Welcome to The Complete Solution

Complete Pool Controls Ltd is a leading independent company supplying recreational water treatment chemicals and dosing equipment. Our extensive range of chemicals for swimming pools and hot tubs is available through a UK-wide dealer network.

We offer our partners a complete solution which includes training, technical support, water testing, equipment, integrated monitoring systems as well as water treatment chemicals which meet latest standards. These elements combined ensure you and your customers receive the best products, service and support possible.

Complete Pool Controls - Company Profile

Established in March 2007 Complete Pool Controls Ltd specialise in recreational water treatment chemicals and related dosing equipment. The company brings an attractive and innovative range of products to its nationwide clients, backed by sound experience and technical support. We are proud of our flexibility and total dedication to our customers. Our customers include swimming pool and hot tub users purchasing via professional shops and leading commercial outlets.

A comprehensive range of chemicals, testing apparatus and reagents are stocked alongside dosing equipment and spares, enabling swift nationwide service based from our facilities in Cheltenham, Gloucestershire.

ISO9001/14001 Quality/Environmental Management - Complete Pool Controls Ltd gained ISO9001 in January 2013 following an external audit from the BSI group. The standard verified our processes and constantly looks for improvement in all areas of the business.

Capacity and Storage - At our headquarters in Gloucestershire we operate from premises with over 30,000 square foot of storage capacity. Adequate stocks of raw and finished product are kept on site at all times ensuring delivery time scales are maintained.

Staff - 40 staff are based at our Cheltenham facility. We have 4 field staff that are able to service our long list of customers.

Product Training - Best practice and product use information is freely available for dealers and commercial operators. Training includes BISHTA certification, general product use training certification and links with leading commercial trainers including P.P.O courses.

Consumer and Dealer Website - Bringing the latest product, user information and the ability for dealers to order online (via log-in).

Export - Multi-language labelling for key export customers in Scandinavia/Eire and Benelux territories.

Contract Packing - For leading water treatment suppliers requiring bespoke and own labelled products.

Key Chemical Brands - Blue Horizons for pools, AquaSParkle for hot tubs and Blue Horizons Commercial for commercial pool operators offer both regular and special treatments for swimming pools and hot tubs.

Other Chemical Brands - Aquablanc (non-chlorine systems), Aquasachet, Aromascent, Aqua Gentle, Gold Horizons Spa, Kleen Pool and Revival.

International Partners - Chemoform, Clear Blue Water Tech LLC, Palintest, Lovibond, WDT, Dinotec, Descon and Brandpak.

The Complete Solution

Chemicals

Market leading range of pool and hot tub chemicals
Complete range of high quality treatment products
All-encompassing range of commercial pools and spas

Innovation

New initiative in hot tub sanitisation
User friendly 'all-in-one' water care kits
Expanding our alternatives to normal sanitisers
Extending our problem solvers

Marketing

Marketing support for Blue Horizons, AquaSParkle and Gold Horizons

- Branded material
- Website dealer support & positioning
- BPR compliance

Training

Certified BISHTA training

- Hot tub & swim spa water hygiene management

Internal chemical awareness training
Commercial equipment support

- Dosing installation
- On site equipment set up and operation

Water testing

Lovibond and Palintest approved dealer
Pool and hot tub water management support
Water balance, calcium hardness, cyanuric acid and phosphate level
Bacteriological testing (total coliforms, pseudomonas aeruginosa)
Legionella testing

Compliance

ISO 9001 - quality management system
ISO14001 - environmental management system

BPR - CPC are also working closely with our international partners to make sure our products are compliant with the Biocidal Products Regulation - GB Biocidal Products Regulation (GB BPR)

Dosing equipment

Full dosing and control systems, for commercial and domestic pools & spas
Extensive stock of spares

Technical Support

Blue Horizons, AquaSParkle and Gold Horizons chemical help
General product pool/hot tub advice
24 hour emergency helpline

Safety

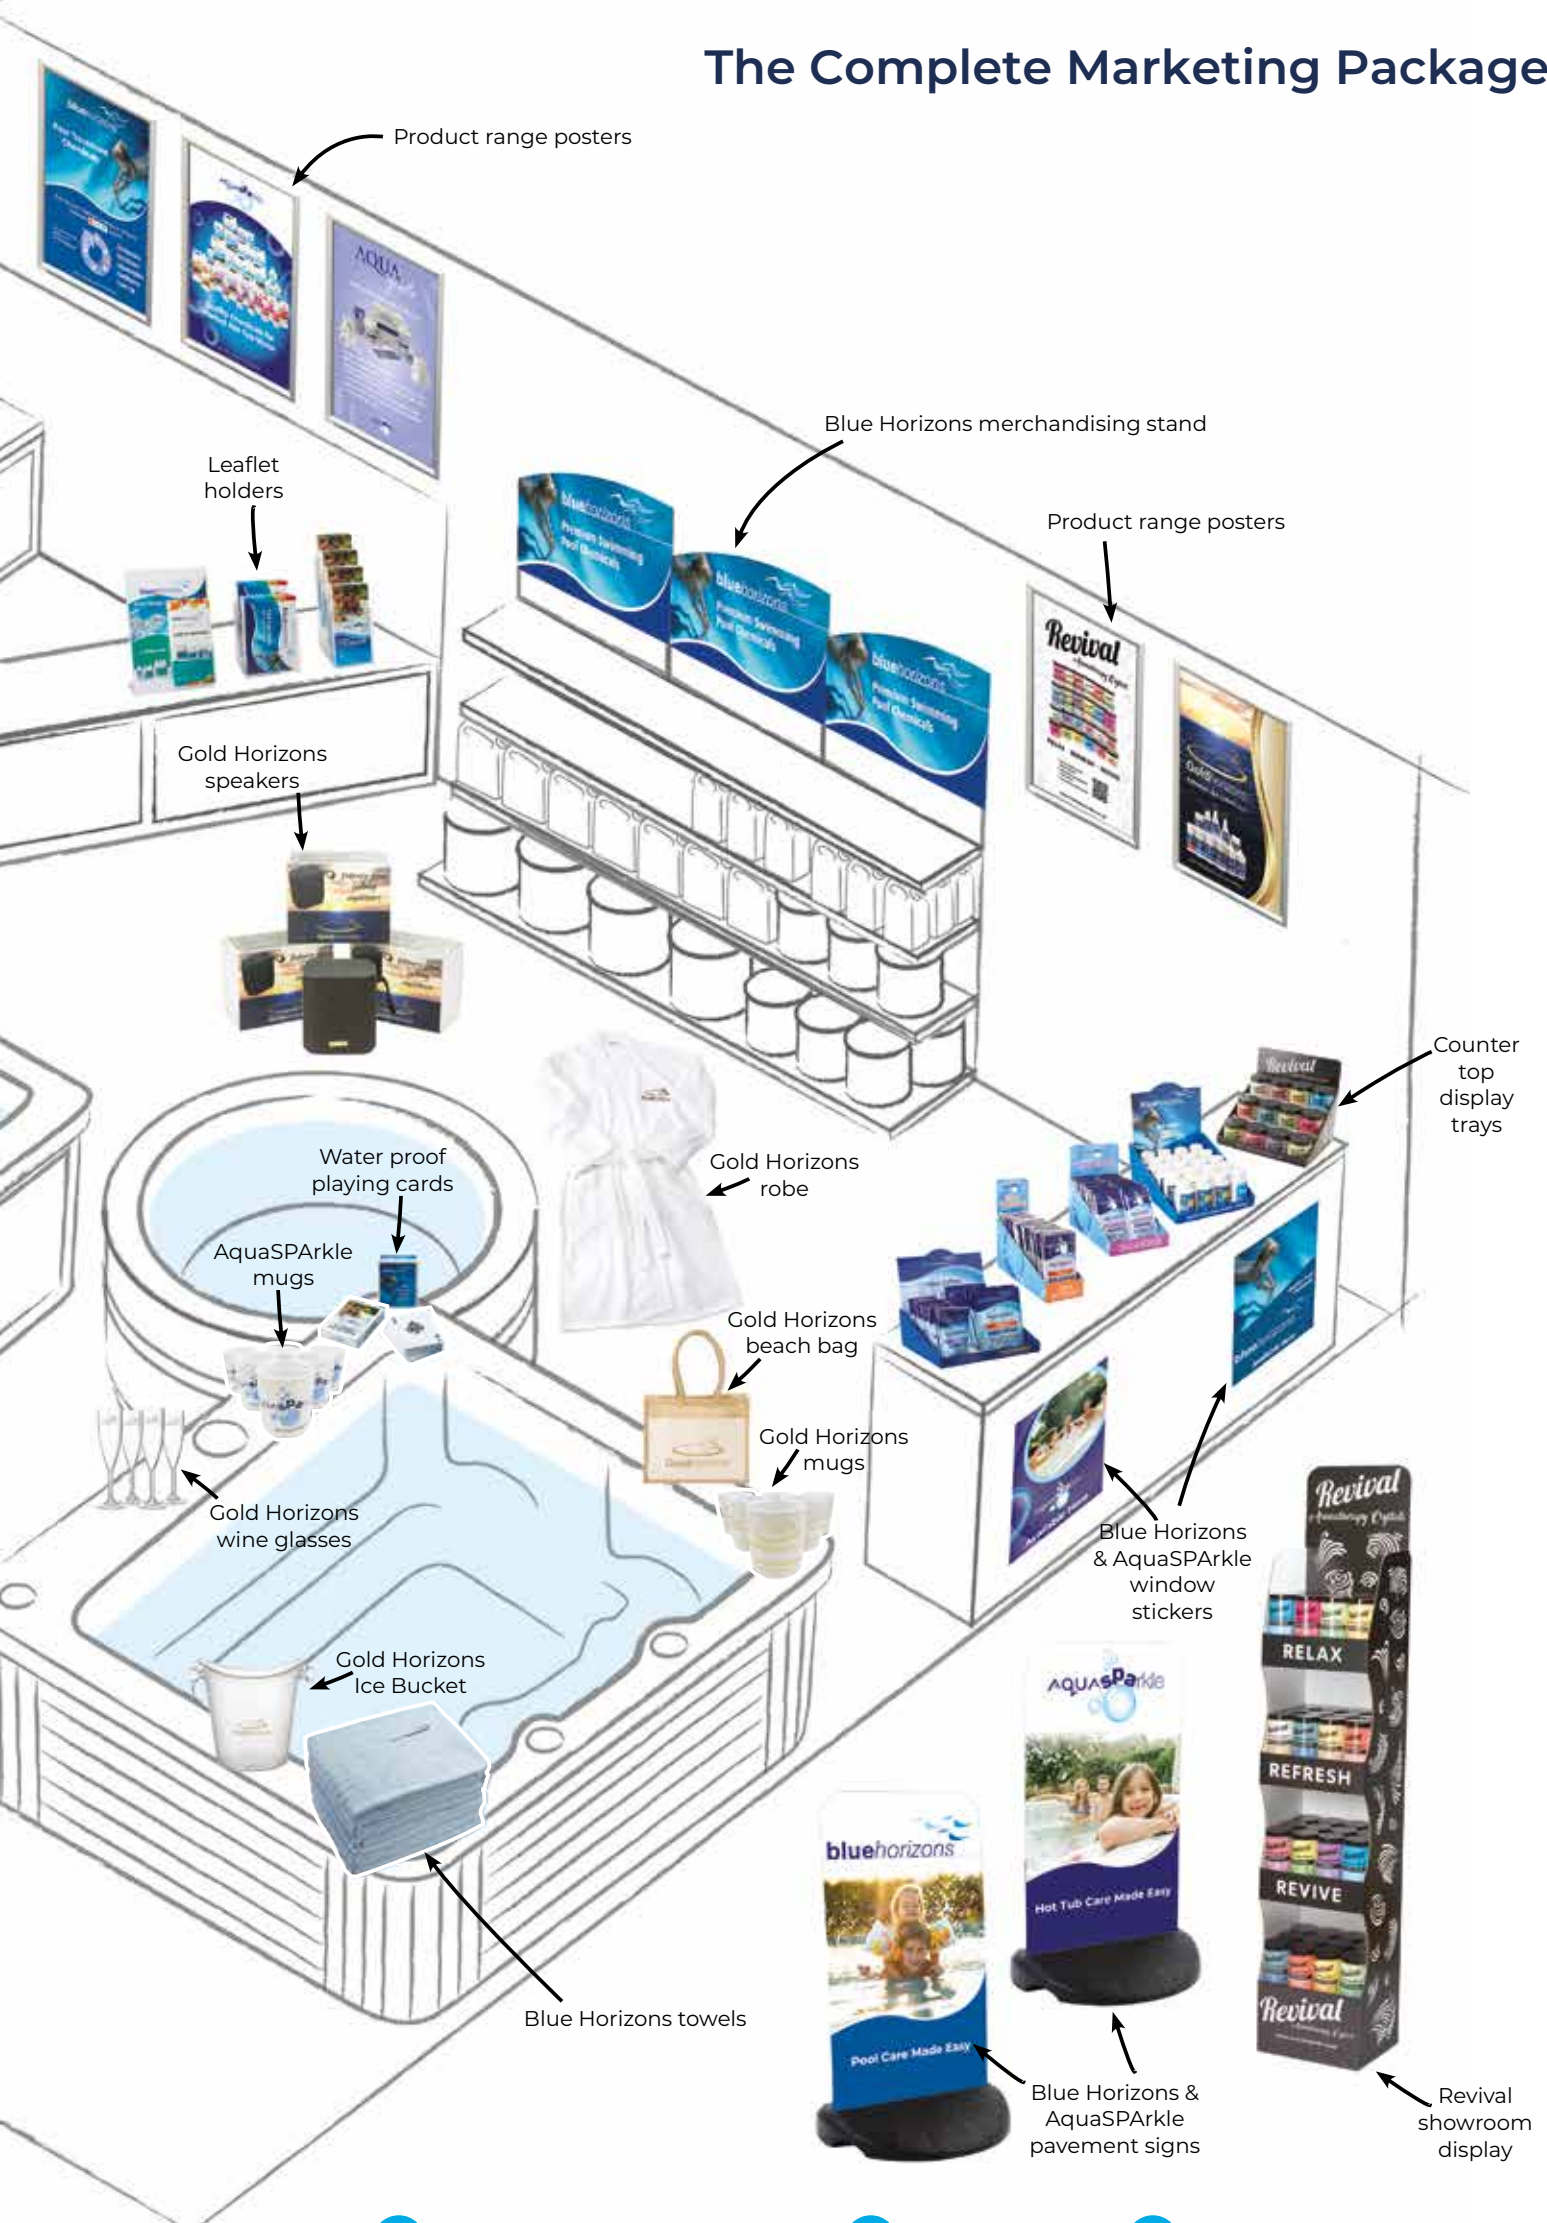

Full range of personal protective equipment and health & safety kits

Your Successful Showroom with Complete Pool Controls

Complete Pool Controls Ltd has an evolving marketing investment programme designed to make Blue Horizons, AquaSPARKle and Gold Horizons the best supported brands in the UK.

The Complete Marketing Package

Marketing Support

Point of Sale

Blue Horizons merchandising stand - POA

3 tier stand (4 shelves each tier). Dimensions: 3150mm (w) x 650mm (d) x 2245mm (h)

Bespoke display options are available.
Please contact us for full details

Outdoor Displays

Blue Horizons hard wearing vinyl banner

Banner dimensions: 1490mm (w) x 745mm (h).
(approx. 5ft x 2.5ft)

Blue Horizons/AquaSParkle pavement signs

Dimensions: 525mm (w) x 870mm (h) x 490mm (d)

Blue Horizons flag

These 8ft feather flags are ideal for outdoor decoration and a major attraction to lead customers into your showroom, as the wind enhances the graphic experience.

SWIMMING POOL CHEMICALS

Blue Horizons is the UK's most comprehensive range of high-quality water treatment products and has continued to go from strength to strength since its launch in 2007. We continue to develop the range, adding innovative and exciting new products wherever possible, making this the go-to range of swimming pool chemicals.

The Blue Horizons range incorporates the popular BOAST system and is enhanced with a range of market leading speciality products. Rest assured that by following our simple water care system, your customers will really have pool water to BOAST about throughout the swimming season.

- B** Balance your pool water for bather comfort & maximum chemical efficiency
- O** Oxidise to establish a sanitiser level then weekly to destroy bather wastes
- A** Algae prevention. Stop algae establishing themselves in your pool water
- S** Sanitise. Maintain a constant sanitiser level to prevent & kill bacteria
- T** Testing. Test your pool water to ensure the correct levels

POOL FIRST AID

Problem solvers

The importance of phosphate removal and control

Recovering an algae infested pool can be time consuming and expensive, which is why algae prevention is always preferable to cure. Apply a regular dose of Blue Horizons Ultimate Phos Away to pools where mains water phosphate levels are elevated. Alternatively, if the pool has algae, follow your normal procedure to cure, then apply Blue Horizons Ultimate Phos Away.

Ultimate Phos Away

Highly concentrated phosphate remover and clarifier

Phosphate removal means fewer algae problems

Less cleaning and vacuuming - reduces pool maintenance

		Phosphate level			
		200 - 1,000ppb	2,000ppb	4,000ppb	6,000ppb
Pool Volume					
Litres	Gallons				
22,730	5,000	71ml	142ml	285ml	425ml
45,460	10,000	142ml	285ml	565ml	850ml
68,190	15,000	213ml	425ml	850ml	1.28ltrs

Order Code	Pack size	Case QTY
PHOSAWAYULTIBH	1ltr	6

*In conjunction with normal algae cure procedure.

Please note: All chemicals must be ordered in full case quantities.

Disinfectants

Calc-Chlor 300g Chlorine Pods

An effective, easy to handle calcium hypochlorite tablet
300g stabiliser-free chlorine pods
Sleeved for slow, consistent chlorine release
Lasts up to 5 days
Part of the BOAST System

Order Code	Pack size	Case QTY
SHTAB30048BH	4.8kg	each

Power6 Multifunctional 250g Chlorine Tablets

Sanitiser
UV Protected
Quick release shock top
Filter cleanser
Clarifier
Algae prevention

Order Code	Pack size	Case QTY
POWER6TAB5BH	5kg	each

Multifunctional 200g Chlorine Tablets

A long lasting, multifunctional 200g chlorine tablet
High chlorine content - economical
Stabilised to minimise chlorine loss to sunlight
Enhanced with a clarifier and algae inhibitor for sparkling clear water

Order Code	Pack size	Case QTY
MFTAB2002BH	2kg	each
MFTAB2005BH	5kg	each
MFTAB20010BH	10kg	each
MFTAB20025BH	25kg	each

Multifunctional Mini 20g Chlorine Tablets

Smaller 20g chlorine tablet, ideal for floating dispensers or chlorine feeders
High chlorine content - economical
Stabilised to minimise chlorine loss to sunlight
Enhanced with a clarifier and algae inhibitor for sparkling clear water

Order Code	Pack size	Case QTY
MFTAB201BH	1kg	6
MFTAB2025BH	2.5kg	each
MFTAB205BH	5kg	each

200g Chlorine Tablets

A popular traditional 200g chlorine tablet
High chlorine content - economical
Stabilised to minimise chlorine loss to sunlight
Slowly release chlorine over 3 – 4 days

Order Code	Pack size	Case QTY
CLTAB2002BH	2kg	each
CLTAB2005BH	5kg	each
CLTAB20010BH	10kg	each
CLTAB20025BH	25kg	each

Small Chlorine Tablets

A popular traditional 20g chlorine tablet
High chlorine content - economical
Stabilised to minimise chlorine loss to sunlight
Ideal for floating dispensers or chlorine feeders

Order Code	Pack size	Case QTY
CLTAB2025BH	2.5kg	each
CLTAB205BH	5kg	each
CLTABS2025BH	25kg	each

Ultimate Multifunctional Floating Dispenser

Pre-filled with slow release multifunctional chlorine tablets
Lasts between 3 – 5 weeks
2 sizes available to suit many pool capacities
Suitable for a regular or holiday treatment

Order Code	Pack size	Case QTY
MFDISP.72BH	720g	8
MFDISP15BH	1.5kg	6

Please note: All chemicals must be ordered in full case quantities.

Blue Horizons Pool Chemicals

Disinfectants

Stabilised Chlorine Granules

A traditional easy to dose chlorine granule
Stabilised to minimise chlorine loss to sunlight
Rapid Dissolving

Order Code	Pack size	Case QTY
CLGRAN01BH	1kg	6
CLGRAN02BH	2kg	6
CLGRAN05BH	5kg	4
CLGRAN10BH	10kg	each
CLGRAN25BH	25kg	each

Ultimate Stabilised Chlorine Granules

A rapid dissolving, easy to dose chlorine granule
Stabilised to minimise chlorine loss to sunlight
Enhanced with a clarifier for sparkling water

Order Code	Pack size	Case QTY
CLULTGRN2BH	2kg	6
CLULTGRN5BH	5kg	4

Bromine Tablets (BCDMH)

Popular alternative to chlorine
Apply via a bromine feeder or floating dispenser
Slow release 20g tablet for long lasting disinfection
Low odour, so ideal for indoor pools
Works efficiently over a wide pH range

Order Code	Pack size	Case QTY
BRTAB05BH	5kg	4

Floating Chlorine Tablet Dispenser

Available in two sizes
The small dispenser is ideal for 20g chlorine tablets
The large dispenser can accommodate 20g and 200g chlorine tablets

Order Code	Pack size
Small	
FLDISPSMLASTUCKED	each
Large	
FLDISPLRBH	each

Balance

pH Plus

A powdered product for increasing the pH of pool water

Order Code	Pack size	Case QTY
PHPLUS01BH	1kg	6
PHPLUS05BH	5kg	4
PHPLUS25BH	25kg	each

pH Minus

A granular acid for lowering the pH of pool water

Order Code	Pack size	Case QTY
PHMIN15BH	1.5kg	6
PHMIN07BH	7kg	2
PHMIN25BH	25kg	each

TA Raiser

A fine, rapid dissolving powder which is used for increasing the total alkalinity of pool water

Order Code	Pack size	Case QTY
TAPLUS05BH	5kg	each
TAPLUS25BH	25kg	each

TA Reducer

An inhibited hydrochloric acid-based liquid for the reduction of total alkalinity

Order Code	Pack size	Case QTY
20% Hydrochloric Acid		
TAMINUS05BH	5ltr	2
10% Hydrochloric Acid		
LHTAMINUS05BH	5ltr	4

Calcium Hardness Raiser

A calcium flake which rapidly increases calcium hardness to the desired level

Order Code	Pack size	Case QTY
CHPLUS05BH	5kg	each
CHPLUS25BH	25kg	each

Please note: All chemicals must be ordered in full case quantities.

Shock

Pool Fusion
Aqua Sachet

A powerful dual-action oxidiser and clarifier

Supplied in a convenient 175g one-treatment sachet

Use weekly to maintain crystal clear pool water

Sprinkle directly into pool water, no pre-measuring

Order Code	Pack size	Case QTY
SHFUSP175BH	175g sachet	20

Non Chlorine Shock

A fast dissolving, chlorine-free shock granule

Destroys swimmer wastes

Fast acting

Order Code	Pack size	Case QTY
NCLSHOCK05BH	5kg	4

Rapid Shock

A powerful, fast dissolving oxidiser

High chlorine content - economical

Destroys swimmer wastes and helps prevent/kill algae

Stabiliser-free

Order Code	Pack size	Case QTY
SHRAP01BH	1kg	each
SHRAP02BH	2kg	each
SHRAP05BH	5kg	each

POOL FIRST AID

Problem solvers

Metal Klear put to the test

Blue Horizons Metal Klear is not your average metal remover. It contains zero phosphates (which some metal treatments can contain) so won't encourage algae growth. Metal Klear is an advanced formula for chelating (sequestering) iron, copper and manganese. If metal staining can be found on the pool floor, sprinkle Blue Horizons Natural Stain Remover directly onto the stain to help 'lift' the stain off the pool surface, then apply Blue Horizons Metal Klear.

The pictures below were taken by a local service company. The pool had a copper reading over 5mg/l. Three days after the addition of Metal Klear, a couple of backwashes and a vac to waste and the pool water is totally transformed.

Metal Klear

A powerful metal sequestrant

Use to remove metal staining

Helps to clear discoloured water

A phosphate-free formula

Water volumes		Dose Rates		
Litres	Gallons	Initial	Fresh Staining*	Maintenance (weekly)
4,546	1,000	60ml	120ml	15ml
11,365	2,500	150ml	300ml	38ml
22,730	5,000	300ml	600ml	75ml
45,460	10,000	600ml	1.2ltr	150ml
68,190	15,000	900ml	1.8ltr	225ml

*Fresh metal staining or water discolouration dose.

Order Code	Pack size	Case QTY
SPMETAL01BH	1ltr	6

AFTER Blue Horizons Metal Klear

Please note: All chemicals must be ordered in full case quantities.

Speciality

Chlorine Reducer

Reduces chlorine and bromine
Fast acting crystal
Problem solver

Order Code	Pack size	Case QTY
SPCLRED1BH	1kg	6

Ultimate Phos Away

Highly concentrated phosphate remover & clarifier
Triple strength formula
Fewer algae problems
Less cleaning & vacuuming – reduced pool maintenance

Order Code	Pack size	Case QTY
PHOSAWAYULT1BH	1ltr	6

Metal Klear

A powerful metal sequestrant
Use to remove metal staining
Helps to clear discoloured water
A phosphate-free formula

Order Code	Pack size	Case QTY
SPMETAL01BH	1ltr	6

Stain & Scale Inhibitor

Apply to control and remove metal stains
Use to prevent scale formation
Liquid for easy application

Order Code	Pack size	Case QTY
SPSTNHIB1BH	1ltr	6

Solar Shield

Liquid pool blanket
Reduces evaporation and heat loss
Compatible with all sanitisers
One dose lasts up to a month

Order Code	Pack size	Case QTY
SPSOLAR02BH	2ltr	6

Ultimate Phos Granules

Highly concentrated granular phosphate remover
Easy to dose twin sachet
Fewer algae problems
Less cleaning and vacuuming

Order Code	Pack size	Case QTY
PHOSULT100BH2	x 100g sachet	12

Concentrated Phos Away

Phosphate removal means fewer algae problems
Less cleaning and vacuuming
Reduces pool maintenance
Liquid for easy application

Order Code	Pack size	Case QTY
PHOSAWAY1BH	1ltr	6

Pool Leak Seeker

Seals minor cracks
Suitable for pool and spa pipework
Fast acting liquid for easy application

Order Code	Pack size	Case QTY
SPLEAK01BH	1ltr	6

Chlorine Stabiliser/Conditioner

UV protection for chlorine in granular form
Use in outdoor pools

Order Code	Pack size	Case QTY

ALGAE02BH	2ltr	6

Longlife Algaecides

AlgiMAX Eliminator

A long-life copper based algaecide
Prevents algae growth for up to 3 months
Concentrated for economical use
Also popular as a Winteriser

Order Code	Pack size	Case QTY
ALGIMAX1BH	1ltr	6
ALGIMAX2BH	2ltr	6

Summerclear

A long-life copper-free algaecide
Prevents algae growth for up to 3 months
Compatible with a wide range of sanitisers

Order Code	Pack size	Case QTY
ALGAESUMC02BH	2ltr	6

Concentrated Winter Time

A copper-free winter algaecide
Compatible with a wide range of sanitisers
1ltr will treat up to 12,000 gallons

Order Code	Pack size	Case QTY
ALGWNTR1BH	1ltr	6

Summerclear PLUS

Highly concentrated formula
1 litre pack size reduces plastic packaging and is more economical
Effectively treats even the toughest of algae and prevents re-growth for up to 3 months

Order Code	Pack size	Case QTY
ALGAESUMC1BH	1ltr	6

Ultimate Winter Time

A copper-free winter algaecide
Built-in stain control for added protection
Compatible with a wide range of sanitisers
Treats pools up to 15,000 gallons

Order Code	Pack size	Case QTY
ALGWNTR5BH	5ltr	4

AQUA *gentle*

FOR SOFT AND GENTLE
HOT TUB WATER

Aqua Gentle is a simple and effective water treatment kit that includes everything required to manage a hot tub's water care routine.

The Aqua Gentle Conditioning Liquid's highly advanced formula helps to prevent bacteria building up within the pipework, reducing chemical consumption. Our unique Fizzy chlorine tablets are rapid dissolving, near pH neutral and are suitable for all types of hot tubs.

- Less pH correction
- Lower chemical consumption
- Soft and gentle formula that is kind to your skin
- Further enhanced with a light lavender fragrance

Simplified water treatment with just 3 easy steps; *testing, treating, and conditioning.*

Hot Tub Conditioning Liquid

Aqua Gentle Conditioning Liquid combines flocculants and water conditioners to create soft, luxurious water and prevent bacteria build-up within hot tub plumbing.

Enhanced with lavender oils

Gentle formula that is kind to skin

THE STEP BY STEP GUIDE TO SAFE, SOFT AND GENTLE WATER

STEP 1: DAILY

TEST THE HOT TUB WATER

Use the 3+ Test Strips to test your hot tub water for chlorine, pH and total alkalinity. The test strips will quickly let you know if the levels are correct or need adjusting.

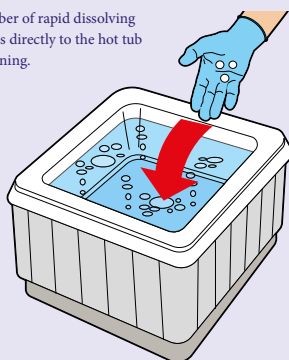

IDEAL LEVELS

CHLORINE	pH	ALKALINITY
3 - 5 ppm	7.2 - 7.6	80 - 150 ppm

ADD AQUA GENTLE FIZZY TABS

Add the required number of rapid dissolving Aqua Gentle Fizzy Tabs directly to the hot tub water with the jets running.

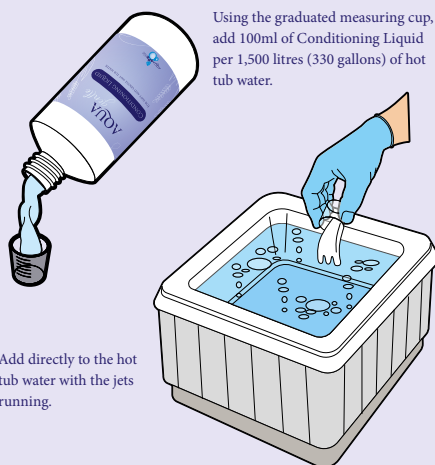

Note: If a lot of bathers are using your hot tub, you may need to increase the number of Fizzy Tabs to help maintain ideal chlorine levels.

STEP 2: WEEKLY

ADD AQUA GENTLE CONDITIONING LIQUID

Shake the bottle vigorously.

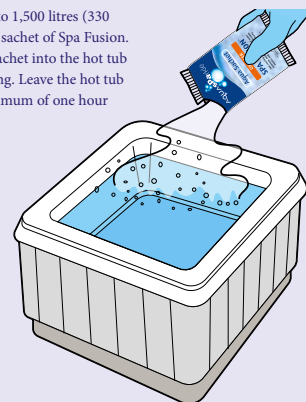

Using the graduated measuring cup, add 100ml of Conditioning Liquid per 1,500 litres (330 gallons) of hot tub water.

Add directly to the hot tub water with the jets running.

STEP 3: BI-WEEKLY

ADD SPA FUSION

For hot tubs of up to 1,500 litres (330 gallons), apply one sachet of Spa Fusion. Empty the whole sachet into the hot tub with the jets running. Leave the hot tub cover off for a minimum of one hour after application.

USEFUL INFORMATION

FOAM CONTROL

Body oils, cosmetics and detergents on swimming costumes can result in unsightly foaming on the hot tub water surface. If foaming occurs, use AquaSPARKle FoamAway to control it.

DRAINING AND REFILLING

Over time, your hot tub water absorbs minerals, chemicals and bathers pollution leading to dull and lifeless water. Draining and refilling your hot tub with fresh water every 2-3 months can help to prevent this. Prior to drain down, take the opportunity to clean your hot tub's internal pipework using AquaSPARKle Hot Tub Flush.

FoamAway, Hot Tub Flush and other speciality products can be found in the AquaSPARKle Premium Care Service Pack.

Please note: All chemicals must be ordered in full case quantities.

An innovative range including the UK's largest selection of speciality products.

AquaSParkle has grown to be a trusted brand and is now one of the largest hot tub chemical ranges in the UK. For 2025 we decided to give the labels an up-lift, with a modern new design that incorporates eye catching metallics to make it stand out in your showroom. With the refresh we have simplified the user instructions and added QR codes that link to short how-to-use videos.

The range includes:

- A selection of speciality products to tackle problems such as foam, scale and water clarity
- Pre-measured, one-treatment sachets for filter cleaning, oxidising and conditioning
- An extensive range of kits for routine maintenance including non-chlorine based and hot tub care kits

PRODUCT FEATURE

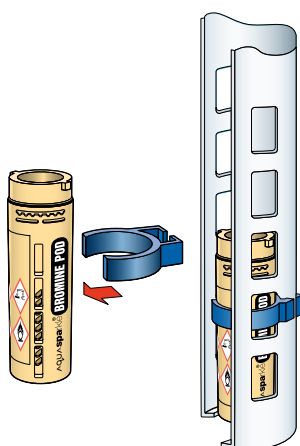

Bromine Pod

The AquaSParkle Bromine Pod provides continuous in-line sanitation by producing active bromine to kill bacteria and potentially harmful organisms. The AquaSParkle Bromine Pod has made caring for your hot tub water even easier. The in-line Bromine Pod delivers enough bromine directly into your hot tub water without the need to measure or handle chemicals and deliver consistent sanitiser dosing. All combining to make your hot tub experience more enjoyable than before with clearer safer water.

The AquaSParkle Bromine Pod is designed to be flexible and can be installed in a number of ways:

Order Code	Pack size	Case QTY
ASPODBROMINE	3 x 140g	8

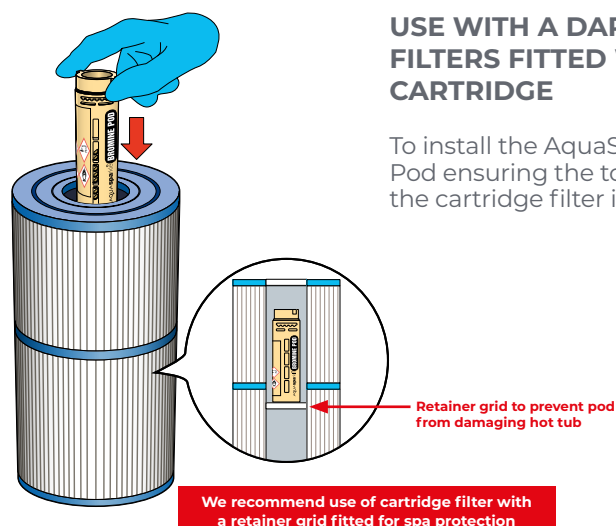

USE IN A BUILT-IN PROPRIETARY HOT TUB DOSING SYSTEM (OR FRAME)

Attach the AquaSParkle Bromine Pod to the chemical dispenser frame or chamber using the adaptor clip provided. Ensure that the AquaSParkle Bromine Pod is firmly attached to the adaptor clip, and the adaptor clip is firmly attached to the chemical dispenser frame.

It takes a while for bromine tablets to begin to dissolve so it may be appropriate to first shock treat to immediately establish chlorine or bromine residuals. Add the appropriate amount of Spa Rapid Shock as per product label dosing instructions. Always test your hot tub water prior to use and maintain bromine levels between 4 to 6 mg/l (ppm).

(this initial shock dose applies when using the AquaSParkle Bromine Pod in any of the 3 installations).

USE WITH A DARLLY SANISTREAM™ OPEN-TOP FILTER, OR OPEN-TOP FILTERS FITTED WITH A STOPPER DEVICE IN THE CENTRE OF THE CARTRIDGE

To install the AquaSParkle Bromine Pod into an open ended cartridge filter lower the Pod ensuring the top is upright, until it rests onto the Pod retainer grid. Then install the cartridge filter in the hot tub.

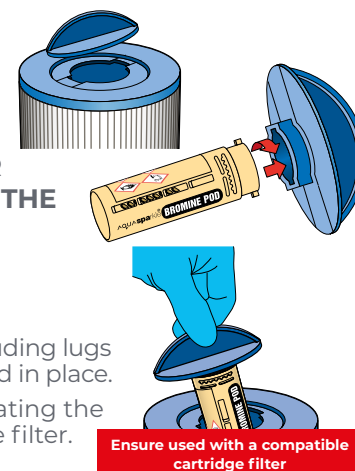

We recommend use of cartridge filter with a retainer grid fitted for spa protection

USE WITH A DARLLY SANISTREAM™ HANDLE-TOP CARTRIDGE FILTERS, OR OTHER CARTRIDGE FILTERS THAT CONTAIN A CAP THAT ACCOMMODATES THE CLIP-IN OF THE POD LUGS

To install the AquaSParkle Bromine Pod into a cartridge filter of the closed-cap type, first twist the handle anti-clockwise and remove the cap.

Install the AquaSParkle Bromine Pod in the cartridge filter cap by locating the two protruding lugs on the top of the Pod into the underside of the cap, then twist until it clicks to lock the pod in place.

Insert the AquaSParkle Bromine Pod and cap assembly into the cartridge filter by locating the lugs of the cap into the slots, then twisting clockwise to lock the cap into the cartridge filter. Then return filter to the hot tub.

Please note: All chemicals must be ordered in full case quantities.

Hot Tub Starter Kit

Spa Starter Kits

500g Stabilised Chlorine Granules or 500g Bromine Granules, 750g pH Minus, 500g pH Plus, 500ml FoamAway and 4-Way Test Strips. A handy chemical kit providing essential spa treatment products. Kit includes start up guide.

Revival Deluxe Hot Tub Scents

Scent is perhaps the most powerful of all the senses. Something rich and fragrant can relax and calm the mind, whereas a scent that is fruity and light can spark a surge of energy and creativity.

Each fragrance is crafted to evoke a specific mood, allowing users to tailor their experience to their desires; whether that's unwinding after a long day or invigorating the senses for the day ahead.

The Blue Horizons Commercial range offers premium water treatment solutions for the leisure industry, designed for professional pool operators, leisure centres, and holiday parks. With years of expertise, the range provides comprehensive products and support for efficient water management and maintaining optimal conditions.

Trusted Partnerships: As official distributors for a variety of well-known global brands, we bring trusted and reliable solutions to the leisure industry.

Regulatory Compliance: All products are manufactured to meet the highest industry standards, ensuring peace of mind for operators and compliance with health and safety regulations.

Comprehensive Solutions: A broad selection of dosing, testing, and monitoring equipment suitable for commercial, residential and other leisure facilities.

Advanced Technology: Cutting-edge systems that simplify water treatment processes, including automated chemical dosing and real-time water quality monitoring.

Expert Support: Backed by CPC's team of technical specialists, offering advice, installation guidance, and ongoing support.

Commercial Disinfectants

Sodium Hypochlorite

For routine use in pool and spa water treatment

Easy to use

Suitable for direct dosing or for dosage using injection equipment

Bulk Sodium Hypochlorite deliveries can be carried out subject to site survey conditions

Tile & Liner Cleaner		
CPTLC02BH	2ltr	6
Super Cleanse 50 x 20g (Chlorine Dioxide)		
BIOFILM5CM	1kg	each

Super Cleanse

Warm swimming pool and spa water can provide the ideal conditions for bacterial growth. As bacteria then starts to form on surfaces, in pipework and balance tanks, biofilm can begin to form. Biofilm is extremely resistant against chlorine. Blue Horizons Commercial Super Cleanse is a highly effective cleaning agent that penetrates the biofilm and helps remove the bacteria.

Can also be used to clean a biofilm covered surface such as floatation aids, covers, channel grates or around the pool side and in changing rooms.

Please note: All chemicals must be ordered in full case quantities.

Commercial Dosing and Control Solutions

Prominent Dulcodos Pool Pro

Free Chlorine & pH Monitoring & control system

Amperometric chlorine & pH measurement
Simple menu-driven operation
Wide range of monitoring functions, sample flow, temperature, pH and Chlorine
Probe housing with flow detection
Backboard mounted with power supply isolation - Simple and fast installation
Remote Real-time operation status via the DULCONNEX platform

Order Code

Dulcodos Pool System Pro
CPCPRMDULCOPRO

We also can supply a full range of Prominent dosing pumps and spares - full list available upon request.

ProMinent®

The Blue Horizons 400 controller has been developed to provide optimal water quality at all times for commercial and residential swimming and spa pools of all sizes. The controller is easy to install and maintain, and comes ready to use with a pre-mounted back board system, complete with an installation kit.

Measurement and control of both pH and free chlorine levels

Added temperature measurement sensor

Simple to operate with a large alphanumeric display with password protection

Inline pre-sample filter assembly

Clear acrylic sample cell with no-flow detection monitoring

Uniquely designed copper/platinum dual measurement electrode for longer service life

Can be used in conjunction with either 230 volt or pulse driven dosing devices

Optional extra remote monitoring system via the Blue Horizons Connect for "complete control"

ORP and pH measurement and control version available

Granudos Dosing Stations - Automated Control Systems

A user-friendly system that is favoured by professional operators. Designed for dosing calcium hypochlorite granules and pH correction chemicals simultaneously into swimming pool and spa water.

The calcium hypochlorite granules are fed from the drum or dosing hopper to the pool or spa water by a simple screw feed and venturi suction system, eliminating the need for conventional dosing pumps, day tanks and dosing injectors.

With flexible dosing output capabilities, the Granudos dosing station is operated using an intuitive coloured touch screen or via a clear to use 5-line LCD display.

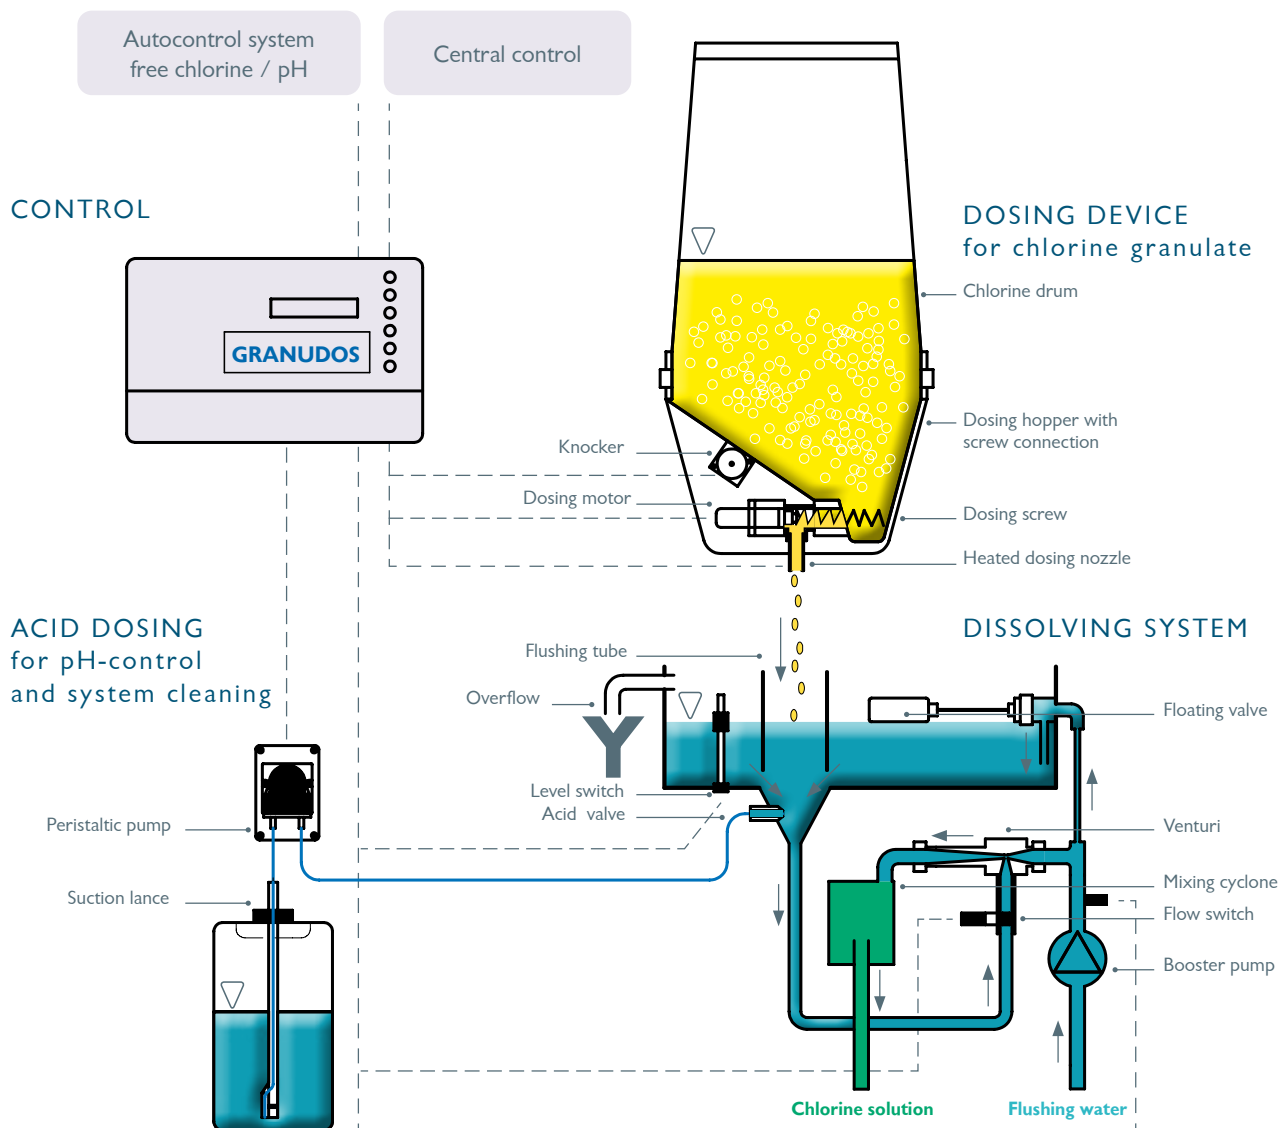

The Granudos can also be supplied as an all-in-one dosing station with an integrated free chlorine and pH measurement system CPR Touch XL.

How the Granudos Dosing System works

The Granudos dosing stations are designed for the dosing of Calcium Hypochlorite granules and liquid acid within the same system due to integrated software and hardware technology. Calcium Hypochlorite granules and acid are dosed at separate intervals into the dissolving system, the granules are completely dissolved and conveyed into the pool or spa circulation system whilst the liquid acid assists with pH correction and removal of any scale formation.

The dissolving system and water flushing tank are monitored continuously by sensors for water pressure, level, and flow. Once an alarm condition is recognised the Granudos will stop functioning and the dosing of chemical will be blocked until the alarms are cleared via the operational screens

Benefits

- Granular Calcium Hypochlorite feeder
- Compact, easy to install and operate
- Chlorine is dissolved within the unit, eliminating blocked injectors, no sludge, no wastage
- Fast reacting to chlorine demand – very efficient
- No mixing of chemicals, reducing the risk of manual handling and Health & Safety risks
- Operation and visualisation via 5-line LC display and three buttons or touch screen display
- Granudos 45 version – The product container is attached to the system further reducing manual handling issues
- Suitable for all types of Calcium Hypochlorite supplied containers

Features

- Safety features include flow, level and pressure sensors
- Adjustable operational dosing programmes
- Conical hopper ensuring an even flow of granular Calcium Hypochlorite to the dosing screw and dissolving tank via the unique venturi suction system
- Ability to continuously correct the pH level in the water as well as providing scale prevention
- Unique venturi suction system

Granudos 45 Dosing Stations

The Granudos 45 dosing station benefits from taking the Calcium Hypochlorite granules direct from the drum. With three systems to choose from with various options they are designed for the use with larger swimming pools or outdoor pools.

Multi-hopper dosing cradle available as an optional extra to accommodate different sizes of Calcium Hypochlorite drums

Granudos 45 CPR TOUCH XL

Complete all in one dosing station with integrated measurement and control system for pools up to 1200m³

Features include:

Dosing outputs: Chlorine – 2kg/hr pH – 3ltr/hr

Intuitive coloured 7" Touch-Graphic display to indicate the current data and status of the unit

Measurement of Free Chlorine, pH, ORP and temperature

Faults and alarms are illustrated by self-explaining icons

All control parameters are adjustable to ensure optimal pool conditions

Comprehensive event logs – up to 1000 days of data storage

Remote indication & access via browser driven devices (PC, tablet, smartphone)

Order Code

Granudos Flex Dosing Stations

The Granudos Flex system is a versatile modular system that provides multiple options, allowing customers to easily combine features according to their specific needs.

Three dosing hopper configurations available – standard 5kg and 15kg, along with the removable universal adaptor filling device for a 10kg drum

Improved designed cabinet - better accessibility of the components due to optimized arrangement and additional “maintenance openings”

The CPR TOUCH version comes complete with auto control system for an all in one dosing station

Granudos Flex CPR TOUCH XL

Complete all in one dosing station with integrated measurement and control system for pools up to 600m³

Features include:

Dosing outputs: Chlorine – 2kg/hr pH – 1ltr/hr

Intuitive coloured 7” Touch-Graphic display to indicate the current data and status of the unit

Measurement of Free Chlorine, pH, ORP and temperature

Faults and alarms are illustrated by self-explaining icons

All control parameters are adjustable to ensure optimal pool conditions

Comprehensive event logs – up to 1000 days of data storage

hth® is the world's leading brand of Calcium Hypochlorite used for the disinfection of swimming pools and spa pools, coupled with a range of dedicated feeders, making this a perfect choice for the professional pool and spa operator.

hth® Calcium Hypochlorite

Suitable for hard and soft water
Less pH correction is required
Balanced water easier to achieve
Helps control Total Dissolved Solids
Improves water quality and bather comfort

Order Code	Pack size	Case QTY
HtH Granules		
HTHGRANULAR25	25kg	each
HtH Easiflo Briquettes		
HTHEFTAB25	25kg	each

hth® Shock Granules

Clears algae - getting straight to the problem area
Cleans surface draw-off channels and skimmers
Cleans the filter
Burns off inorganic chloramines
Has minimum effect on water balance, TDS and pH
Does not add any cyanuric acid
Fast dissolving powder with long shelf life
Easy to handle and use - no need to pre-dissolve

Order Code	Pack size	Case QTY
HTSHOCKGRAN	4kg	2

hth® Feeders:

The **hth®** feeders are designed to be used in conjunction with **hth® easiflo™** Briquettes, and produces a ready-to-use, on demand chlorine solution for disinfecting swimming pools and spas.

Easy to install, operate and maintain
Can be used with an automated controller
No dosing pump or complex injection system required
All units supplied with a booster pump and venturi

hth® F10:

• Ideal for most pools and spas up to 150m³

Order Code
DOSHTH10FIRST

hth® F20:

• Ideal for larger volumes of water from 50m³ to 600m³

Order Code

Mr Pure

Inverter Salt Chlorinator

The **Mr Pure inverter Salt Chlorination System** is the first ORP salt chlorinator featuring **Inver Turbo Technology**. Designed to self-adapt to various conditions, it delivers 0–130% automated chlorine production, ensuring optimal sanitisation. Whether for initial disinfection or post-party cleanup, the Turbo Boost mode saves time and effort.

Key features include:

Low Salt Level Operation: Functions at 1g/L, keeping water crystal clear for up to 180 days without additional salt maintenance

Advanced PID Algorithm: Ensures precise control of chlorine production and pH regulation, ensuring bather comfort

Superior Swimmer Comfort: Creates soft and gentle water, free from red eyes, dry hair, and rough skin, ideal for those with skin sensitivities

Unparalleled Benefits

Energy Efficiency: Produces chlorine only when required, reducing energy consumption and costs

Self-Cleaning & Durable: Equipped with titanium electrodes and a self-cleaning mechanism for a long-lasting performance of up to 12,000 hours

Comprehensive Kit: Includes everything you need—control unit, electrolytic cell, probes, acid injector, and spare parts

User-Friendly Touch Screen: A sleek 75mm interface displays real-time water quality, removing any guesswork

Wi-Fi Controlled Operation: Manage and monitor with ease

Built in pH Dosing Pump: Fully automatic proportional dosing for pH control

Quiet Inverter Technology: Low operating noise for seamless integration

5-Year Warranty: Peace of mind with guaranteed reliability

Mobile App available for full remote control

DOSING PUMPS

Peristaltic Pumps

Ideal for precise dosing at low rates. Particularly suitable for products which are prone to gassing i.e. hydrogen peroxide, sodium hypochlorite. Stenner pumps come complete with foot valve, injector and 3 metres of injection tube and spare dosing tube.

Stenner Peristaltic Pump

Order Code	Models available	Size
DOSPUMPSTEN2	Stenner 2	2.15 litres/hour
DOSPUMPSTEN4	Stenner 4	7.57 litres/hour
DOSPUMPSTEN6	Stenner 5	10.73 litres/hour

Proxima Electromagnetic Dosing Pumps

Robust design – IP65 rated housings
Programable backlit alphanumeric display to give precise dosing of pool chemicals

Password protected standard and advanced menus

Large range of outputs available:
2ltrs – 32ltrs per hour

Mechanical adjustment of stroke length (injection volume)

PVDF dosing head – PTFE multi-layer diaphragm

230 volt or pulse driven inputs as standard

Anti-leakage system as standard

Pumps can be either wall or tank mounted via a pump bracket

Comes complete with Injector, footvalve assembly, dosing line tubing and cable connection for dosing inputs

Multi – function valve available to assist with over pressurisation conditions

Blue Horizons Solar Shield Liquid Pool Cover Dosing System

The Blue Horizons Timed Peristaltic Dosing Pump is a low cost simple to operate method of dosing Solar Shield into pools based on pool surface area and timed dosing.

The peristaltic pump provides trouble free operation, being self priming ideal for dosing from the Solar Shield container. The action of the peristaltic pump acts as a non return valve preventing siphoning when dosing down hill into a sump or drain.

The pump is controlled by a sophisticated digital timer allowing up to 48 timed outputs to be programmed. The required daily dose in mL can be directly entered into the programme.

The pump is supplied complete with suction and delivery lines, an injector and safety bund.

Bringing you The Complete Solution

CPC provides a Microbiological Water Analysis Service in accordance with current HSE guidelines. It is a minimum requirement that a UKAS accredited laboratory performs a monthly bacteriological test and a quarterly test for legionella when pool and spa water is made available to the public. This includes hot tubs used as part of a holiday let and hot tubs on display.

For more information please refer to the following publications:

HSG282 – Control of legionella and other infectious agents in spa pool systems

<http://www.hse.gov.uk/pubns/priced/hsg282.pdf>

L8 – The control of legionella bacteria in water systems

<http://www.hse.gov.uk/pubns/priced/l8.pdf>

Microbiological Testing of Spa & Pool Water

Spas/Hot Tubs

Microbiological samples for indicator organisms should be taken once a month as routine and quarterly for Legionella.

More frequent sampling may be required depending on the risk assessment.

The spa pool manager has the responsibility for ensuring that microbiological samples taken are at the appropriate intervals and the results recorded in the spa pool log book together with any remedial actions and follow up samples following an adverse report.

Swimming Pools

In order to establish that the pool is without risk to the health of those using it, pool operators will need to ensure, under COSHH Regulations, that they have adequately controlled the risks from exposure to micro-organisms. To do this, adequate disinfecting of the pool will need to take place and bacteriological sampling will be required.

Bacteriological sampling will need to be taken monthly in pools in use all year round.

More frequent sampling may be required depending on the risk assessment.

Constant checking of the correct disinfection level and pH value will ensure the bacteriological quality of a well run pool. Bacterial levels should be zero (or near zero) as a 'baseline'.

More frequent samples will be necessary where a deterioration in water quality occurs. Pools that are less frequently used should be checked before use and then monthly throughout their operational period.

Water Analysis Service

Why use CPC?

CPC delivers to its customers a simple complete package that helps you manage your water testing. Our yearly subscribers receive :-

- **Account set up and support from our dedicated team**
- **Yearly supply of sterilised sample bottles**
- **Pre-printed labels for all sample bottles**
- **All required Royal Mail next day delivery packets**
- **Easy to view tracking report**
- **Central certificate backup**
- **Access to CPC market leading technical support resource**

Our selected partner brings extensive experience in the microbiology of water providing UKAS accredited analysis for the isolation and enumeration of a number of micro-organisms that are important in assessing the safety of water.

Our range of services includes:

Legionella & total viable counts analysis for spas in accordance with L8 HSG274 parts 1-3

24 Hour Legionella analysis by PCR

Pseudomonas Aeruginosa, Coliform, total viable counts, Cryptosporidium analysis for swimming pools, hot tubs and spas.

Water Analysis Service Sample Procedure

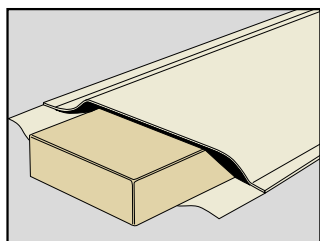

1. Dip the bottle into the water below the waterline and fill to the top.

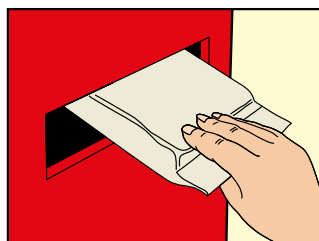

2. Complete the label which is on the bottle.

3. Place the bottle into the box.

4. Place the box into the watertight envelope and seal.

5. Post into a standard Post Box.

TECHNICAL SUPPORT

Our customer service and technical support team are here to help you get the best from our market leading, innovative water treatment products & dosing equipment. Whatever your enquiry or question, we are here to help, with over 300 years of cumulative industry experience.

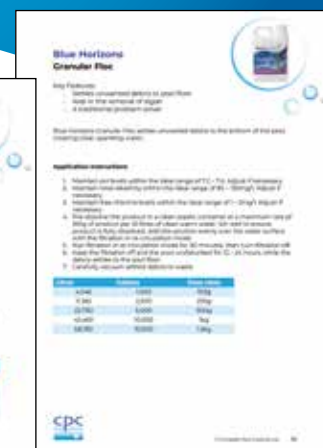

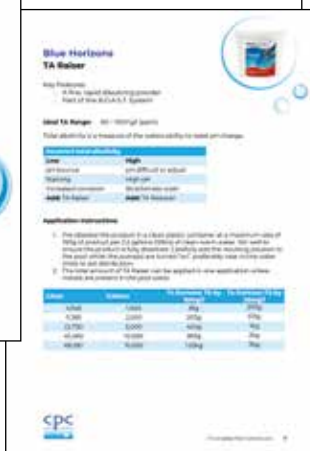

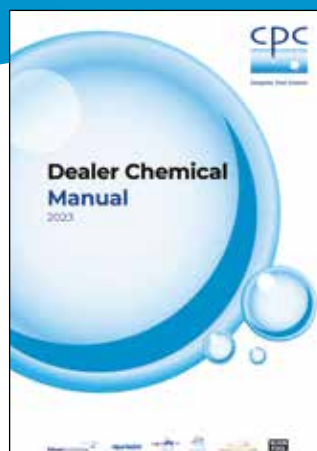

We also have 4 regional Account Managers who can offer field support as and when required.

It is this investment in technical support which puts Complete Pool Controls at the forefront of the wet leisure industry.

Full Range of Dealer Chemical Manuals

The Dealer Chemical Manual includes technical information on all Blue Horizons, AquaSParkle, Gold Horizon and Aquablanc products.
