Exhibit Prospectus and Sponsorship Opportunities

Welcome Message

Dear Industry Colleagues,

On behalf of the symposium committee, it is with great pleasure that we invite you to the inaugural **SPE Asia Pacific Hydrogen Symposium** to be held from **19–20 September 2023** in **Perth, Australia**.

The world finds itself battling global challenges and needs to find solutions to maintain energy affordability and security. Hydrogen has good potential as one of the energy solutions to close this gap and provide low carbon energy that is affordable and secure.

The industry is pushing ahead with plans to develop commercial scaled hydrogen infrastructures to solidify hydrogen production and meet future global demands. Many other questions linger and need to be solved as well, such as; trade market, production costs, infrastructure, transport and more. Investments into technology and infrastructure will provide a pathway for hydrogen to realise its potential.

The SPE inaugural symposium on hydrogen will bring together industry and business leaders, and subject matter experts to share up-to-date insights, best practices, strategic developments and technological advancements. In this symposium, attendees will hear and participate in both strategic and technical discussions. The symposium will also provide ample opportunities for attendees to network with their like-minded peers.

We invite sponsors, exhibitors and participants to join us at the SPE Asia Pacific Hydrogen Symposium. See you in Perth, Australia.

About the Symposium

McKinsey & Company had indicated in the Global Energy Perspective 2022 report that; “Hydrogen demand is projected to grow fivefold by 2050, driven primarily by road transport, maritime, and aviation, while its supply is expected to shift from nearly 100% grey hydrogen to 95% clean production by 2050, as costs decline and policymakers support hydrogen technology adoption”. As the demand for hydrogen grows, the energy industry will need to move in tandem; ensuring supply, capabilities, technology and infrastructure are available to meet those needs.
