Velarium LUXE & PRO

Introducing Velarium Pro & Luxe, an innovative retractable roof pergola designed to transform outdoor spaces into a unique and comfortable environment. This solution allows you to choose whether to bask in the sun's rays or prefer a shaded area, thus adapting the pergola to external weather conditions and customising your outdoor experience.

The sliding cover of Velarium Pro & Luxe allows you to easily open and close the roof, providing the freedom to manage the outdoor space effectively at any time of the day.

The Luxe, the evolution of Pro, channelling rainwater inside the vertical posts through the perimeter housing and gutter system, directing it to the ground.

The structure can be complemented with a number of accessories, such as heating and lighting, retractable screens and sliding glass.

Velarium LUXE & PRO

PROTECTION

Velarium roof has a sliding cover allowing you to open and close the upper fabric with a ease, offering the freedom to manage outdoor space effectively at any time of the day.

MINIMAL DESIGN

The essential and linear shapes, combined with a minimal design, are a distinctive feature of Velarium. This modern structure embodies a synergy between innovation and elegance, creating an environment that harmonizes with any outdoor landscape.

LOW MAINTENANCE AND DURABILITY

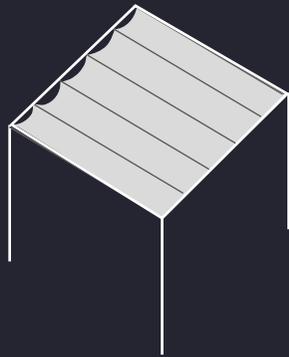

Thanks to its simplicity, the Velarium requires minimal periodic maintenance, limited to cleaning the aluminum profiles and the cover. Aluminum and PVC are the materials we have always preferred for our structures: lightweight, durable, and corrosion-resistant, designed to last while maintaining their characteristics.

STRENGTH AND PRACTICALITY

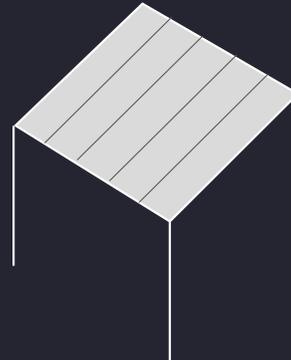

Velarium excels in the mechanics of its components and features a manual sliding cover that, thanks to special trolleys, offers smooth and silent movement, eliminating the need for a motorized system. Additionally, the integrated magnetic locking system of the cover is highly resistant to wear and breakage, ensuring long-term reliability and high-level functionality.

EASE OF INSTALLATION

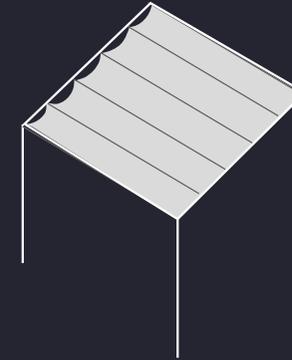

The design attention, combined with the simplicity of components, is a crucial element that ensures incredibly fast installation times. Every element of the Velarium pergola has been designed to minimize the time and effort required for assembly.

SCREENS

Adding a screen to your canopy will give you additional protection from the sun and rain including the extra protection from the wind.

ROLLER SCREENS

is available as a manually option only, with the fabric retracting along the stainless steel rods either side of the screen.

ZIP SCREENS

give you the additional protection from the wind and rain. The fabric is concealed within a cassette giving the material full protection when closed.

OPERATION

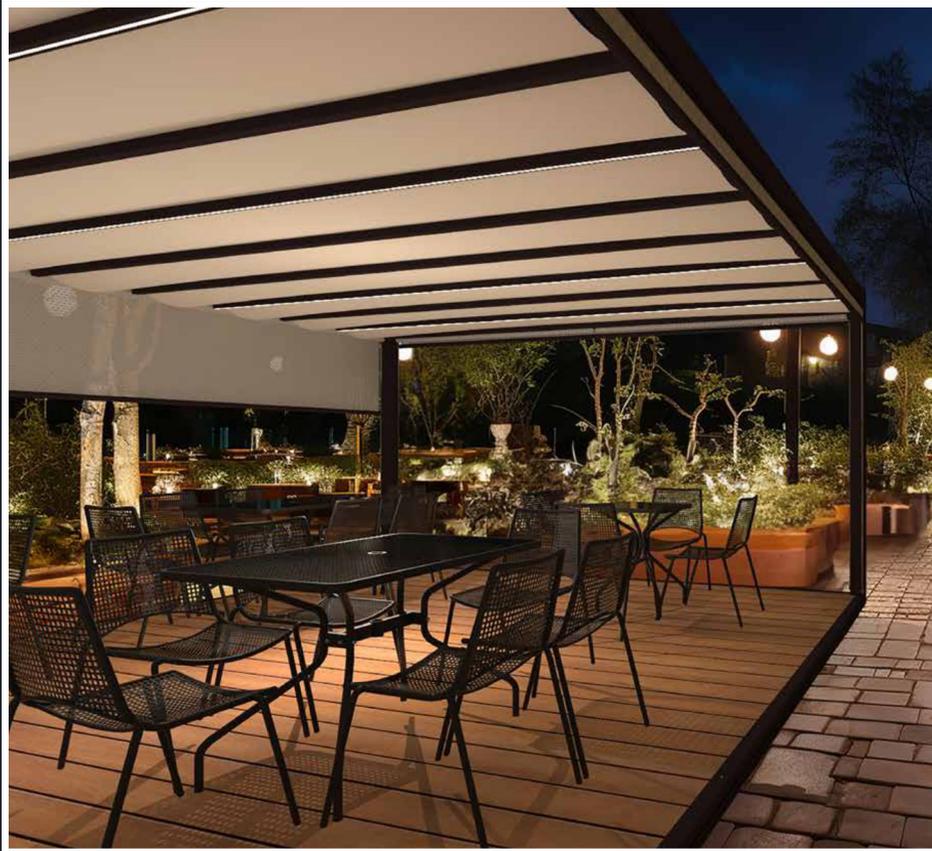

Both option are easy to operate with the removable manual crank handle, enabling you to open and close the screens in any position.

FABRIC

Fabric for Roller Screen is available in Soltis 96 mesh, option of 4 colours. White, Champagne, Grey and Dove Grey, alternative colours are available.

Zip Screens are available in Soltis 96 mesh, 502 solid and crystal PVC .

LIGHTING

Adding LED lights to your canopy is an excellent way to enhance both its functionality and appearance. These energy-efficient lights create a cosy and inviting atmosphere, whether you're hosting an outdoor gathering, dining or simply relaxing.

LEDs are available in various brightness levels, allowing you to customise the lighting to suit your mood or occasion.

With the convenience of remote controls and dimmable options, LED lights can transform your canopy into a stylish and practical outdoor space.
