MOTION POOL

The only original since 1991 —

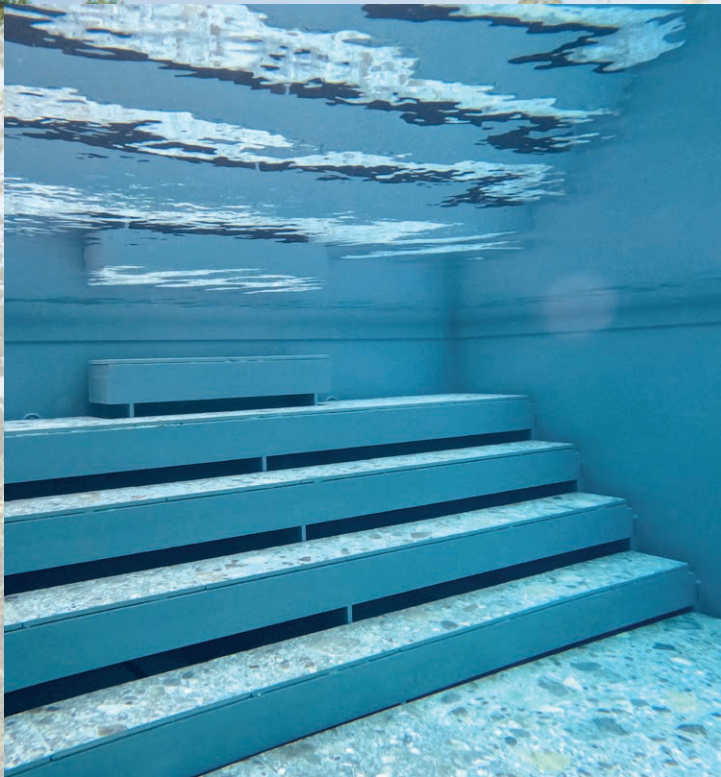

”Swim in Style, Dive in Motion“

The time has come to venture **beyond the boundaries of ordinary pools** and open the door to a new era of swimming pool industry.

Our vision is clear - **a multifunctional pool** that is flexible enough to suit every member of the family yet is also **an exceptional, state-of-the-art product** with a timeless design.

A revolutionary concept where the pool takes on a whole new dimension.

FLEXIBLE DEPTH

The wide range of options enabling you to set any depth from 0 to 150 cm allows the pool to be used as a safe paddling pool for children or as a full swimming pool for adults.

SAFETY FOR ALL

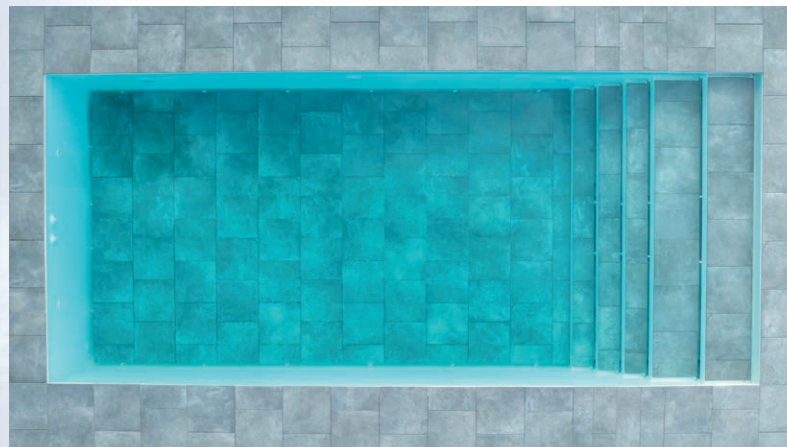

The movable bottom makes the pool as safe as possible for all members of the family. Raising the bottom to ground level prevents anyone from entering the pool when it is unattended or not in use.

MULTIFUNCTIONAL SPACE

With just one click/turn of the key, you can transform your pool into a full-fledged terrace, thus getting the most out of your garden space. The bottom also serves as effective insulation.

”Powered
by Motion“

ACCESSIBILITY FOR ALL

The movable bottom technology makes this pool accessible to everyone. The pool can be used by children as a safe paddling pool, but also by adults as a full-fledged swimming pool. It is also suitable for physiotherapy or for people with limited physical mobility. This flexibility allows the pool to be used for a wider range of activities and fun.

SAVES ON ENERGY AND REQUIRES LESS MAINTENANCE

The movable bottom effectively prevents overheating, heat loss and minimises water evaporation. It prevents dirt from getting into the pool, significantly reducing the need for maintenance. The pool does not need to be prepared for winter, as the movable bottom also serves as an effective roof.

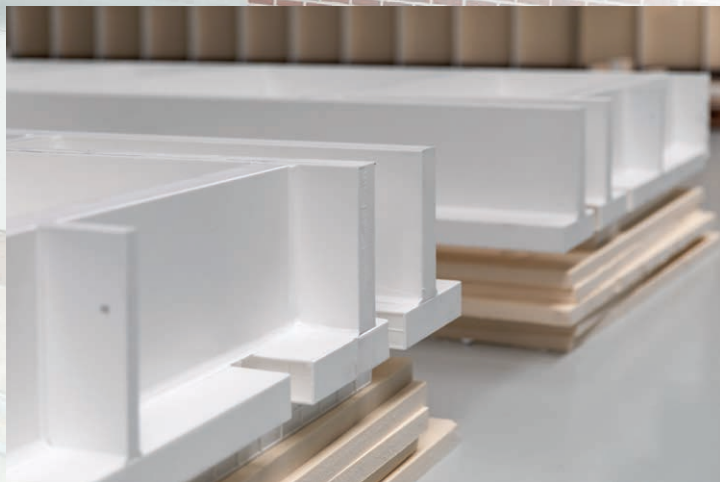

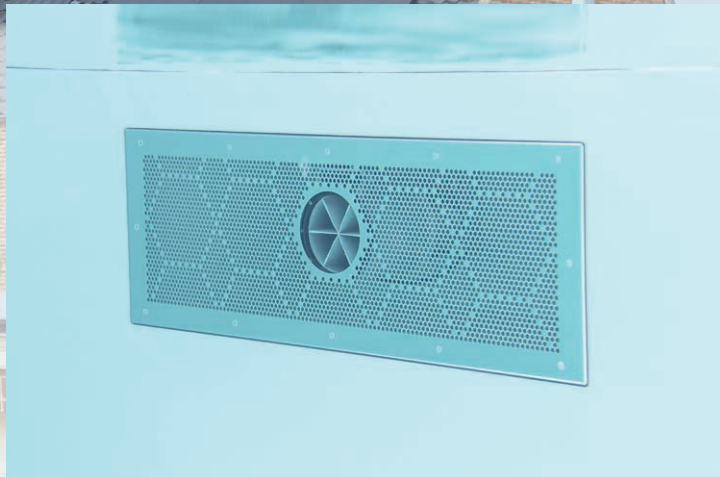

FIRST-CLASS DESIGN

Know-how based on more than 30 years' experience in manufacturing NIVEKO pools combined with an easy-to-use system with no hydraulic or mechanical drives. No oils or lubricants that could come into contact with the pool water are used.

“The quality of NIVEKO pools combined with state-of-the-art technology”

It is not only its stunning design and excellent quality that make the NIVEKO Motion pool so exceptional, but also its practicality. It offers all the advantages of traditional NIVEKO pools, including easy installation, but with an added touch of luxury and innovation.

ALL-IN-ONE SOLUTION

This exceptional pool combines top technology **with the ultimate design and quality of NIVEKO pools**. With convenience and comfort being the priority, the pool is supplied with a movable bottom, with **no need for any additional installation**.

This multifunctional and stylish pool will not only **add a beautiful feature to your garden**, it will also give you a flexible space to relax in, adapted to suit your lifestyle.

Welcome to the future of swimming pools, meet the **NIVEKO Motion Pool**.
