

NEW: Versatile storage solution for your construction projects

If sludge, slurry, rain, or wastewater are slowing down your work or if containing transferring, or treating liquids is the job at hand, United Rentals have it covered.

Our new tank supports multiple applications, whether you need temporary containment of non-hazardous liquids, a pump buffer when transferring sewer-water or a treatment solution for contaminated ground or surface water.

As the largest provider of fluid solutions in Europe, United Rentals is uniquely equipped to handle your next liquid containment project.

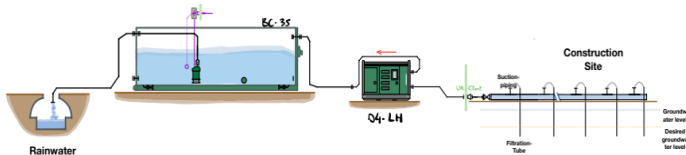

Contain, Transfer & Treat

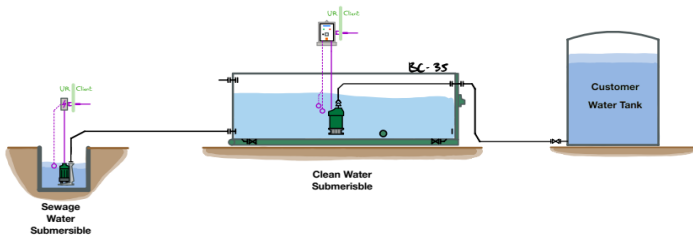

United Rentals set the new standard for temporary liquid storage. Our tanks offer great versatility for unique project needs and have multiple features to enhance safety for our customers and our employees alike. Our tanks are built and maintained according to the highest quality standards.

“Plug & Play” features allow easy transportation, installation and operation.

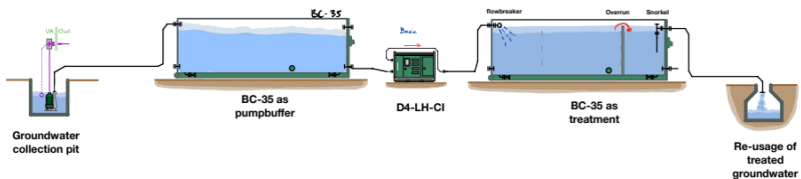

Storage of non-hazardous liquids

Pump buffer for dry-installed and submerged pumps

Separation of fast settling / floating pollutants

Tank Unlined - 35 m³

IDEAL USAGE

Projects that require storage of non-hazardous liquids with small footprint and maximum flexibility

APPLICATIONS

Less demanding containment, transfer and treatment applications:

- Storage of non-hazardous liquids, like ground- and rainwater
- Pump Projects: pumpbuffer or pumpsump for dry-installed and submerged pumps
- Filtration Projects: separation of fast settling / floating pollutants, like water-sand mixtures

BENEFITS

Safety:	Modular lockable stairs (x2) outside, fixed stairs (x2) inside, flange-holders
Versatility:	Options to build in flowbreaker, underrun / overrun weir, snorkel / dippipe for treatment applications Ability to store liquids up to S.G. 1.8
Plug and Play:	Quick and efficient delivery and pick-up Multiple connections for easy filling and emptying

WEIGHT AND MEASURES

Capacity:	35,400 litres or 63,720 kg
Dimensions:	2,200 mm x 2,300 mm x 7,000 mm (H x W x L)
Weight:	3,600 kg empty (approx.)
Max temperature:	70 °C - 100 °C (depending on gasket)

FEATURES

Connections:	6" ANSI 150# front (1x) and rear (1x) 4" ANSI 150# front (1x) and rear (1x) and side (1x)
Access:	Modular lockable stairs (x2) outside, fixed stairs (x2) inside
Inspection & cleaning:	Stairs with safety-beams for open top access 2 drains located in floor for drainage of cleaning water
Quality & safety:	Quality control inspections level 1, 2 & 3 on a scheduled basis Hydrostatic water test after construction and major repairs

About United Rentals

United Rentals is the largest equipment rental company in the world. The company has an integrated network of 1,487 rental locations in North America, 14 in Europe, 23 in Australia and 19 in New Zealand.

United Rentals Europe, formerly known as BakerCorp, is the industry leader in Fluid Solutions and is now expanding its range of Power Solutions. We provide cost effective rental products for the transfer, containment and treatment of liquids and power generation. United Rentals products are designed with safety and quality as top priorities, have “plug and play” features and offer great versatility for a wide range of applications. This translates into unique benefits throughout the tank, pump, filtration and generator product lines.

Power Solutions

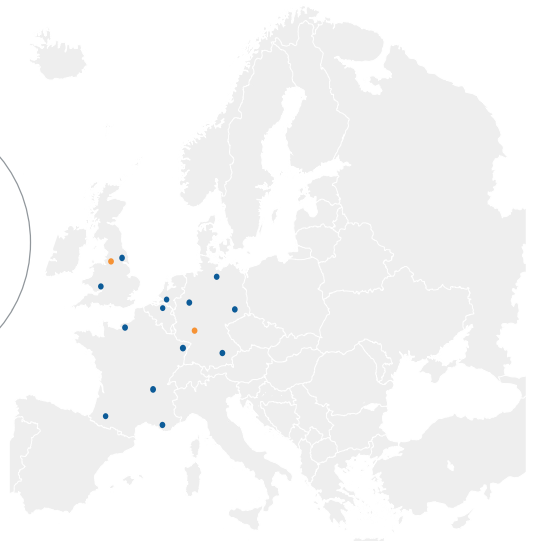

Power Generation
Battery Packs
Fuel Tanks
Power Distribution

Fluid Solutions

Centrifugal Pumps
Submersible Pumps
Pipe, Hose & Fittings
Temporary Storage Tanks
Liquid & Vapour Filtration
Advanced Water Treatment Solutions

More locations, more solutions.
