TORCPOTS

Torc make everything by hand from their studio in the British Isles.

Working alongside a talented team of artisans this family run business really specializes in textures, scale and especially bespoke design. The design side of the business proving to be very popular with landscape architects and garden designers alike realizing just how much expertise this company has to offer with a wealth of experience in design and problem solving to bring to the table.

Torc welcome the opportunity to be involved at the design stage and are happy to contribute ideas when requested. Frequently being commissioned to provide planter designs, outdoor furniture and paving as a one-off template for both commercial and residential spaces.

Launching their new contemporary shaped water bowl this month was a good example of how far they can go – the diameter of this little beauty can be offered up to 3m wide. Their green credentials are pretty impressive too.

Safe, Durable, Energy Efficient ARMATHERM Thermal Bridging Solutions

Armatherm can help minimise energy loss and significantly improve envelope performance with our family of thermal break products. Our engineers have taken the guesswork out of specifying thermal breaks in the most critical conditions.

Armatherm™ is one of the leading suppliers of structural thermal break materials for the construction industry. Our goal is to provide architects, structural engineers and building design professionals with effective solutions to prevent thermal bridging.

Armatherm™ structural thermal break materials minimise heat loss at balcony, canopy, parapet, masonry shelf angle and cladding connections.

SALICE

Salice's M35 Slider Top is a coplanar sliding system that confers a minimalist uncluttered effect to rooms. Be it in the kitchen, living room, bedroom or board room. Doors open and close smoothly and silently, to conceal or reveal bookcases, wardrobes, media centres or breakfast bars.

In its Reverso motorised version, the two doors open outwards in synchrony and in parallel with the cabinet at the touch of a button. Integrated linear magnetic dampers ensure the smoothly controlled movement of the doors along precision-machined grooves. The system can operate individual doors up to 1500mm in width and 35kg weight.
