

For smaller pools, paddling pools
and pool steps.

The Oscar.

mariner 

The battery-powered manual suction cleaner.

Cleaning that is easy to do.

With the Oscar,
we have taken the
goal for simple
and uncomplicated
handling literally.

Because Oscar is the first handheld cleaner with proven mariner 3S lamella filter cartridge technology. It is completely self-sufficient and does not need to be connected to a filter system.

Thanks to its battery operation, Oscar cleans without the restriction of an electrical cable and thus enables greater freedom of movement without the need for a power socket.

Practical and hygienic: During cleaning, the dirt is collected in the filter box. When cleaning is finished the filter box can be conveniently removed from the unit and rinsed out.

Scope of delivery

- 1 cleaning device with 2 filter cartridges 100 µm
- 1 telescopic pole 1,6 to 3,0 m
