customer brochure

Carropools is a manufacturer of 100% custom-made pools, wellness pools and swimming ponds, which can also be installed quickly.

Your wishes are always at the heart of every project. We are happy to introduce you to the wide choice, as almost anything is possible. From infinity to skimmer, from exclusive to simple. Always of high quality.

Carropools cooperates with professional pool builders and installers in Europe and UK who will be happy to advise and help you. Together with our dealers, we are ready to serve private and commercial customers (hotels, holiday parks, wellness centres).

The ideal combination of flexibility, eye for design and the application of the right materials and technology always result in a unique swimming pool, wellness pool or swimming pond.

Inspired ? Get advice from your dealer. Together we are at your service.

*Your Carropools Team*

# The benefits of Carropools.

## FLEXIBLE DESIGN AND EASILY PUT TOGETHER

A design you can customise down to the last centimetre. In all shapes to be made and supplied: rectangular, L-shaped, round shapes, angled, etc. Carropools can be made in different colours.

You also have ample choice in the finishing with built-in parts such as stairs, roller cover, benches, lamps, jets, etc. and determine the exact positions with your dealer.

All filter systems can be combined.

## QUICK TO INSTALL

Each basin is manufactured in our factory in Belgium entirely according to your specifications. Built-in components are already pre-installed, which significantly reduces the amount of work and time required to deliver the project in your garden.

In most cases, your Carropool will be ready to enjoy within 1 week of delivery.

Compared to concrete pools, weather will never have a major impact on timely delivery.

## HIGH QUALITY

Carropools pools, wellness pools and swimming ponds are made of mass-coloured PolyPropylene Copolymer (PPC) 10 mm or 20 mm thick. This makes them frost-resistant, impact-resistant, chemically resistant and osmosis insensitive.

Our materials and production follow ISO and DIN standards. Our welding techniques are meticulous and quality-controlled.

The sheet materials have a 30-year warranty, the welded joints 10 years.

## CLOSE TO DEALERS AND CUSTOMERS

With Belgian craftsmanship, dealers and their customers are advised and guided.

We like to be close to the projects to fully understand the details of the design, situation and requirements. Only then can we make each project a unique Carropools.

Because we have short lines of communication, we deliver quickly (within 8 weeks after approval of the technical drawing).

## SUSTAINABLE INNOVATION

Years of experience and continuous investments in small and large innovations allow Carropools to keep optimising its swimming pools, wellness pools and swimming ponds and guarantee their high quality.

Polypropylene Copolymer material (PPC) used to make Carropools has low thermal conductivity. Carropools pools are therefore up to seven times better insulated than standard concrete pools. The materials are chemically resistant (it contains and releases no harmful substances) and no microplastics are released into the water.

Moreover, Carropools pools are 99% recyclable.

# Carropools products

## Swimming pools

- Exclusive line
- Silver line
- Basic line

- » 100% custom-made.
- » From 4 m to a maximum of 30 m long in one piece\*.
- » Includes pre-assembled pool components and piping.
- » Available in configuration and price ranges : exclusive, silver and basic line.
- » Basin types : skimmer, underflow, overflow and infinity (and combinations thereof).
- » All possible forms.
- » Besides swimming fun, combine with relaxing wellness functions.

## Wellness pools

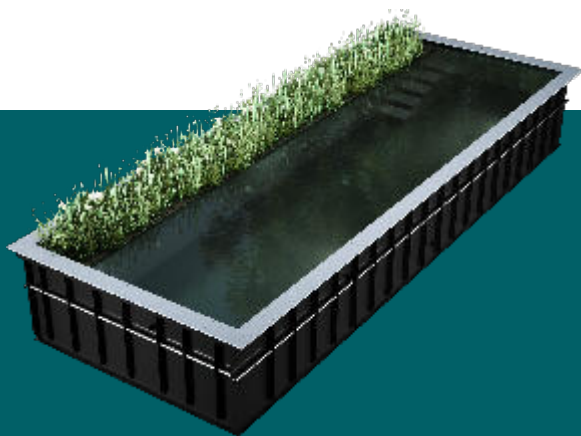

- Exclusive line
- Silver line

- » 100% custom-made.
- » Up to 4 m long and wide, for 2 to 12 people.
- » Includes pre-assembled parts in the wellness pool and piping.
- » Available in configuration and price ranges : exclusive and silver line.
- » Basin types : skimmer, underflow, overflow and infinity (and combinations thereof).
- » All possible forms.
- » Especially meant to relax in

## Swimming ponds

- Exclusive line
- Silver line

- » 100% custom-made.
- » From 4 m to maximum 30 m long can be delivered in one piece\*
- » Includes plant zone, pre-assembled parts and piping.
- » Available in configuration and price ranges : exclusive, and silver line.
- » With plant zone downflow or upflow across the length or width.
- » All possible forms.
- » Besides swimming fun, combine with relaxing wellness functions.

*\*If the project location and transport permit.*

The background of the image consists of a series of wavy, horizontal lines in various shades of blue, creating a sense of movement and depth, reminiscent of water ripples or topographical contours.

SWIMMING POOLS

# Custom-made swimming pools

Carropools custom-made pools are the best of both worlds : 100% custom-made like traditional concrete and construction pools, but in many cases cheaper and faster to install.

High quality, clean lines and unique bespoke possibilities distinguish Carropools pools.

- » Always 100% tailor-made
- » From 4 m to a maximum of 30 m long in one piece\*.
- » Includes pre-assembled components and piping.
- » In configuration and price categories : exclusive, silver and basic line.
- » Basin types : skimmer, underflow, overflow and infinity (and combinations thereof).
- » All possible forms.
- » Besides swimming fun, combine with relaxing wellness functions.

*\*If the project location and transport permit.*

*\* In its country and region, the dealer determines the selling price to you, the customer. Carropools offers the configuration options and price ranges to provide 100% customised pools, wellness pools and swimming ponds in all market segments and for every budget.*

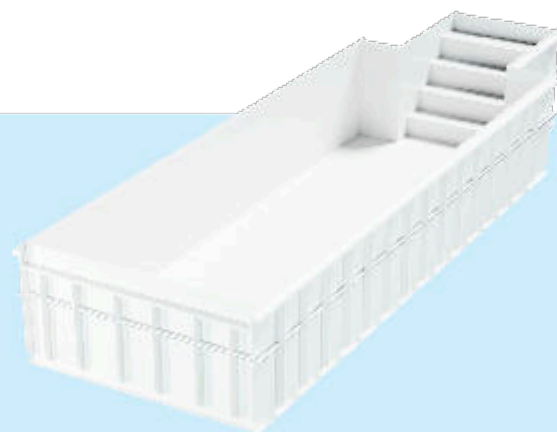

You design, we make all shapes and sizes.

Rectangle

L-shape

Roman

Round

Straight and round

Square

» Carropools pools are made to measure. We use unique materials, design, cutting and welding techniques that allow us to customise the shape, size and functions down to the last centimetre for you.

» We show some of the shapes you can choose as a base and then customise and dress up further.

» The maximum width and length of a Carropool that we can deliver as one unit on transport is 5.4 m x 30 m. Larger pools are also possible. We can transport components separately, which are joined together on site.

» The depth of the pool can also be adjusted. Different depths (uneven floor) in one pool are also possible.

Wide choice of pool colours gives you the flexibility to design.

White

Light grey

Dark grey

Anthracite

Black

Combination

White is a fresh colour for a pool. The Mediterranean look immediately invites.

Light grey is a frequently chosen design colour. The water colour is just a little more intense.

Dark grey is a designer colour that suits the stone edge and design style of a house.

The colour tone is natural and fits well in a modern garden and home style.

Black. Intense and contrasting. Infinitely deep. Black is also used in natural pools and helps heat the water faster.

Use your freedom to design. Be ready to enjoy.

# Type of pools

## Skimmer

Carropools skimmer pools are fitted with one or more high-water line skimmers made of PP material (or PVC skimmer), which can be placed in any location.

- » We aim for the highest possible waterline.
- » The small skimmer mouth catches floating debris which is discharged via a pump and filter.

## Infinity

Infinity pools are also Carropools' speciality and always give a spectacular effect. The features on the construction of the pool ex-factory, make the installation work for the pool builder easier and more efficient than, for example, a concrete infinity pool.

- » We aim for a luxurious look, sturdiness and convenience for the pool builder.
- » The lowered overflow channel all around captures floating debris that is discharged via a buffer tank, pump and filter.

## Overflow

Overflow pools are Carropools' speciality and always give a beautiful mirror effect. In addition, the watertight gutter construction makes installation work for the pool builder easier and more efficient than, say, a constructive overflow pool.

- » We aim for a luxurious look and quiet water flow in the gutters.
- » The all-round overflow channel catches floating debris which is discharged via a buffer tank, pump and filter.

## Underflow

Underflow pools are a special mix between skimmer and overflow pools. The water drains "invisibly" into a gutter around the pool that is hidden under the terrace tiles. The installation work for the pool builder is simpler and more efficient than, for example, a constructive underflow pool.

- » We aim for a luxurious appearance, sturdiness and convenience for the pool builder.
- » The all-round underflow channel catches floating debris that is discharged via a buffer tank, pump and filter.

# Skimmer pools

Carropools skimmer pools are fitted with one or more high-waterline skimmers made of PP material (or PVC), which can be placed in any location. We aim for the highest possible waterline.

## Carropools PP high-water line skimmer :

- » Always in 100% identical pool colour
- » Always as high a waterline as possible
- » Adjustable in size (height and width of opening)
- » Strong stainless steel skimmer basket and strong stainless steel cover plate
- » Extra watertight by welding assembly to pool

## PVC skimmer :

- » Cheaper variant
- » In white, grey or black
- » Standard model
- » Plastic skimmer basket
- » Pool-mounted with gasket

# Underflow pools

Underflow pools are a special mix between skimmer and overflow pools.

The water drains "invisibly" into a gutter around the pool that is hidden under the terrace tiles.

The installation work for the pool builder is simpler and more efficient than, say, a constructive underflow pool.

We aim for a luxurious look, sturdiness and convenience for the pool builder.

The all-round underflow channel catches floating debris that is discharged via a buffer tank, pump and filter.

# An automatic cover is durable and indispensable.

Carropools provides compatible roller cover systems suitable for the various types of PP pools. In terms of finishes and materials, we always ensure quality and where necessary modifications. Besides the systems and material choices, we provide invisible and expert installation, visible only when you need it.

## Advantages and features of an automatic roller cover

- » The slats we recommend are made of PolyCarbonate. These have a long service life and are hail-resistant.
- » The slats come in versions with or without solar function (solar can help heat the water), with or without anti-algae (reduced algae growth between/on the slats) function.
- » The choice of colours is wide so that the look of your cover perfectly matches the style of your home and garden.
- » At Carropools we pay extra attention to the edge and edge finishing so that the cover fits well with the pool wall.

	PolyCarbonate	PVC
Impact resistance	442j/m	118j/3
Minimum temperature	-30°C	-10°C
Maximum temperature	+120°C	+65°C

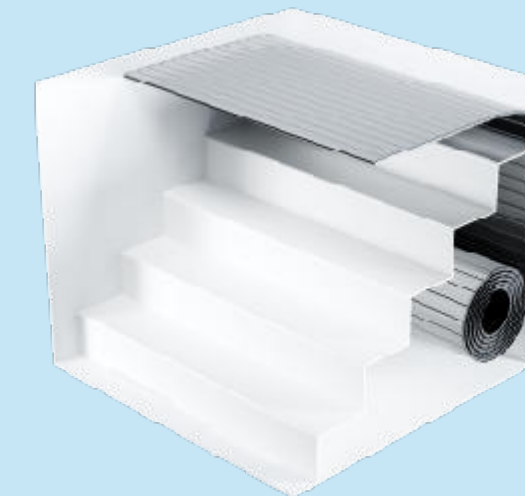

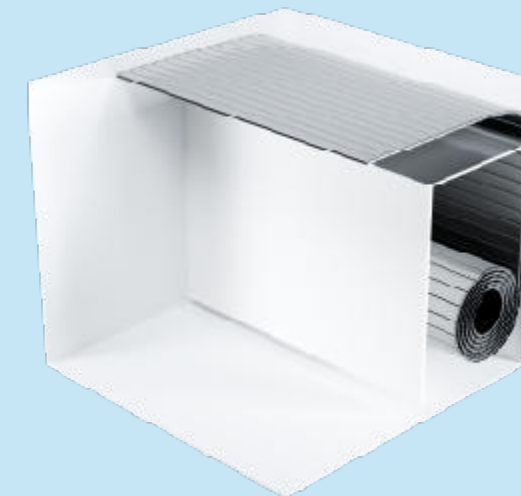

# Cover installation options

The shaft and motor of the cover system are expertly installed by Carropools at the factory. The pool builder installs the slats and the controls. We pay attention to ease of operation, aesthetics and robustness of the housing structures. If you have a wish for extra safety, there are various options (edges, supports, locks) that you can discuss with our dealers.

**Plage :** Installation of the cover within the basin under a plage. The plage also serves as a shallow sitting/lying area for relaxing. Ask about the various sizes.

**Stairs :** Installation of the cover within the basin under a wide staircase or bench seat (e.g. Completo lounge staircase). The first stair step has a minimum width of 55 cm.

**Pit :** Installation of the cover outside the basin in a recess, giving you maximum retains swimming space.

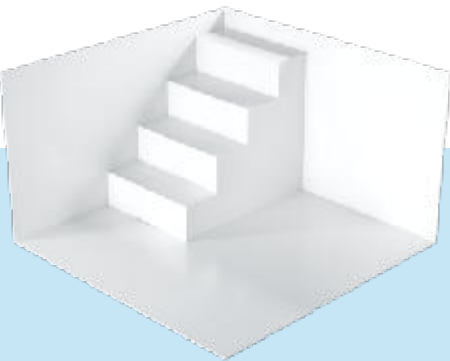

# Design your own staircase or choose one of these models.

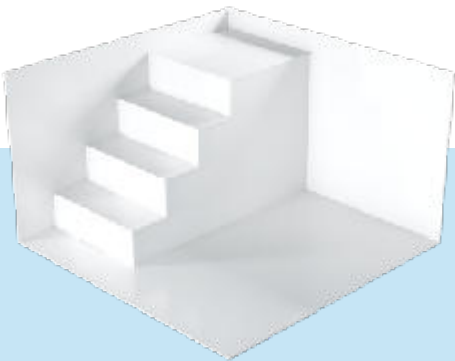

More can be done than you think. You can modify any sample model as you wish.

## Popular models

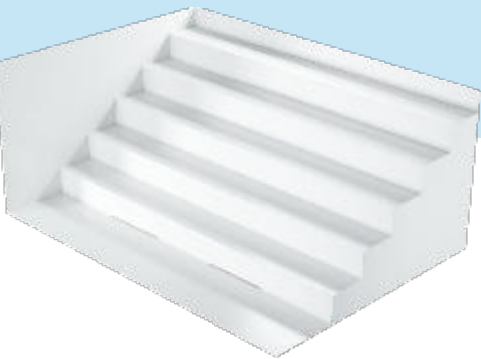

» The narrow structa lounge stairs. This maximises the space in your pool. Placed in a corner, often adjacent to a plage. The extra-long first step (lounge) adds convenience and design.

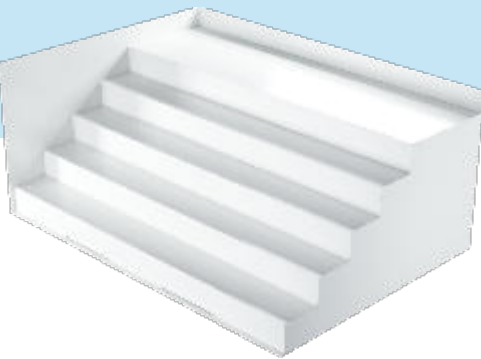

Structa

be ready to enjoy.

# Sitting and lounging benches

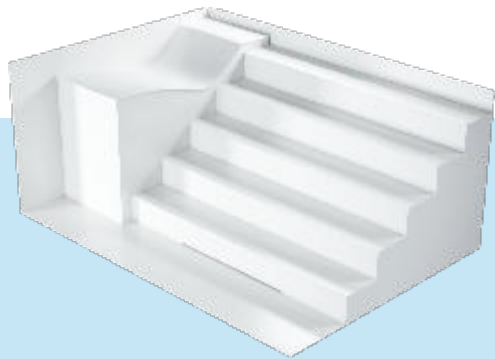

Sitting and lounging benches bring relaxation to your pool.

Whether it is meant for 1 person or 10, you can choose various customised seat and bed models and customise them as required.

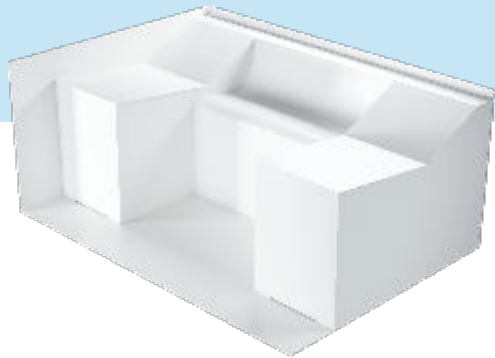

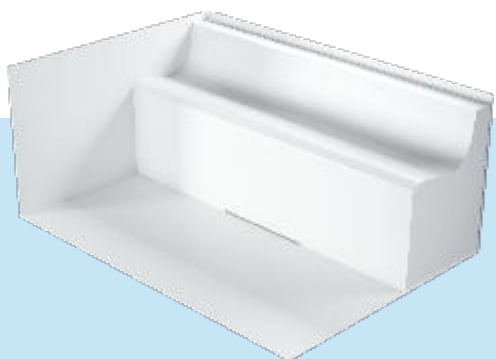

For extra seating comfort, you can choose a sloping backrest for a straight sofa.

In the benches, you can add bubble zones or massage jets, for example (see explanation in section wellness pools).

Round bed combined with stairs

Round bench for 4 -5 persons

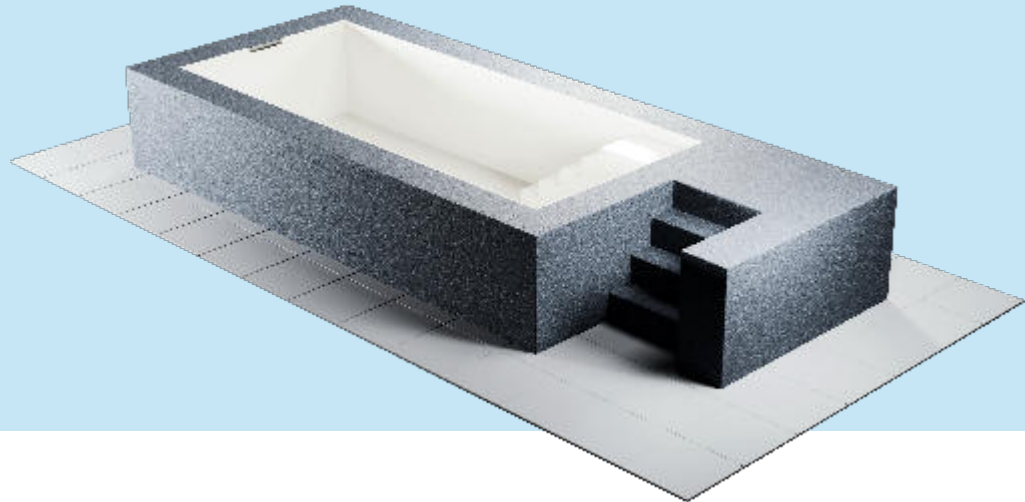

V-shape beds combined with round bench seat

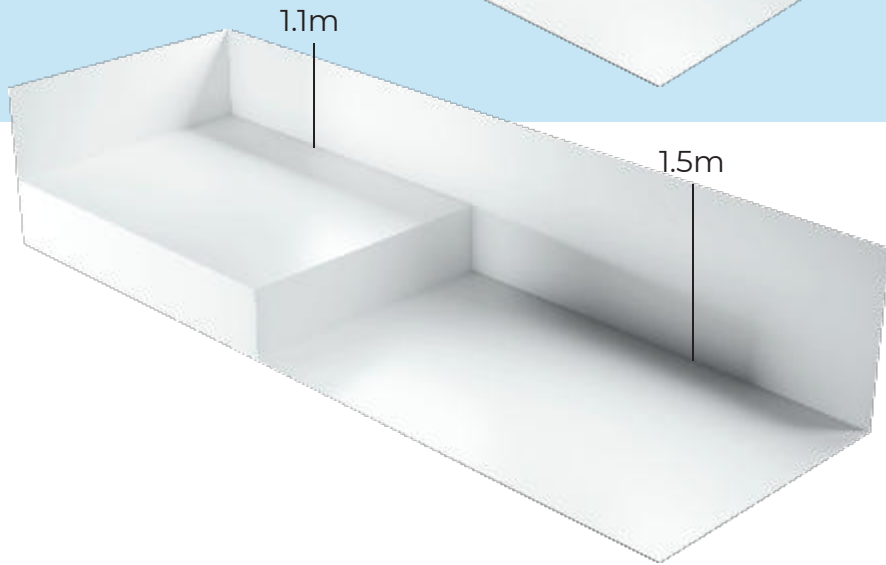

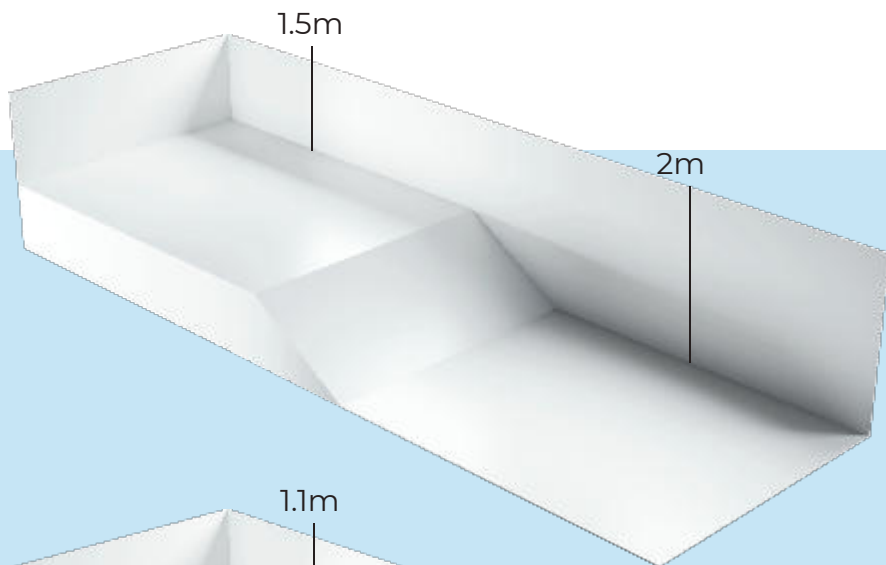

Straight bench along the length of the pool

# Pool construction options

A Carropools swimming pool can be installed as a freestanding pool (above ground). The pool is then reinforced on the outside in consultation with the pool builder. Advantage: compared to concrete, the Carropools construction is lighter and faster to install. Ideal for a terrace, for example.

The bottom of a Carropools pool can be executed with uneven floor heights. Option : with straight or sloping transition.

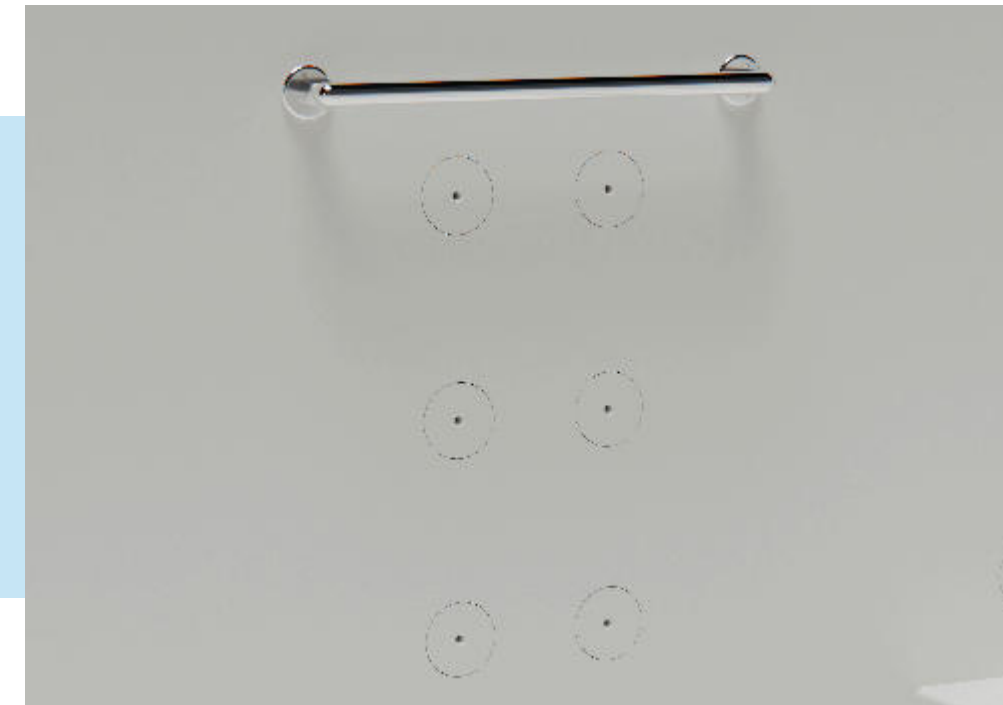

Water massage jets, hydromassage jets and bubble zones can also be built into your pool.

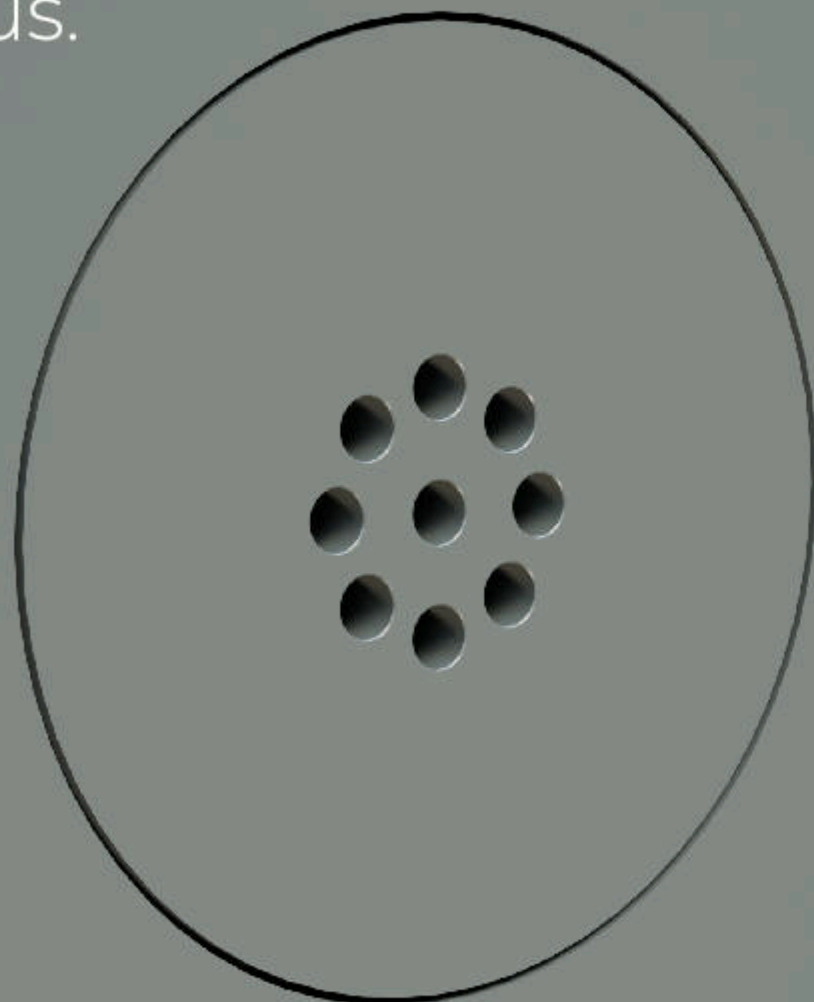

Carropools PP water massage jets in the wall or elsewhere. Enjoy the massage jets while standing. In various sizes, fixed in the wall or removable. Always 100% colour identical. The installer installs a pump in the plant room.

Carropools PP bubble zone for 1 to 4 persons in seat (or backrest). Always 100% colour identical. As shown below in a wide model staircase in a swimming pool. The installer places an air blower in the plant room.

The operation and appearance of the return inlets and suction devices in your pool are equally important to us.

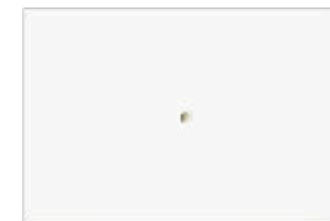

## Carropools PP return inlets & suction inlets. 100% flush.

At the same time, maximum functionality to ensure proper water flow:

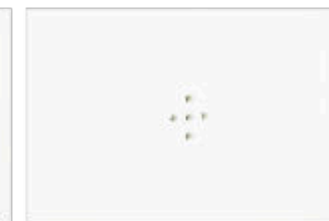

Options : fixed in the pool wall or removable (convenient for your pool maintenance).

Matching cover for Hoover connection.

1 hole - 12 mm  
non-removable

5 holes - 7.5 mm  
non-removable

Enrich your fun and sportsmanship with a countercurrent system.

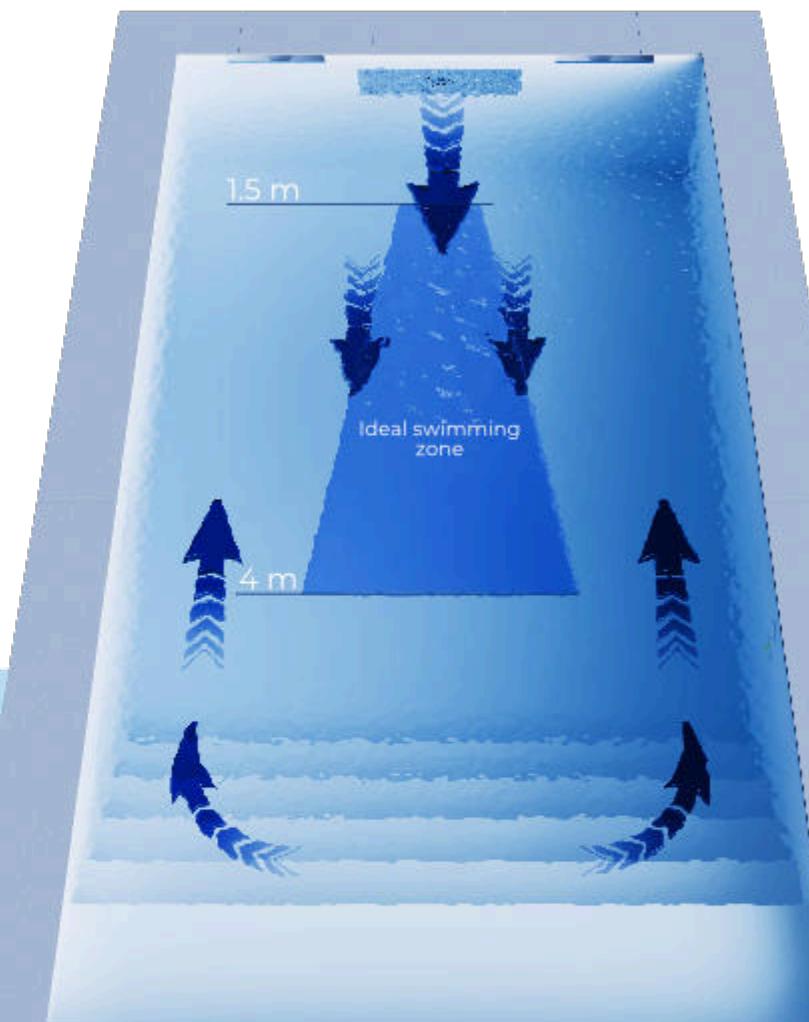

With a **countercurrent system** in your pool, you can exercise and have lots of fun. You create a lifelike swimming experience and thus your own fitness spot that can be used by young and old.

We recommend installing a countercurrent system in pools with a minimum length of 5.5 m. We take into account the **position of the countercurrent**, the other built-in parts such as the stairs and your wishes. This way, you will have enough space and the countercurrent experience will be optimal.

Countercurrent system **installation methods** are a **speciality of Carropools**. Beautiful, unique and efficient for your pool builder. Discover the options.

We sell and prefer 'turbine' driven technology because of its natural water flow. You can choose from the brands and models of leading European manufacturers EVA and Binder. The models are suitable for **both recreational and competitive swimmers**. Should you want a different brand or model of countercurrent, we are flexible and will expertly install it for you.

Swim zone may vary by make and model.

# Carropools countercurrentflush models

# Do you want a swimming pool while maximising your terrace space? Discover AquaMove.

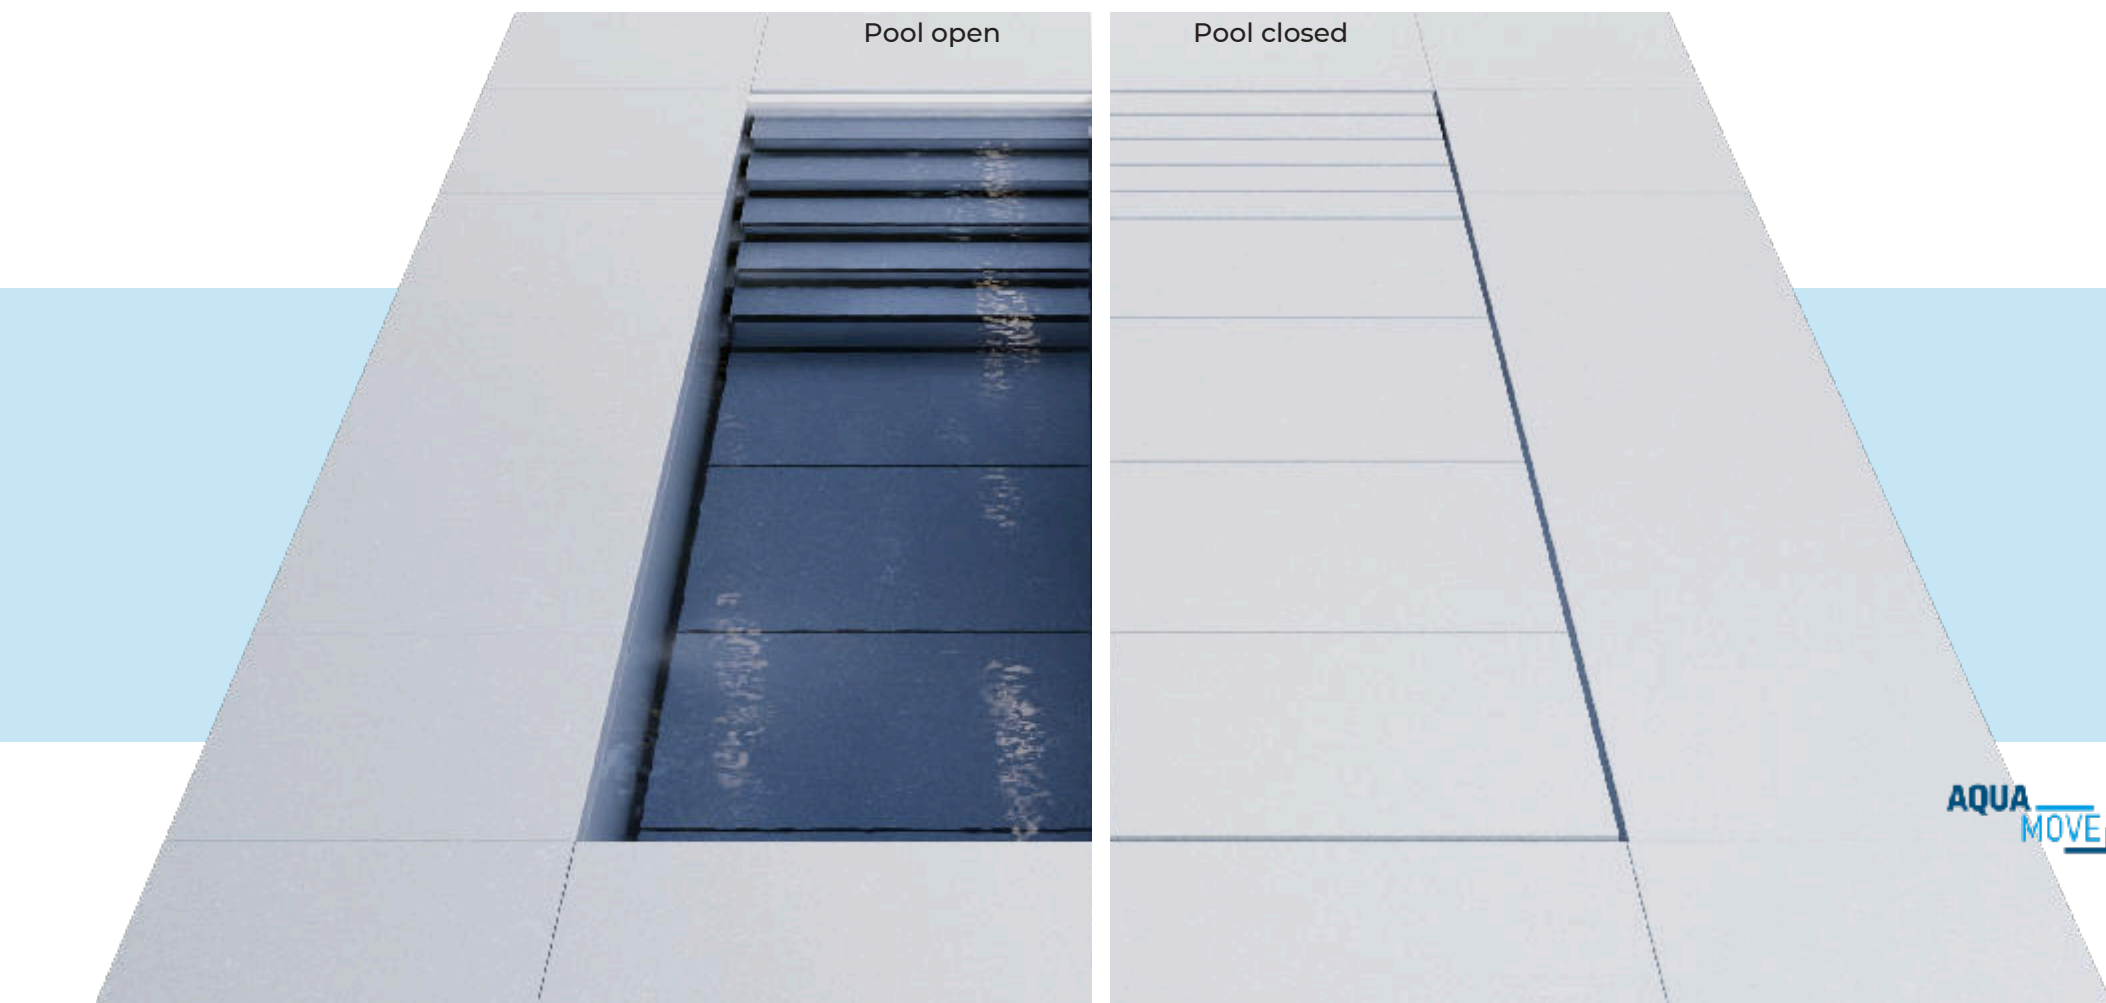

In cooperation with our supplier T&A, we offer the possibility of installing an AquaMove movable floor in your Carropools custom-made pool.

The advantages of an AquaMove floor in your Carropools custom-made pool.

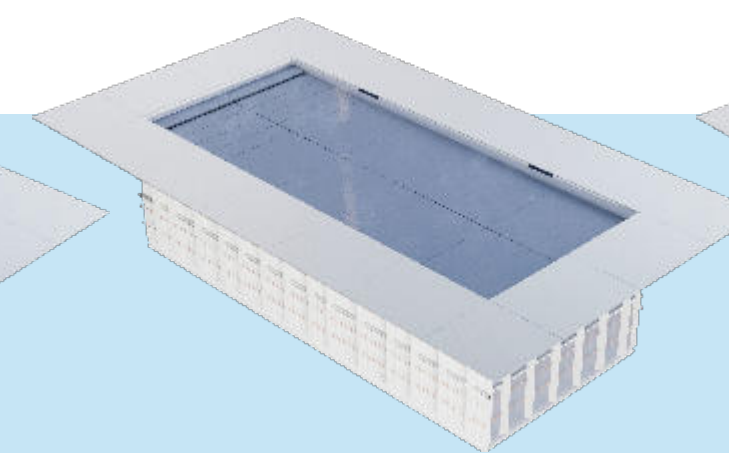

» By far the highest insulation value compared to other pool covers ( $U = 0.32 \text{ W/m}^2\text{K}$ )

» Maximum patio and utility space, perfect for small gardens. Load-bearing capacity is more than enough for several people to sit or stand on it.

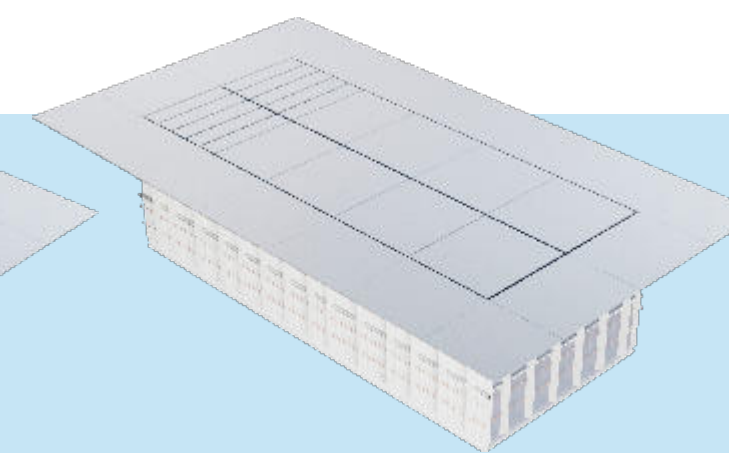

» Possibility of setting the floor depth to any desired height. For example :  
150 cm depth : adult swimming  
30 cm : small children play safely

Pool open - 150cm  
(swimming)

Pool open - 30cm  
(small children playing)

Pool closed  
(very high insulation value, suitable for  
walking, playing and dancing.)

# Why choose a Carropools pool with an AquaMove floor?

As manufacturers and brands, Carropools and T&A both stand for the best quality. Carropools pools are customised so that the movable floor fits and works perfectly in function and appearance. Both products are prefabricated and therefore relatively quick to install.

1

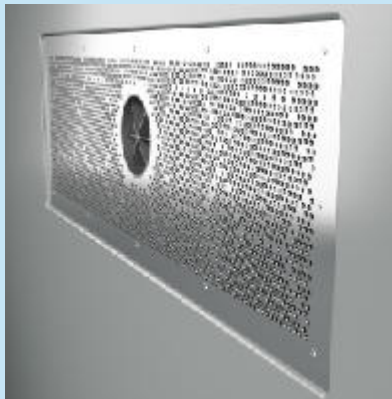

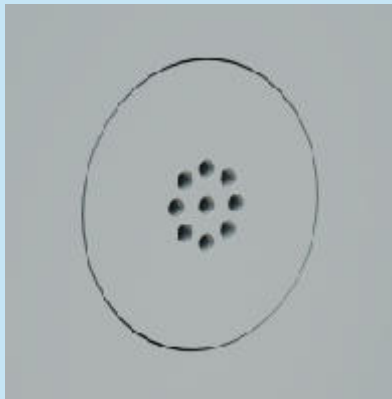

Carropools pools (skimmer, overflow and underflow) are adaptable so that the connection between floor and pool is perfect.

2

By providing advice and help with installation, Carropools ensures permanently straight walls that allow the floor to keep moving up and down perfectly.

3

All built-in parts such as lamps, return inlets, hydromassage and countercurrent installations can be installed 100% flush to the wall.

## AquaMove product options

3 types of floors that differ in carrying capacity, operation and functions.

Always with movable stairs and/or platform.

- 5 stairs types
- 3 platform (plage) types

SHP : Stability Hermetic Pack (=enclosing surround between pool wall and moveable floor)

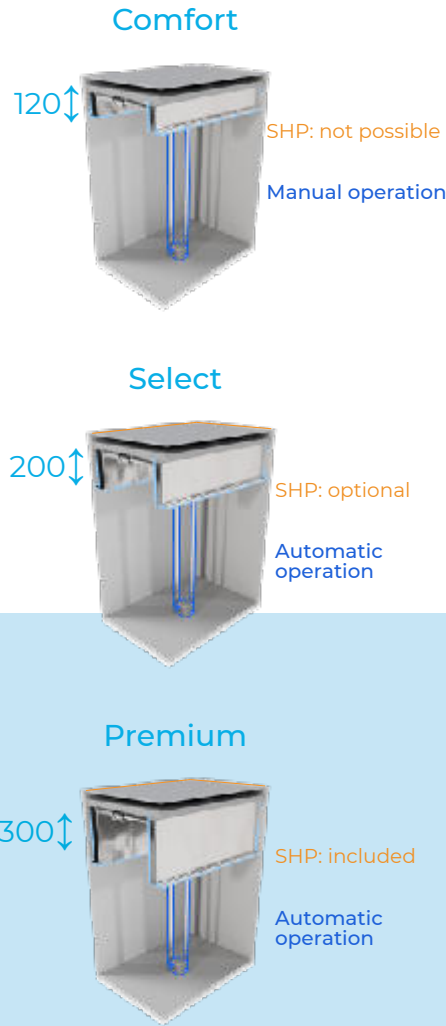

Very high insulation value (100 mm, U = 0.32 W/m²K)

Advice and installation by professionals from the manufacturer T&A.

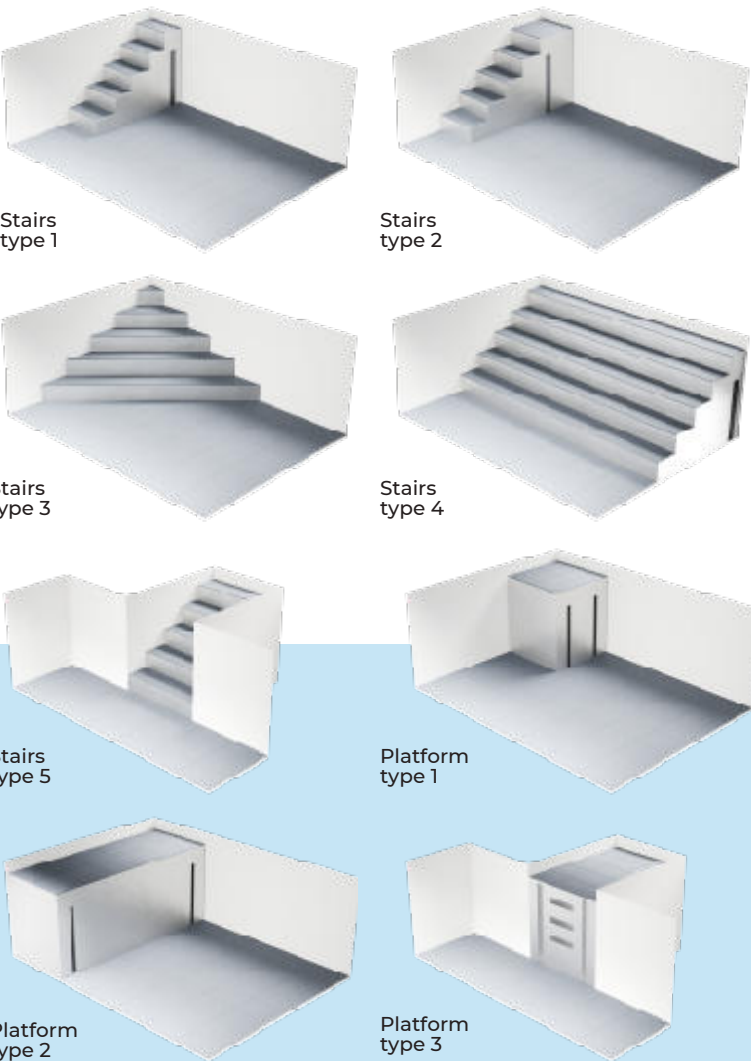

Manual or automatic control by app or switch. Includes certified safety functions.

Ask your Carropools dealer about the possibilities.

## 3 types of floors

## movable stairs and/or platform

The background of the image consists of a series of wavy, horizontal lines in various shades of teal and blue, creating a sense of movement and depth. The lines are more pronounced on the left side and fade into a solid dark teal on the right.

WELLNESS POOLS

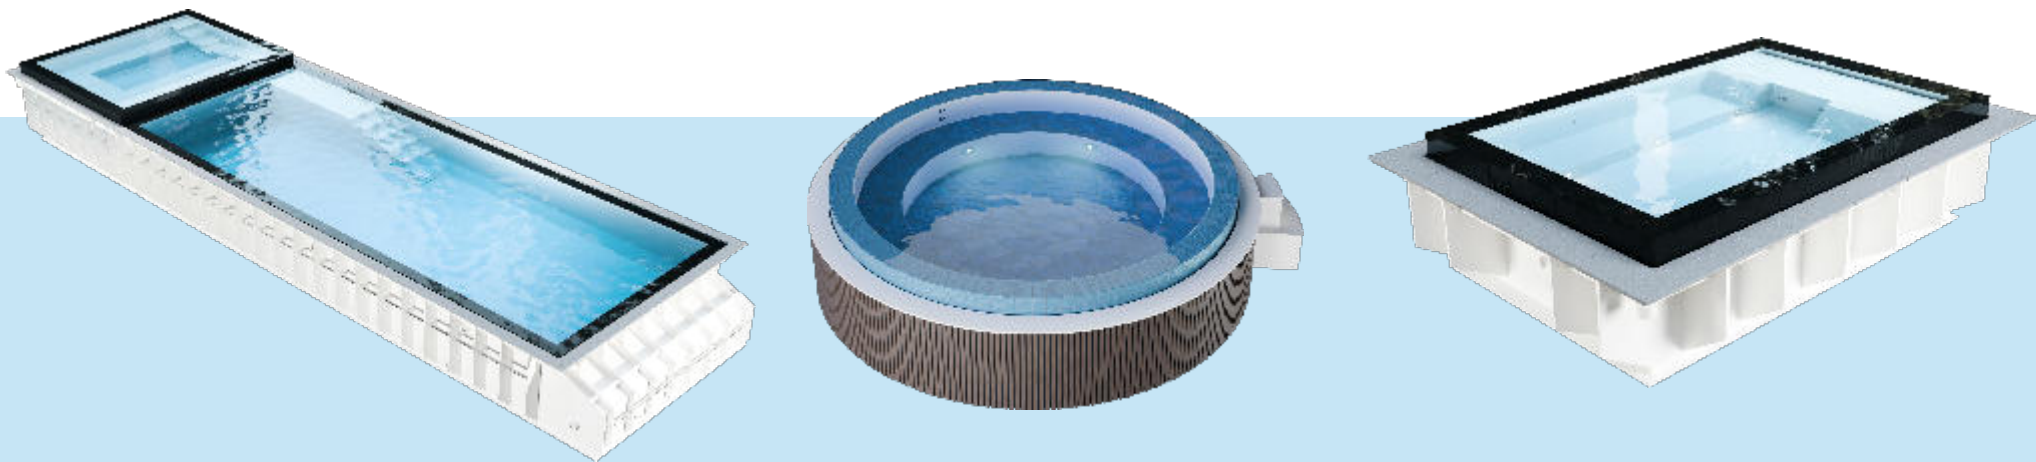

# Custom-made wellness pools

Carropools customised wellness pools are unique for their endless possibilities and elegance. Different from standard jacuzzis.

Compared to standard Jacuzzis and spas, you can customise type of walls, shape, size, colour and built-in parts.

At the same time, we offer efficient and easier solutions to the wellness builder compared to a spa made of concrete. For example, a Carropool wellness pool can be located on a penthouse terrace and quickly realised.

- » Always 100% tailor-made.
- » Up to 3.9 m in length and width.
- » Available configurations / price ranges : exclusive and silver line.
- » Skimmer, underflow, overflow and infinity (and combinations thereof).
- » All possible shapes. Loose or possibly fixed to a pool.
- » Many models of benches and lounge beds.
- » Massage, hydromassage and bubble zones in various designs.
- » Optionally available with automatic slatted roller cover and/or customised spa cover.

removable

9 holes - 7.5 mm  
removable

The colour and material of the built-in parts are 100% identical to the walls of your pool, making them barely noticeable.

## Stainless steel and PVC return inlets & suction inlets

Options material : stainless steel or PVC.

Options recessed : Recessed in wall (flush) or wall-mounted.

# Choose from various lamp brands, models and ways to fit them nicely.

The small models like this EVA SubAqua XS are very suitable for placing near or in a staircase or bench.  
For a sleek finish, we recommend the 'recessed' installation method (front of lamp is flush with the wall).

**EVA SubAqua 25W**  
Without luminaire or with luminaire  
(coloured stainless steel / ABS)

Recessed (in-wall) or wall-mounted  
Warm white, bright white, RGBW

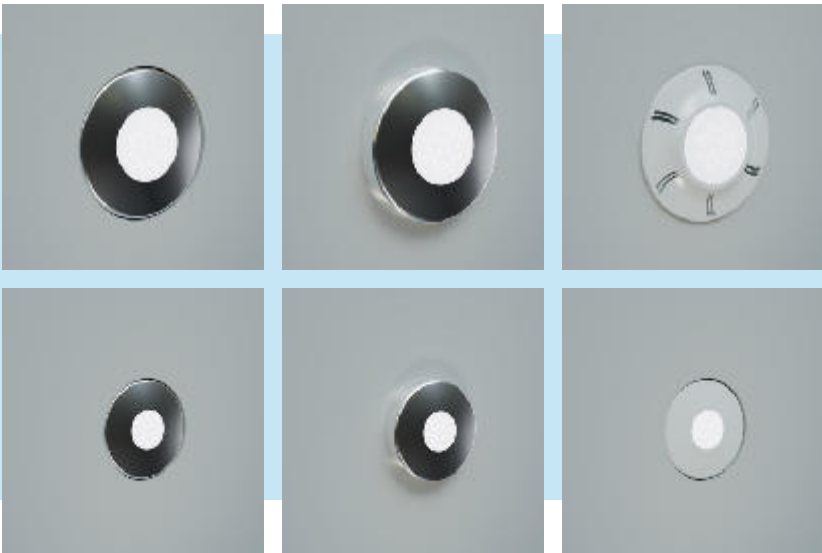

**EVA SubAqua XS 10W**  
Without luminaire or with luminaire  
(coloured stainless steel / ABS)

Recessed (in-wall) or wall-mounted  
Warm white, bright white, RGBW

**Adagio Pro PLP 100**  
With stainless steel / PVC luminaire in colour  
Recessed (in-wall) or wall-mounted  
Warm white, bright white, RGBW

**Adagio Pro PLP50**  
With stainless steel / PVC luminaire in colour  
Recessed (in-wall) or wall-mounted  
Warm white, bright white, RGBW

In a wellness pool, you mainly want to sit or lie down comfortably.

Be inspired by the sample models. Ask your installer about the possibilities and design the ideal shape and size together.

Combination of sitting and lying down.

Bench straight for 1 - 4 persons, shown with sloping backrest

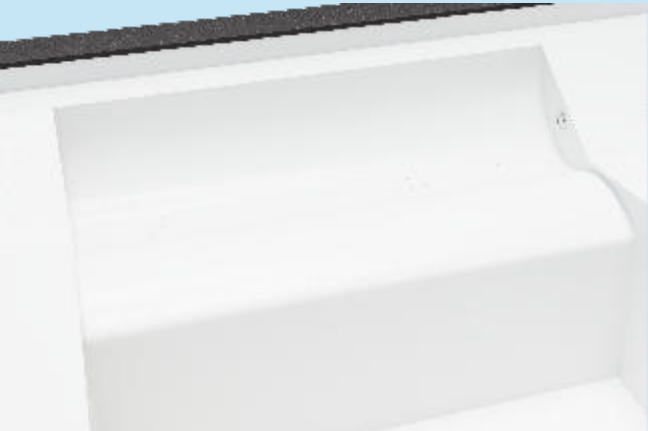

Bench L-shape for 3 persons, shown with sloping backrest

Lounge bed V-shape for 1 person

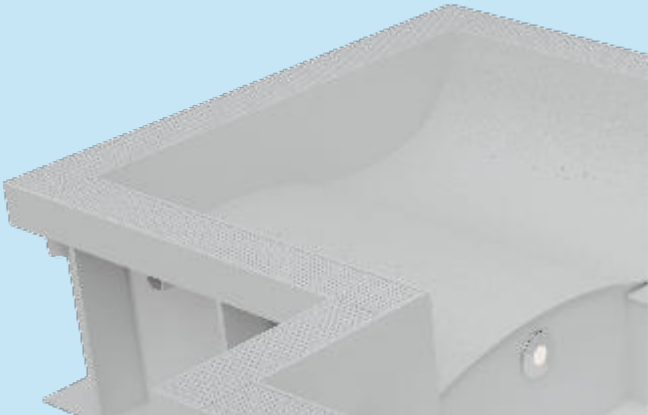

Wellness bench round for 1 - 3 persons

Bench straight for 1 - 4 persons

Wellness bed round for 2 persons

Water massage jets, hydromassage jets and bubble zones are essential in a wellness pool. You choose which ones, where and how many.

Carropools PP water massage jets in backrest. In various sizes, fixed in the wall or removable. Always 100% colour identical. The installer installs a pump in the plant room\*.

Fluvo hydromassage jets with PP cover plate in the backrest. A perfect mix of water and air. 100% colour identical (or in stainless steel). The installer installs a Fluvo pump in the plant room\*.

Carropools PP bubble zones for 1 to 4 persons in seat (or back). Always 100% colour identical. The installer places an air blower in the plant room\*.

\* In a Carropools wellness pool, filtration technology, heating, control and electrics are installed by a professional installer in a separate plant room.

# Installation options and extras.

A Carropools wellness pool can be placed outdoors or indoors. You also have the flexibility to place the wellness pool in the ground or above ground (freestanding).

Your wellness installer will advise you on the additional technology required, which is usually placed in a separate plant room (just like in swimming pools). Together with your installer, you also design the exterior finishes such as tiling (installation by installer).

Enjoy your wellness pool all year round.  
Start with a design and ask your installer about the possibilities.

The background is a solid teal color with a pattern of wavy, concentric lines that resemble ripples in water. The lines are darker teal and flow from the top left towards the bottom right, creating a sense of movement. The text 'SWIMMING PONDS' is centered horizontally and vertically in a white, sans-serif font.

SWIMMING PONDS

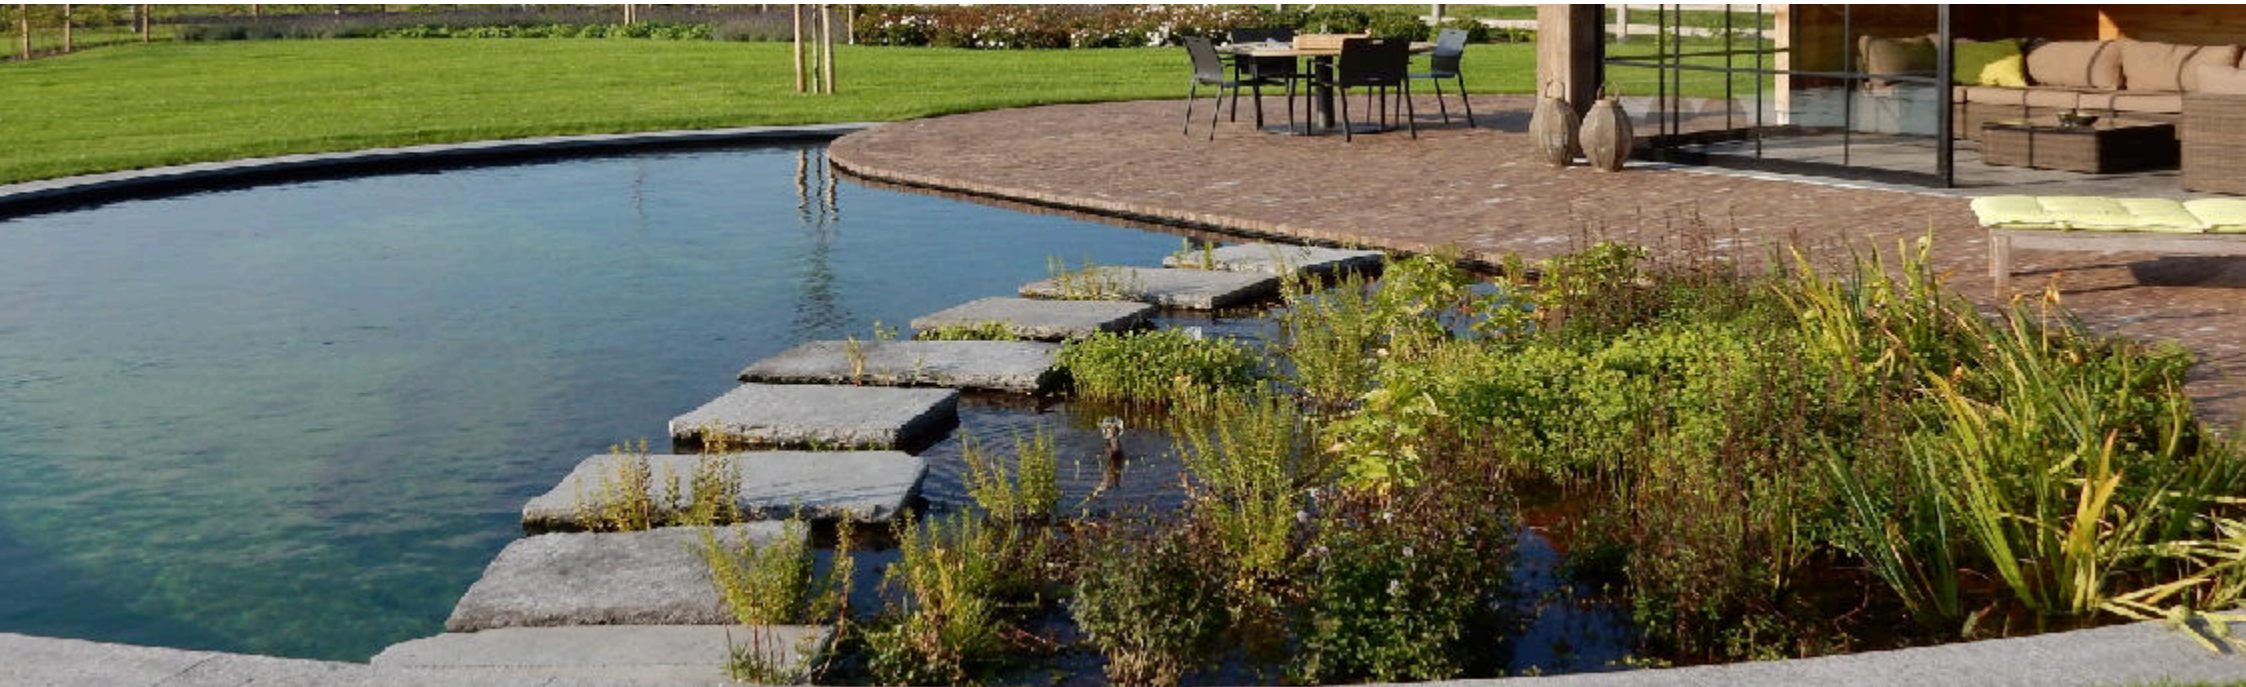

# Custom-made swimming ponds

Carropools custom-made swimming ponds are a bespoke solution that saves a lot of work for those building their own pond. The black and anthracite PP plastic materials are ideal for making any shape. The size and shape of swimming and plant areas are fully customisable to your needs and requirements.

Moreover, biofilm hardly adheres to the smooth walls and the dark colour helps to heat the pond naturally.

- » Always 100% tailor-made
- » Up to 5 m in width and 30 m in length
- » Available configurations / price ranges : exclusive and silver line.
- » Can be equipped with upflow or downflow plant zone or with skimmer.
- » All possible forms.
- » Optionally available with automatic slatted cover on the swimming area.

*\* In its country and region, the dealer determines the selling price to you, the customer. Carropools offers the configuration options and price ranges to provide 100% customised pools, wellness pools and swimming ponds in all market segments and for every budget.*

Ready to  
enjoy.

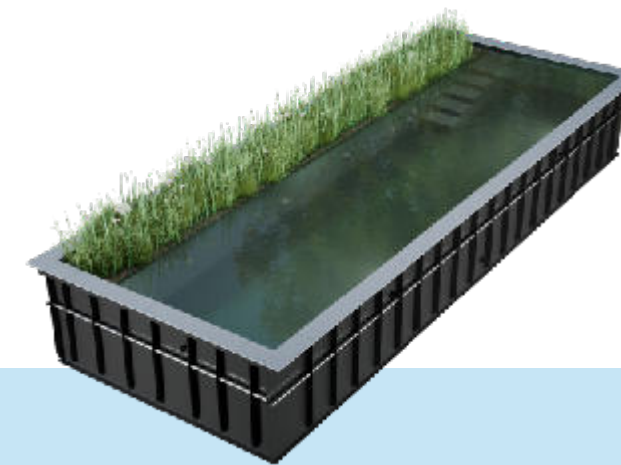

## In all shapes and sizes.

Carropools swimming ponds are custom-made. We use unique materials, design, cutting and welding techniques that allow us to customise the shape, size and functions to the inch for you.

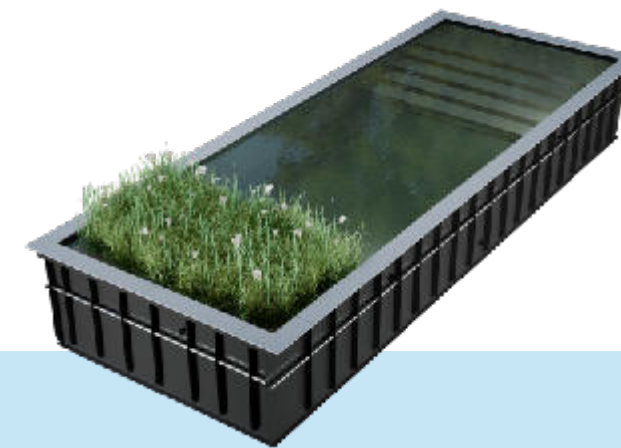

» We show some of the shapes you can choose as a base and then customise and dress up further.

» The depth of the swimming pond can be adjusted. Different depths (uneven floor) are also possible.

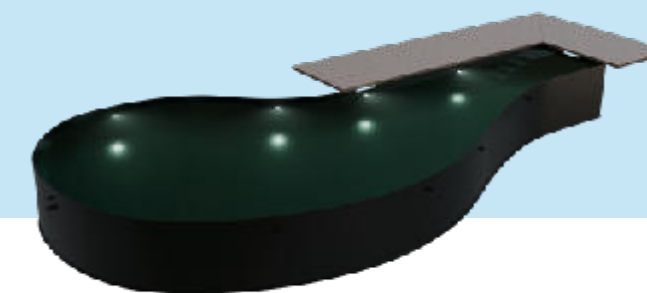

Rectangle - plant zone long side

Rectangle - plant zone short side

Round - plant zone

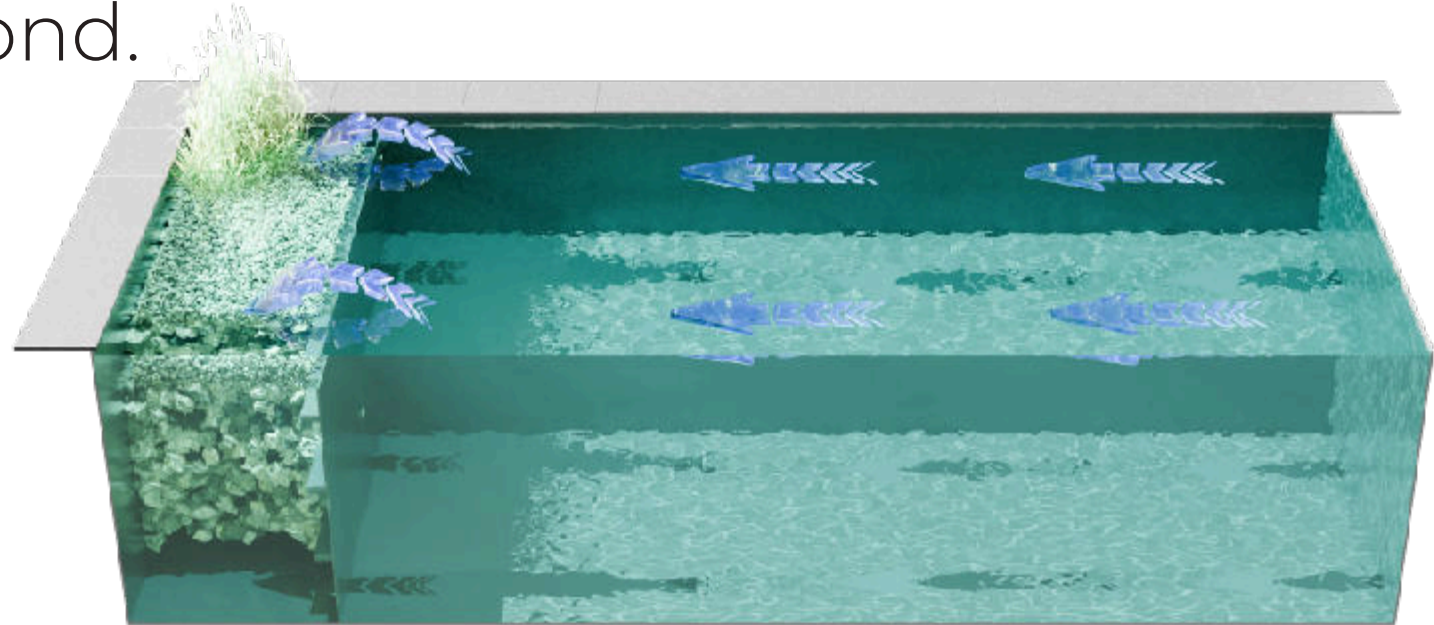

Droplet shape - with skimmers

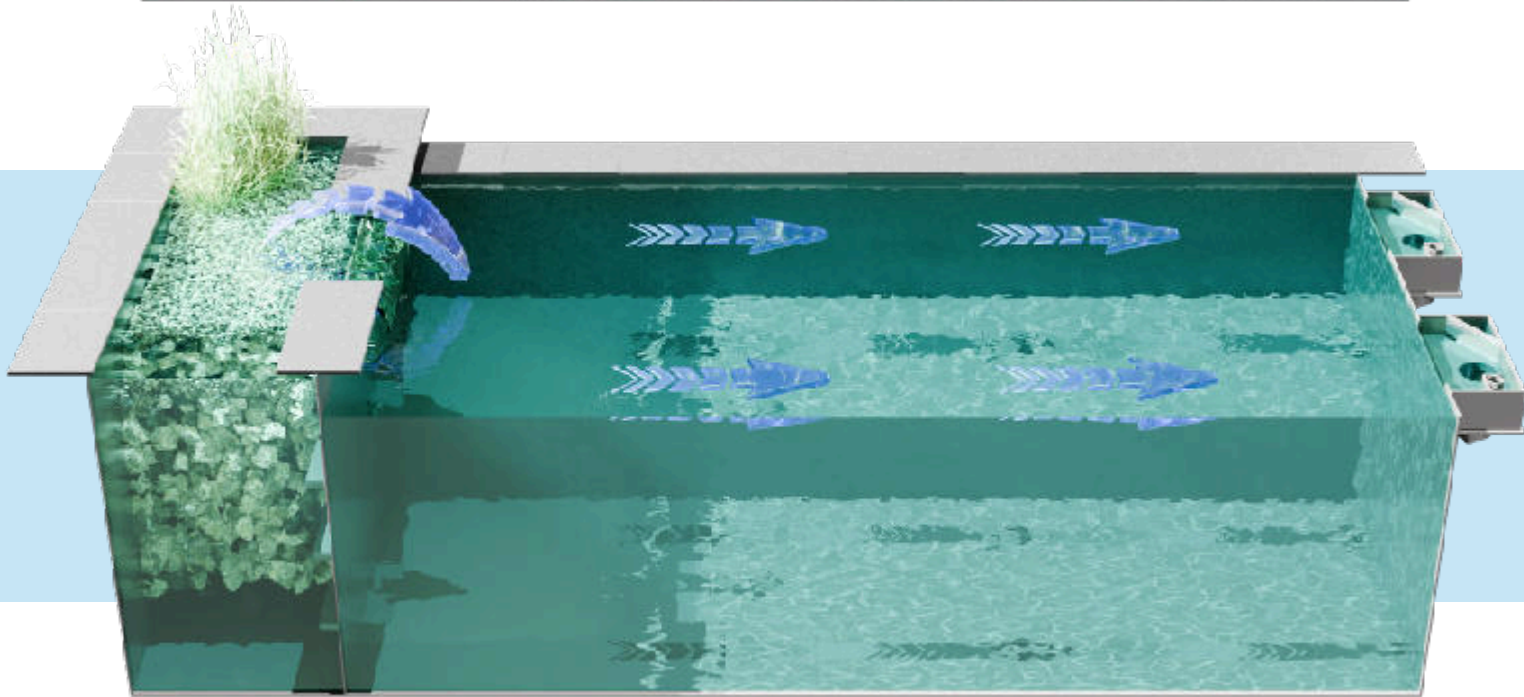

# Downflow and upflow explained in a Carropools swimming pond.

Carropools will create a basin with a swimming zone and plant zone at the wish and specification of your swimming pond specialist. All adjustments and lead-throughs can be made so that the basin fits perfectly with the specialist's techniques.

**Downflow :** The water flows from the swimming zone into the plant zone, where it is biologically purified by the plants and a layer of substrate.

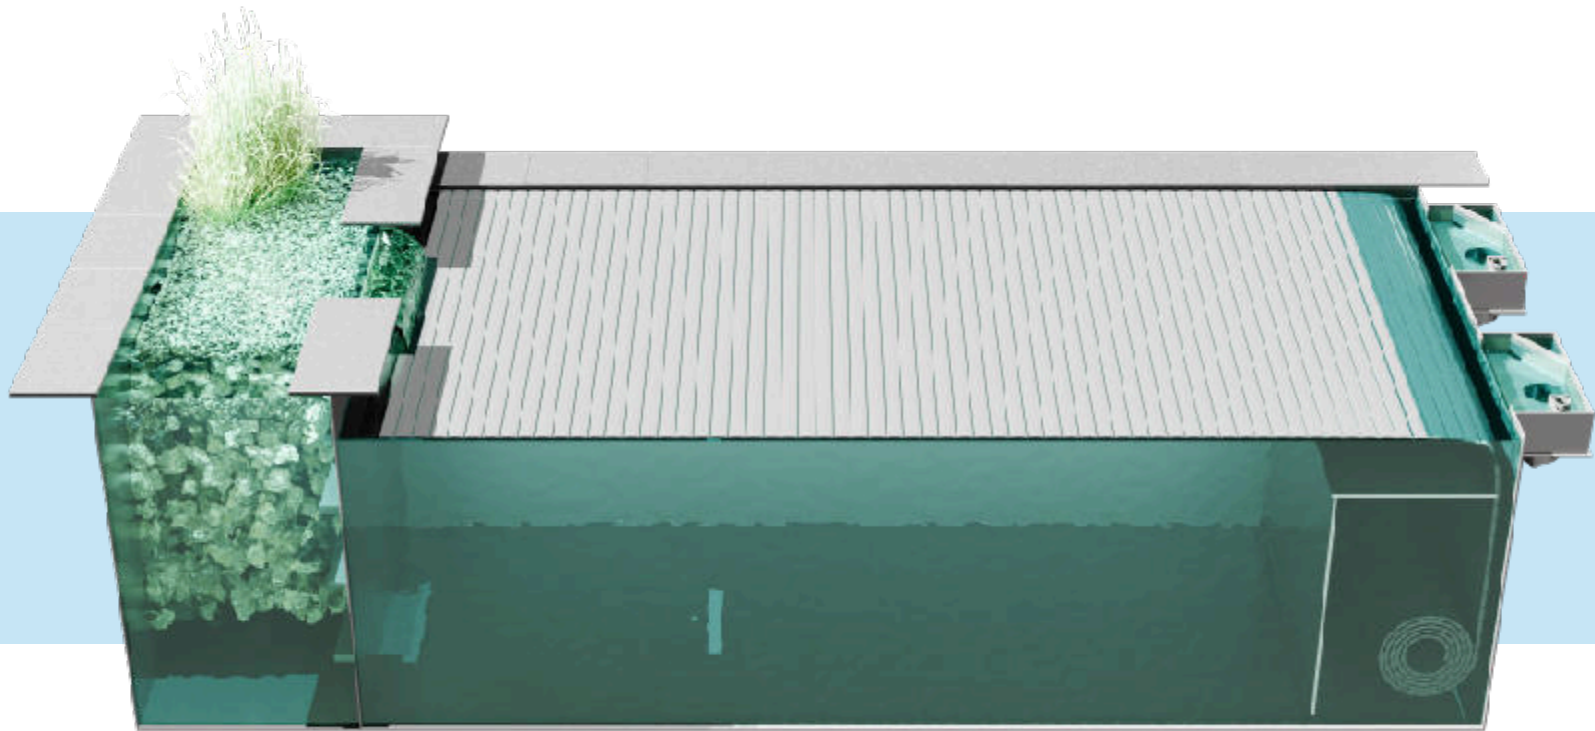

**Upflow :** The water in the plant zone moves up through the lava layer and flows from the plant zone into the swimming zone. Chosen when pollution is expected (e.g. leaves from trees).

# An automatic roller cover can also be installed in a swimming pond.

Consult with your swimming pond specialist what exactly is desired in terms of UV incidence and water temperature management (where a roller cover plays an important role). The appearance of the roller cover can be adapted to your needs in terms of colour. Anti-algae is an interesting option to consider.

- » The slats we recommend are made of PolyCarbonate.
- » The colour of the slats can be adjusted so that the look of your cover perfectly matches the style of your pond, house and garden.
- » Carropools pays extra attention to the edge and margin finishing so that the cover matches the wall of the swimming pond.

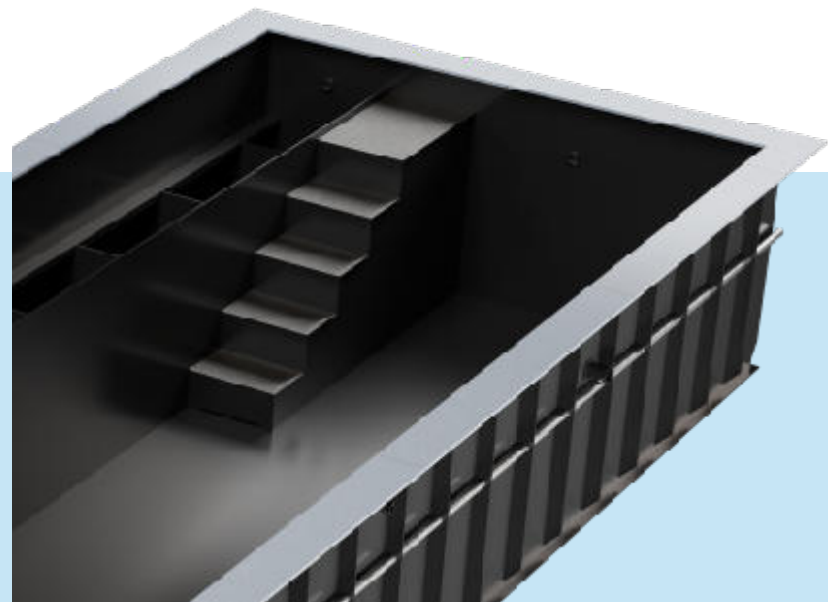

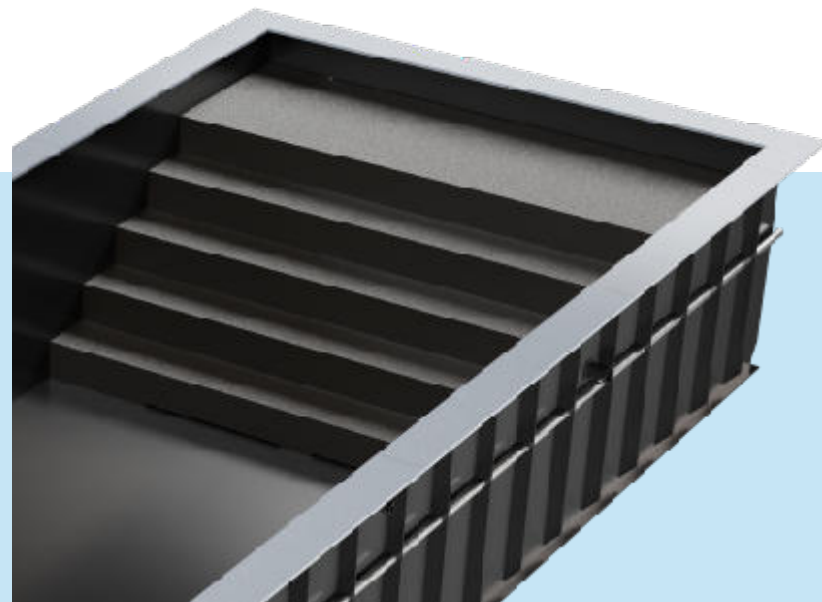

# Choose or design a staircase model.

More can be done than you think. Every sample model can be adapted to your wishes. You design, we deliver.

Structa

Completo

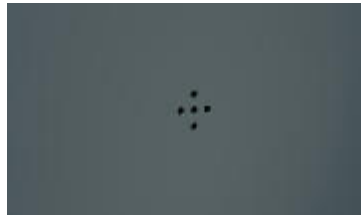

Return inlets and suction inlets are minimalist and unobtrusive.

Carropools PP return inlets & suction inlets

In your swimming pond, you can hardly see the built-in parts because of their dark colour.

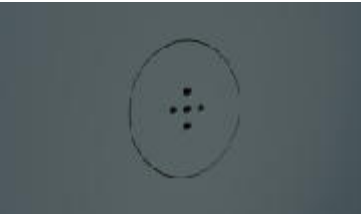

We recommend the minimalist design of the PP return inlets in anthracite and black (to be used on straight walls) or the simpler PVC Return inlets (black)

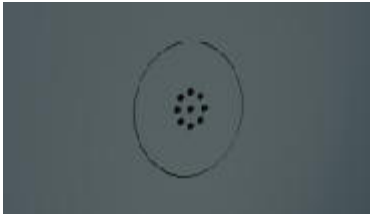

5 holes - 7.5 mm non-removable

9 holes - 7.5 mm non-removable

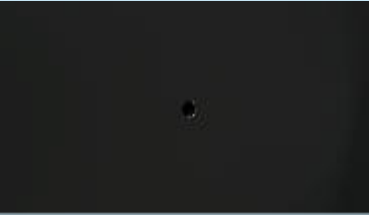

5 holes - 7.5 mm removable

9 holes - 7.5 mm removable

The colour and material of the built-in parts are 100% identical to the walls of your wellness pool, so they do not stand out.

PVC return inlets & suction inlets

Recessed into the wall or wall-mounted. In case of round walls, only on-wall mounting is possible.

The most commonly used lamps in swimming ponds are effective and simple.

Adagio Pro PLP 100  
With coloured PVC fittings  
Recessed (in-wall) or wall-mounted  
Bright white

Because of the dark floor and walls, warm white and RGBW bulbs will emit little light. Therefore, bright white is recommended.

Adagio Pro PLP 50  
With coloured PVC fittings  
Recessed (in-wall) or wall-mounted  
Bright white

If you would like a different lamp version instead of the black PVC fittings, you can always request this.
