A comprehensive feature that allows the storage of all customer details, documents, contract and communications in one place.

Speed up your access to all customer information. This will allow you to build up a profile of all your customers and market specific deals or incentives to particular customers.

Time Recording/HR

The system automatically records all the details required to generate driver timesheets.

Get rid of manual time tracking and paperwork. Have the flexibility to manage Overtime, Double Pay, Holiday, Absence Bonus Work and corrections without the need for another software system.

Advanced Vehicle Management

Reported vehicle defects are collected from the driver App and managed at your workshop. Repairs and returned to services vehicles have a full audit trails.

Ensure the safety for your drivers and vehicles on the road and speed up the repair of defects which reduces the time your trucks are off the road where they are earning money.

Weighbridge

Record the vehicle details and create price when customers tip waste at your site. A waste disposal note, vehicle and payment details are automatically generated.

Get accurate and compliant information when your customers tip and dispose of waste at your sites.

Advanced Reports

Full audit trails of journeys and waste movements are stored in fissara. Produce enhanced management information for analysis by your business or an external body.

Gain better visibility of your business and assets from our digital reporting, quickly generate reports using a number of filters on any data collected in the system.

Tailored Onboarding

Model and configure the fissara platform to the way your business operates. Guided by our technical team we will add your data and get your business ready for a go live date.

Fissara can be tailored to meet the needs of your business from branding to functionality to help streamline your operation in one cloud-based platform. This will help improve efficiency, boost productivity and increase your bottom line profit in the long term and get you ready to do business digitally.

Kinesis Vehicle Tracking

A powerful yet simple to use platform that provides you with the insights you need to control your fleet.

Increase security - Grant access and permissions on Kinesis to help manage the security of your fleet management system and ensure that the correct teams can control the right groups of vehicles.

Improve safety - Create unlimited alerts to define the incidents you want to know about and get them sent directly to management so they can take action quicker and more effectively.

Atom Self Install Unit

Simple covert installation, self-install directly on to the vehicle battery.

Small, light and hard-wearing device giving you instant tracking from the moment of install. Because you can move units yourself, no need for engineer call outs; saving both money and time and allowing you the flexibility to track what you need, when you need to.

Geofencing

Create virtual zones that trigger an alert when vehicles enter or leave a specific area or a point of interest. Get alerted immediately if a vehicle enters or leaves an area defined by you, providing instant actionable information if your most important assets are not where they should be.

Vehicle Location

Locate your vehicles on our easy to use web-based platform also accessible via mobile app.

Stay informed on the location of your vehicles with updates every 30 seconds for a real-time view of your entire fleet. Allowing you to maintain tight control of your assets and optimise the use of your fleet.

Journey History

Review every journey your vehicles have made via an easy-to-use online portal.

An easy to use online interface to help you review every journey your vehicles have made using the preset templates of 30 day period from daily, weekly and dashboard view. Controlling and improving driver behaviour can greatly reduce fuel and maintenance costs. A great

training tool to upskill drivers as well as a profitable bottom line.

Driver & Vehicle Performance

Get a simple overview of driver behaviour in particular adherence to the speed limit, for each vehicle or driver. Create league tables of best to worst drivers and have actionable data to manage and improve driver performance. Monitor vehicle utilisation, odometer readings and, when integrating fuel, monitor vehicle MPG too.

Will help you to fully understand the performance of your vehicles and drivers, how your vehicles are utilised, alerting you when they are not achieving what you expect and ultimately making savings and efficiencies in fuel spend and maintenance costs. Keep your vehicles on the road for longer and with the most efficient use of fuel.

Fuel Card Integration

Reduce the risk of fuel fraud by integrating with vehicle tracking and increase control over fuel costs with detailed analysis.

Improve security and see a decrease in fraud creating unlimited alerts including whether the card has been used in the presence of the vehicle. Define the incidents you want to know about and get them sent directly to management so they can take action quicker and more effectively.

Kinesis Alerts

_____K

Create personalised alerts to assist with efficient running of fleet.

Create unlimited alerts to define the incidents you want to know about and get them sent directly to management so they can take action quicker and more effectively.

Kinesis Reports

A suite of detailed reports giving

you visibility and insight into your fleet and employees. From driver time sheets through out of hours movement to speeding reports. Know exactly what your assets have been doing. Review driver speeding incidents with detailed reports showing where and when speeding events occurred along with the severity of the event.

Kinesis will better help you understand specific diagnostic performance of your vehicles and how they are utilised, alerting you when they are not achieving what you expect. This can be seen via a dashboard or more a detailed analysis report using the specific filters and data. Avoid misuse of company vehicles, unnecessary maintenance work and highlight problem even dangerous drivers before the issue becomes serious.

Kinesis Management App

With 24/7 fleet analysis, managers can review driver and vehicle performance from home, in the office or on the move.

The app allows for the creation of reports or alerts that inform specific behaviours and identify opportunities for greater efficiency and savings.

Hardwired Device

Requiring an engineer installation, the device sits behind the vehicle dash and enables you to gain more detailed reporting.

For additional driver behaviour information, including harsh cornering, harsh breaking and harsh acceleration along with improved security features. Get a detailed view of vehicle location and driver performance accessed through a simple to use web-based platform. Our tools provide analysis to help you take control, increase security, improve safety and cut costs.

Advanced Telematics

K

Fully customisable for greater control. User & team permissions, custom dashboards, alerts and reports, power take off, tacho download, API, temperature monitoring and CANBus integration.

Get a detailed view of vehicle location and driver performance accessed through a simple to use web-based platform. Our tools provide analysis to help you take control, increase security, improve safety and cut costs. Provides incredible depth of reporting and analysis plus ultimate control of your fleet and assets.

Camera

Single or multiple camera options. Access camera footage from anywhere. Professionally installed with HD quality 4G connectivity. Tamper proof and discreet install.

Video footage helps you reduce costly driving behaviours that can lead to accidents, such as lane changing, tailgating, all of which increase risk and increase fuel cost. Have immediately actionable evidence of fault, avoiding lengthy or unnecessary insurance claims.

Ruggedised Tablet

Range of ruggedised tablets with Mobile Device Management.

Full control and administration of mobile devices, such as smartphones, tablet computers and laptops in one place on the fissara platform. You can decide what apps your drivers can use and ensure they are using the most up to date versions.
