# EZ2

## F-EZPL2

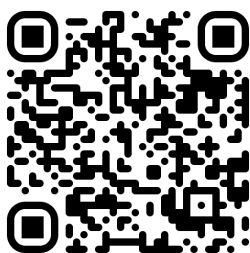

### FEATURES

- Mesh seat, chains and standard hanger bar included
- 360 degree manual rotation
- 6" (15cm) storage socket included
- Lifting capacity 28.5 stones (181kg)
- 5 year structural warranty

**Most popular choice!**

The EZ2 and Power EZ2 Lifts offer affordable options for pool access. Both lifts are installed into a single poolside socket and can be easily removed and carried by one person to another location. Alternatively, EZWheels allow the EZ2 & PowerEZ2 to be easily moved to and from the poolside, and can be used as upright storage. A helper will be required to rotate the lift over the water before lowering the user into the pool.

Scan here for more information  
about the EZ2

### SPECIFICATIONS

- Setback range 12" - 20" (30-50cm)
- Height when lowered 48" (122cm)
- Height when fully extended 73" (185cm)
- Setback can be increased with an extension anchor arm

## Accessory Options

# Pool Equipment

## **Mobility Pool Access Steps**

Designed to provide comfortable and easier access to the swimming pool for those with impaired mobility. Each tread is wide and finished with anti-slip plastic for safety and comfort. The handles are manufactured from 38mm 316 stainless-steel tube to assist the swimmer in to the pool. Each set of steps are manufactured to your exact pool requirements.

## **Poolside Wheelchair**

Poolside wheelchair designed to allow users access throughout wet leisure environments from showers and changing rooms to the poolside. The wheelchair is manufactured from polished 316 stainless-steel for long lasting use and features a 127kg carrying capacity

## **Overflow Grating**

Swimming pool overflow grating, manufactured in the UK from high quality moulded engineering plastic, offering strength and durability whilst not compromising comfort under foot. Our overflow grating is manufactured to order to meet your requirements and is available in standard widths of 250mm, 300mm and 350mm, other widths can be accommodated.

## **Swimming Pool Lane Ropes**

Anti Wave Swimming Lanes are one of the most popular lane ropes for UK swimming pools. All of the lane ropes are manufactured in the UK and can be finished in any colour to suit the pool or club, or they can be finished to comply with FINA regulations. All swimming lanes are manufactured to suit, so whatever pool size or colour you may want, these lane lines are ideal.

## **Water Polo Goals**

The Anti Global Water Polo Goal is designed to be lightweight and easy to store whilst not compromising on quality. This folding, floating water polo goal meets FINA requirements, making it suitable for clubs and swimming pool facilities across the world. The goal is available with either 1.2 meter depth or 1.4 meter depth.

# Pool Equipment

## Swimming Starting Blocks

The blocks are easy to install and are supplied with all components and clear instructions for your poolside installation. The Anti brand's starting blocks having been used at many high profile swimming competitions around the world including FINA world cup swimming events, Olympic, and Commonwealth games.

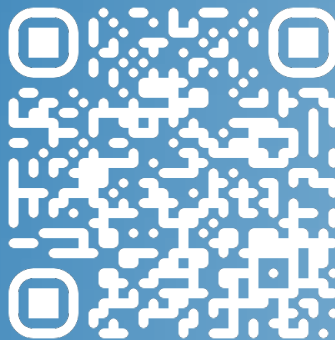

## Changing Table

With variable or fixed height adjustments, and sizes ranging from 1400mm, 1500mm, 1700mm and 1900mm, we offer a variety of changing tables to fit your changing room needs. Certain models of changing tables sold also include Freecote® antimicrobial and antibacterial coating.

## Swimsuit Dryer

Manufactured in the UK, the swimsuit dryer features super quiet operation and effortless operation using the "easy-press" lid. The swimsuit dryer includes a free cleaning and maintenance kit. The Swimsuit Dryer comes in 9 exciting colours, and with a drying time of just 8 seconds, it is eco friendly.

Check out our website for more information about our poolside and competition equipment

# FAQ

## What is our warranty?

All of our Aqua Creek lifts come with an impressive 5-year structural warranty for peace of mind.

### *5-year Pro-Rata Warranty on electronic components*

The electronic components including the LINAK actuators come with a pro rata warranty as follows:

Year 1-2: 100% coverage

Year 3: 60% coverage (customer responsible for 40%)

Year 4: 50% coverage (customer responsible for 50%)

Year 5: 40% coverage (customer responsible for 60%)

Engineer visits are not covered by warranty

## Do we provide installations?

Our experienced engineers can carry out assembly of the lift, poolside drilling and installation of fixings to ensure a safe and professional finish for every project. A demonstration of the lift can be undertaken after installation, and staff training can be provided upon request. We offer nationwide installation, simply contact us for a quotation.

# FAQ

## **Do pool lifts require LOLER Inspections?**

The Lifting Operations and Lifting Equipment Regulations 1998 (also known as LOLER) apply to all types of lifting equipment used by members of the public. Inspections and maintenance ensure the safest possible operation of the equipment and must be completed biannually (every 6 months) to stay compliant. We offer one off visits as well as service agreements with key benefits. The service agreement can be provided upon request. Our engineers operate nationwide and we can often attend a short notice.

## **In Ground or Above Ground?**

This refers to the swimming pool or spa with which the lift will be used. In the UK, most pools are in-ground, while the term "above-ground" typically applies to hot tubs or swim spas but are becoming increasingly popular, particularly for independent swim schools. In practical terms, the key consideration is whether the lift must clear a raised edge before lowering the user into the water. If so, an above-ground lift will be required.
