# INTRODUCTION

Swimex have been working with our partner Pool Cover® in Belgium, designing, producing and installing telescopic pool enclosures for over 20 years. We have a wealth of skill and expertise to perfect the ideal solution for your pool site.

Our EasyGlide Telescopic Enclosures provide the flexibility of enclosing your swimming pool during the winter or opening-up the pool area during the warmer weather, therefore giving you all year-round usage of your swimming facilities.

Our enclosures are manufactured to any length, width, height or colour and are tailor-made for each customer.

An EasyGlide pool enclosure can raise the water temperature by up to 12°C, thanks to the greenhouse effect.

We offer a free no obligation design visit and quotation service. All we ask is that you have a genuine interest in an enclosure and feel comfortable spending the money.

Following the site visit we can produce accurate scale drawings, explaining all aspects of our proposals together with an exact fixed price quotation based on your requirements.

**High enclosures typically cost between £20,000 – £45,000 plus VAT, low enclosures typically cost between £12,000 – £24,000 plus VAT, subject to site visit and final specification.**

*EasyGlide*

*“The heating costs have been reduced and the swimming pool now rarely needs cleaning.”*

Mr B, Lincs

## Swimex EasyGlide High Telescopic enclosures

High telescopic pool enclosures are designed to provide a spacious walking and leisure area immediately around the pool, allowing tables and chairs to be placed under the cover providing a nice relaxation area.

High buildings can be totally freestanding with options to move it all the way to one end or to move it both ways from the middle back to each end.

*“I have recommended Swimex to a friend because the enclosure is good quality and makes our pool time much more enjoyable.”*

Mr & Mrs V, W. Sussex

## Swimex EasyGlide Low Telescopic enclosures

Low telescopic pool enclosures are built to cover the water, keeping debris out and keeping the water clean. They also help to raise the water temperature and create a much nicer swimming environment, allowing you to swim inside the enclosure in the colder months.

## Swimex EasyGlide Lean To Telescopic enclosures

Lean To pool enclosures are attached onto a high wall by fixing tracks to the wall and allowing the enclosure structure to move along the wall and along the ground. Lean To enclosures are the ideal solution for swimming pools that are positioned close to a property. Joining the pool to the adjacent building effectively creates a wonderful new room within the property.

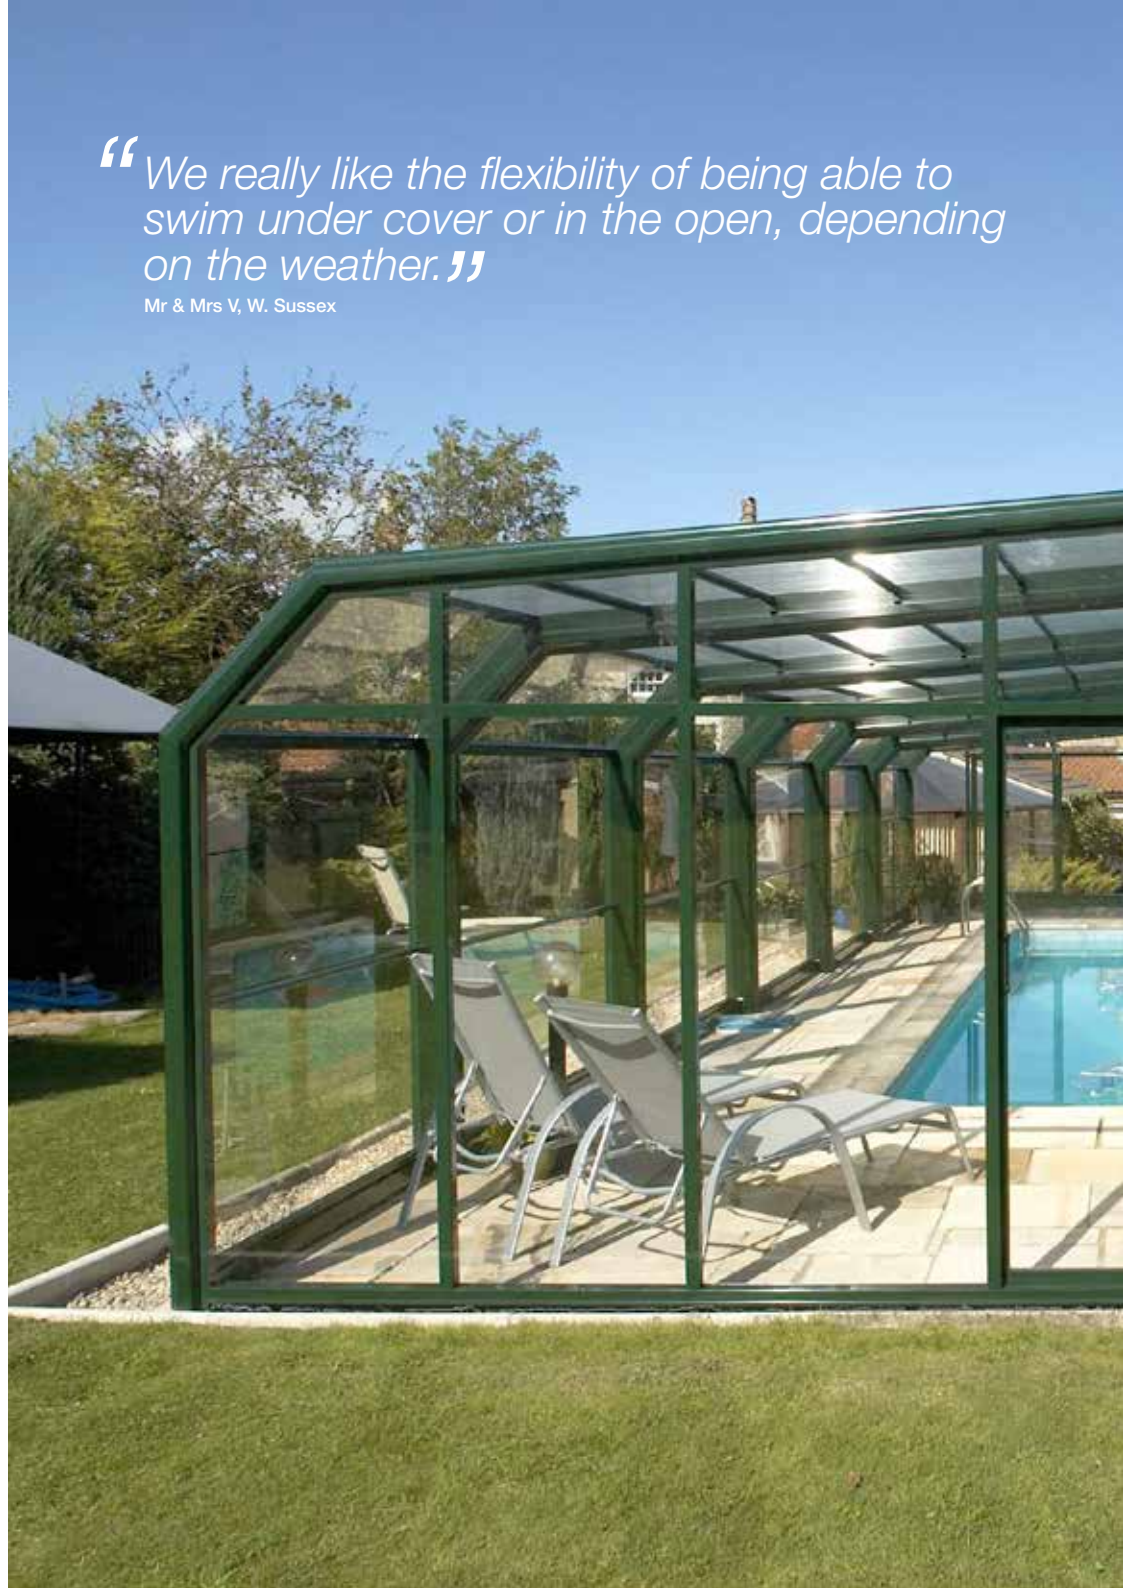

## Swimex EasyGlide 5 Angled enclosures

5 angled pool enclosures have a combination of vertical and 45 degree sides to give a stylish angled design. They can be designed with sides of varying heights, designed with any length, width, height or colour to suit your requirements.

*“We really like the flexibility of being able to swim under cover or in the open, depending on the weather.”*

Mr & Mrs V. W. Sussex

## Swimex EasyGlide 3 Angled enclosures

3 angled pool enclosures have vertical sides which gives more head room around the pool area. They can be designed with any length, width, height or colour to suit your requirements.

## Swimex EasyGlide Telescopic enclosure door options

EasyGlide Telescopic Enclosures have many options for doors. Sliding doors normally slide within the inside part of the building keeping the weather away from the moving mechanisms. These are available on the ends or sides of our enclosures.

Folding concertina doors are also an option and provide bigger openings for ventilation and access. These doors can also have a hinged lockable door integrated into one of the folding concertina doors.

Our low telescopic enclosures can have a tiltable front door with sliding door. The tiltable front opens out like a garage door, upwards, and is positioned parallel to the roof. It has two handles which allow it to be handled with ease. We can also offer a combination side and roof sliding door, for easy access.

# Swimex EasyGlide Enclosures

EasyGlide Enclosures are supplied in the UK by Swimex UK Pool Enclosures and are manufactured by our partners Pool Cover® in Belgium.

Swimex have provided over 1,000 swimming pool enclosures throughout the UK and have built a long-standing reputation for quality installation services.

## Swimex provide:

- Affordable quality products, any length, width, height or colour to suit your needs
- Free no-obligation advice and site visits, from our technical specialists, who can offer a full technical solution to any pool site
- Project management
- A dedicated installation team
- 15-year product guarantee.

Swimex are also specialists in providing fixed and telescopic enclosures for Commercial establishments, such as hotels, leisure centres, health clubs, holiday parks, water parks, local authorities and schools. In addition, we can provide rubber safety flooring, space heaters and solar powered motors, to add to the enjoyment of your swimming pool.
