SUSTAINED •

Go beyond carbon.

- Understand your product level environmental impact.
- Model and action changes to reduce impact.
- Market and communicate your impact with confidence.
- Get ahead of regulatory requirements related to environmental impact.

Self-service product environmental impact assessment. At scale.

It's all about the transparency of the full environmental impact of your products.

Your customers want it, your investors demand it and regulators will require it.

Backed by science using industry leading LCA frameworks, analysing 16 impact categories of environmental impact including climate change and land use.

Final Environmental Impact per Impact Category	Tetal Environmental Impact per URI Cycle Stage		
1000 F20100	End of life Distribution	Use Exe Raw Materials	Production Major contributors
	Physical Value	Normalised impact	Contribution
Addification	7.38e-1 mittimes	8.83e-4 promptar	24.2%
Photochemical econe formation, human health	5.26e-1 x	7.66e-6 personation	21.0%
Climate Change	2.41e+1 hp:002+q	6.90e-4 personaur	18:9%

SUSTAINED O

Gain Product Level Impact Information

A comprehensive environmental impact report based on the entire product lifecycle including raw materials, production steps, distribution and more for your product SKUs. Sustained Impact provides insights into the worst impacts for each product SKU and shows which life cycles contribute the most.

Model and Action Impact Changes

Simulate how any change across any of your products entire life cycle can impact (for the better or the worst) its environmental footprint, in real time. Use the resulting report to identify and action changes to your products which will most reduce your products impact.

Understand Manufacturing Impact

Estimate what the total impact of your product range manufacturing output would be, across 16 impact categories, for a month, a quarter or a year.

Market and Communicate Transparently

Tell your customers and other stakeholders about the environmental impact of your products in ways they can understand using the human readable contextual information in the impact reports, thus helping them inform their choices and purchases.

Trust The Data

Sustained Impact incorporates the industry leading Product Environmental Footprint (PEF) Life Cycle Assessment (LCA) framework along with best in class LCA secondary datasets to ensure the most trustworthy assessments possible.
