- Canadian Embassy

ATTENDEES' OBJECTIVES

*based on post-webinar survey results

HIGHLIGHTS FROM OUR EXPERTS

23256

“

COVID 19 has exposed exactly why cloud models are needed; speed and scale. The unique challenges cloud services have caused organizations to defer adopting them, but it's uncertain that we still have the luxury of deferring the hard decisions

Sultan Omran Al-Owais

CIO & CISO - Government Entity

We believe privacy is a fundamental human right for everyone, from individuals to enterprise-level organizations and it starts with trust. Trust isn't something you count on, it's something you have to earn

Aydin Aslaner

Head of Microsoft Cyber Security
Public Sector team MENA

Public Sector organizations must respond and adapt to current disruptors, with agile cloud services able to securely host sensitive public data whilst also helping to deliver remote working needs

Moataz Mohammed

Head of Cloud Advisory at Injazat

”

34367

WHAT THEY SAY ABOUT OUR WEBINAR

23256

“

A most engaging audience coupled with an expert panel meant I didn't have to focus on a script, rather just an engaging session where the cutting edge of cloud was talked about!

Andrew Schumer

Security Systems Consultant at Montdor ME & Senior Advisor for Dubai Electronic Security Centre DESC

I was very impressed with ISNR's new webinar format and extremely informative discussions around Adopting Cloud solutions in public sectors

Hadi Hosn

Chief Executive Officer at Axon Technologies

I thought it struck a good balance between allowing industry to do their pitches and make their points, whilst looking at some of the wider issues faced by government

Simon Hosking

Cyber Security Industry Representative to the Gulf, UK Government DIT (Department of Int Trade UK) - British Embassy Dubai
