THIS SPA IS NOT FOR EVERYBODY!

The OKAndinavia Diamond: Elevating the Spa Experience to New Heights. As a leading manufacturer of spa products in Europe, HANSCRAFT is proud to introduce the OKAndinavia Diamond, a hot tub MASTERPIECE that sets a new standard in luxury & design. With its roots in the timeless designs of Scandinavian Bauhaus and Finnish masters such as Alvar Aalto, Tapio Wirkkala, and Timo Sarpaneva, the OKAndinavia Diamond is a piece of art made by HANSCRAFT & Best in Class designer Ing. Arch. MgA. Ondřej Kamenický.

For our dealers, the OKAndinavia Diamond is the ultimate spa solution for discerning clients who demand nothing but the best. It offers a level of luxury and design that surpasses even the most prestigious spa brands, setting it apart as a true Rolls-Royce of hot tubs. The OKAndinavia Diamond's spacious interior, comfortable seating (not a joke), and powerful jet system provide a truly rejuvenating spa experience. The OKAndinavia Diamond is not just a hot tub, but true work of art.

At HANSCRAFT, we understand the importance of delivering top-quality products that meet the demands of the modern business landscape. That's why the OKAndinavia Diamond is backed by comprehensive warranty, providing our dealers with peace of mind and their clients with years of trouble-free use. MADE IN CZECH REPUBLIC, country known for High quality manufacturing. Just in time delivery possible!

OKAndinavia Diamond is the ultimate in luxury and design for the B2B market. Its stunning combination of classic and contemporary design elements, exceptional functionality, and premium quality make it the perfect choice for those who want to offer their clients a world-class spa experience. If you're a dealer looking to stand out from the competition and offer your clients the very best, the OKAndinavia Diamond is a must-have for your product offer for those, who want ONLY THE BEST & UNIQUE!

OKA DESIGN

My challenge in addressing the morphology of the bath was to transform surfaces and lines into an ergonomic and comfortable entity. As an architect, I consider a whirlpool to be a blend of furniture with interior space. I perceive it as facets of an inside-out iceberg, taken from a massive block. The individual facets are positioned so that they compose, through light and reflection, the image of refracted surfaces. At the same time, they direct massage jets to specific areas of the user's body. The intentional contrast between the sharp edges versus the bath's embracing fullness is ergonomically realized as one's body floats in the water with no direct contact with the bathtub's artistically designed edge.

From an ergonomic standpoint, I build on an experience gained developing OKA Design top model hot tubs. The layout includes two loungers and three seats, including a comfortable 'captain's seat'. A complete new idea is this being a hybrid position – functioning as a seat facing the others, or back part of a classic lounger. Its shape follows our previous lounger concepts, and represents a contrast between comfort and sharp-edged visual impressions.
