Encrypting email

75%

IT STARTS WITH AN EMAIL

Helping you to deliver paperwork, without the paper.

Are you taking steps towards a low-carbon economy? Mailock® is the secure email solution that digitises your comms, reducing paper output and providing a secure network for sending and receiving personal data.

2-FACTOR AUTHENTICATION

Two challenge flows – limit access to the right people.

SMS
Send a one-time code to your recipient's mobile phone or tablet.

Q&A
Ask your recipient a question with an answer only they could know.

IDENTITY SECURE

Digital Recorded Delivery

Discover your end-to-end encrypted, fully auditable customer email thread. Mailock sends confidential messages and attachments easily and securely. We call it Digital Recorded Delivery®.

It's business as usual, encrypted. Keep sensitive data secure.

Compose
Read and write using your usual email client. Add into Outlook, use on the web, or deploy to your server.

Challenge
Make sure only the right people can open your emails - set 2-factor challenges to authenticate recipients.

Encrypt
Send emails and attachments with end-to-end AES-256 encryption. Not even we could read them if we tried.

Trace
Trace every message. Know when your emails get read and follow up with recipients at the right time.

Revoke
Recall an email any time after you've sent it, even if it's been read - your recipient will lose retrieval access.

Engage
Empower your customers with a secure email thread directly to your business. Recipients reply for free.

Life and Pensions provider Aegon deployed Mailock in late 2019, enabling them to send sensitive documents securely and achieve an estimated 270 tonnes of CO_2 savings.

"This dramatic reduction in the need to print and post important paperwork is one of the key ways that financial services companies can make significant CO_2 emission savings by examining their day-to-day operations."
Ronnie Taylor, Chief Distribution Officer, Aegon

WHY USE MAILOCK? MAILOCK HELPS YOU...

Know your customer
Digitise friction-inducing KYC, anti-money laundering, and ID verification processes.

Strengthen your brand
Add company logos to secure emails. Show your business as a leader in data protection.

Cut postage budgets
The financial services alone could save up to £1.3bn by reducing its paper output.

Reduce data risk
Emails sent to the wrong person are the #1 cause of data exposure. Prevent misfires.

TAKE A LOOK AT WHAT MAILOCK HAS TO OFFER

- Unlimited secure emails to all subscribed users, with recipients having the ability to read, attach and reply for free.
- Offers your chosen account administrator access to the admin portal, where they can set up and manage subscriptions, company branding and shared email addresses.
- Provides read notifications to both senders and repliers, allowing you to know when your email has been opened and follow up at the right time.
- A choice between SMS and Q&A authentication.
- 365-day message persistence.
- Email revoke that allows you to recall any email sent securely.
- Utilise the Mailock Secure Community and 'Read without email verification' option to allow a lower level of security checks for familiar clients.
- Outlook Add-in (OAI), which allows you to:
  - Compose and reply to emails directly within Microsoft Outlook.
  - Utilise trigger words within the subject line or body of your message to receive a prompt to send securely.
  - Auto-decrypt secure emails by double-clicking.

DEPLOY INTEGRATIONS
For web: Compose, read, and reply from within our secure Mailock portal.
For Outlook: Full Mailock functionality available for Outlook add-in for Windows.
For servers: Deploy Mailock as a secure encryption gateway on your mail server.

WHY MAILOCK? SECURE EMAIL HELPS BUSINESSES...

Meet ESG Goals
Companies with a strong environmental, social, and governance proposition achieve higher equity returns and reductions in bottom-line risk.

Save logistics costs
The financial services industry alone could save up to £1.3bn by reducing its paper output, as well as providing "huge environmental benefits."

Reduce data risk
Emails sent to the wrong person are the #1 cause of data exposure. Don't let colleagues or clients lose sleep over inadvertent data loss.
