

Truly sustainable water management solutions

The water capacity of crates plus the flexibility of gravel

Greener, faster, cheaper, safer.

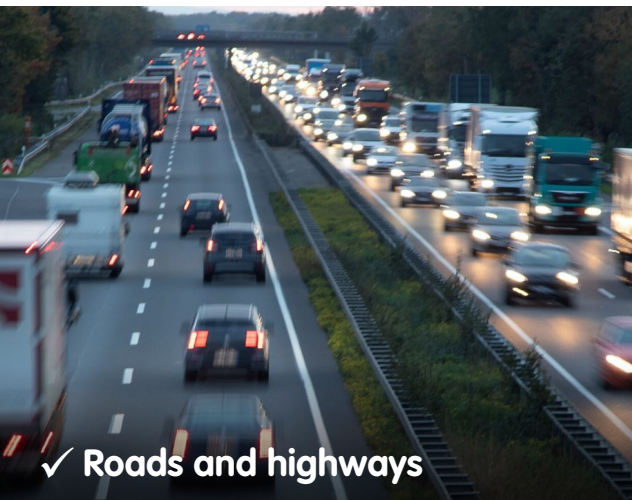

Why use Hydrorock?

Greener

- ✓ **Natural materials**
Made from 100% natural stone wool
- ✓ **Zero plastic**
no plastic in manufacture or in the ground
- ✓ **Maintenance free**
No remediation, repair or replacement needed
- ✓ **Surface water kept onsite**
Disconnection of rainwater from sewer system

Faster

- ✓ **The perfect solution for retrofit applications**
Easy to cut and shape to work around in-ground obstacles
- ✓ **Snap-together modular system**
Quick and simple to install
- ✓ **Helps prevent project over-run**
Predictable and reliable installation
- ✓ **Installation in all weathers**
Hydrorock not affected by extremes of temperature

Cheaper

- ✓ **Smaller system size**
High porosity and efficient infiltration
- ✓ **Projects stay on time and on budget**
immediate work-arounds for on site problems
- ✓ **Costs less than other fully installed systems**
Reduces excavation and minimises backfill
- ✓ **Reduced personnel**
Even largest blocks can be carried/installed by one person

Safer

- ✓ **Smaller excavations**
Reduced project risk exposure
- ✓ **Minimises and simplifies groundworks**
Reducing incident potential
- ✓ **Reduces on-site and off-site traffic**
Fewer vehicle movements
- ✓ **Removes workers from high risk areas**
No need for deep trenching or shoring up
