

WELCOME MESSAGE

Dear Industry Colleagues,

We invite you to participate in the **Asia Pacific CCUS Conference and Exhibition (APCC) 2025**, scheduled to be held from **26 – 27 August 2025** in **Kuala Lumpur, Malaysia**.

CCS/CCUS technologies have emerged as essential solutions for reducing greenhouse gas emissions, especially in the rapidly industrialising and urbanising Asia Pacific region. While challenges exist, they present exciting opportunities for growth and collaboration. Addressing the upfront investment needed for CCS/CCUS infrastructure—including cutting-edge capture technologies and storage facilities—can pave the way for transformative advancements.

Additionally, the diversity in regulatory frameworks governing CCS/CCUS projects across countries presents a unique opportunity for innovation and collaboration. By working together, regulators, investors and project developers can explore new avenues for partnership and growth, ultimately fostering a more dynamic and supportive landscape for these essential technologies.

Themed **“Commitment to Action: Unlocking the Full Potential of CCUS”**, this conference will encompass the entire CCS/CCUS value chain, addressing efforts and solutions across industries. Emphasis will be placed on both upstream and midstream sectors to uncover opportunities and tackle challenges in developing capture sites, establishing efficient transportation and pipeline infrastructure, designing hubs, and creating networks for the effective deployment of CCS/CCUS.

Meanwhile, the exhibition will feature companies and service providers showcasing their latest technologies and capabilities, demonstrating the industry’s dedication to adopting technologies and scalable solutions with a focus on sustainability and emissions reduction.

Your participation will contribute to the conversations that will shape the future of the energy sector.

We look forward to welcoming you to APCC 2025 in Kuala Lumpur!

Conference Chair

Emry Hisham Yusoff
Head

(formerly known as JX Nippon Oil & Gas Exploration (Malaysia) Limited)

Platinum Sponsor

Gold Sponsor
Conference Notebooks & Pens Sponsor

The Region's Leading CCUS Event

Asia Pacific CCUS Conference and Exhibition (APCC) 2025 - a pivotal platform for fostering the region's pursuit of cutting-edge CCS/CCUS technologies, commercial objectives and hub ambitions.

500+
participants from
20+ countries

50+
industry and subject
matter experts

13+ hours
of engaging plenary, panel,
technical, and ePoster sessions

6+ hours
of targeted networking
opportunities

Cutting-edge
technologies, services and
solutions

APCC 2025 will provide a platform for the community to exchange knowledge, foster collaborative partnerships, and serve as a catalyst for the region's ongoing efforts in implementing scalable CCS/CCUS technologies to meet economic and climate goals.

The Society of Petroleum Engineers (SPE) is a not-for-profit organisation dedicated to advancing the oil, gas and energy industry.

Sponsoring or exhibiting at an SPE event helps fund vital industry programmes. Your support reinvests in initiatives such as the Energy4me® education programme, scholarships, and the Distinguished Lecturer series, driving professional growth and advancing the energy sector.

Explore

new frontiers in the CCS/CCUS value chain leveraging innovative research, project development, case studies, and lessons learnt.

Gain inspiration

from thought leaders and decision-makers who are driving the strategic development of CCS/CCUS in the region.

Foster

collaborative partnerships to advance R&D investments and shape a sustainable energy future.

Gain insights

into state-of-the-art technologies and scalable solutions with a focus on sustainability and emissions reduction.

Network

and exchange diverse perspectives with peers and experts.

Schedule of Events

Monday, 25 August 2025

1200 – 1730 hours	Registration	Registration Counter, Conference Hall 1, Level 3
1200 – 1730 hours	Conference Headquarters and Speaker/Author Check-In	Meeting Room 302, Level 3
1200 – 1800 hours	Exhibition Move-In	Conference Halls 2-3, Level 3

Tuesday, 26 August 2025

0730-1830 hours	Registration	Registration Counter, Conference Hall 1, Level 3
0730-1830 hours	Conference Headquarters and Speaker/Author Check-In	Meeting Room 302, Level 3
0900-1000 hours	Opening and Keynote Session	Conference Hall 1, Level 3
0900-1830 hours	Exhibition	Conference Halls 2-3, Level 3
1000-1030 hours	Coffee Break	Conference Halls 2-3, Level 3
1030-1200 hours	Executive Plenary Session: Commitment to Action: Unlocking the Full Potential of CCUS	Conference Hall 1, Level 3
1200-1400 hours	Networking Luncheon	Conference Halls 2-3, Level 3
1300-1330 hours	Knowledge Sharing ePoster Session 1	Conference Halls 2-3, Level 3
1400-1530 hours	Panel Session 1: Building the CCS Backbone: CO2 Transportation and Infrastructure	Conference Hall 1, Level 3
1400-1530 hours	Technical Session 1: CCS/CCUS Policy, Commercialisation, and Project Financing	Meeting Room 306, Level 3
1400-1530 hours	Technical Session 2: Unlocking CO2 Storage Potential in Geological Formations	Meeting Room 305, Level 3
1400-1530 hours	Technical Session 3: Addressing CCS Well Integrity Risks	Meeting Room 304, Level 3
1530-1600 hours	Coffee Break	Conference Halls 2-3, Level 3
1530-1600 hours	Knowledge Sharing ePoster Session 2	Conference Halls 2-3, Level 3
1600-1730 hours	Panel Session 2: Financial Pathways and Carbon Credits: Unlocking CCUS Market Volumes	Conference Hall 1, Level 3
1600-1730 hours	Technical Session 4: Innovations in CO2 Capture and Transportation: Enhancing Efficiency and Scalability	Meeting Room 306, Level 3
1600-1730 hours	Technical Session 5: Injection Strategies and Risk Management	Meeting Room 305, Level 3
1600-1730 hours	Technical Session 6: Innovations in CCUS Well Design	Meeting Room 304, Level 3
1730-1830 hours	Welcome Reception	Conference Halls 2-3, Level 3

Wednesday, 27 August 2025

0800-1730 hours	Registration	Registration Counter, Conference Hall 1, Level 3
0800-1730 hours	Conference Headquarters and Speaker/Author Check-In	Meeting Room 302, Level 3
0900-1030 hours	Panel Session 3: Managing CCUS: Risk and Liabilities	Conference Hall 1, Level 3
0900-1030 hours	Technical Session 7: CCS/CCUS and EOR/EGR I	Meeting Room 306, Level 3
0900-1030 hours	Technical Session 8: Enhancing CCUS Well Performance through Design, Barriers, and Materials	Meeting Room 305, Level 3
0900-1730 hours	Exhibition	Conference Halls 2-3, Level 3
1030-1100 hours	Coffee Break	Conference Halls 2-3, Level 3
1030-1100 hours	Knowledge Sharing ePoster Session 3	Conference Halls 2-3, Level 3
1100-1230 hours	Panel Session 4: Harmonising Policy, Public Acceptance and Regional Synergy: Advancing CCUS for Global Impact	Conference Hall 1, Level 3
1100-1230 hours	Technical Session 9: CCS/CCUS and EOR/EGR II	Meeting Room 306, Level 3
1100-1230 hours	Technical Session 10: Ensuring Integrity: MMV Strategies for CCS Operations	Meeting Room 305, Level 3
1230-1400 hours	Networking Luncheon	Conference Halls 2-3, Level 3
1315-1345 hours	Knowledge Sharing ePoster Session 4	Conference Halls 2-3, Level 3
1400-1530 hours	Panel Session 5: Technologies, Digitalisation and Utilisation	Conference Hall 1, Level 3
1400-1530 hours	Technical Session 11: Integrated CCS/CCUS Projects	Meeting Room 306, Level 3
1400-1530 hours	Technical Session 12: Safeguarding CCS: Containment Risks Management	Meeting Room 305, Level 3
1530-1600 hours	Coffee Break	Conference Halls 2-3, Level 3
1530-1600 hours	Knowledge Sharing ePoster Session 5	Conference Halls 2-3, Level 3
1600-1730 hours	Technical Session 13: Collaboration and Integration in CCUS Projects Implementation	Conference Hall 1, Level 3
1600-1730 hours	Technical Session 14: CCUS Technologies and Strategies	Meeting Room 306, Level 3
1600-1730 hours	Technical Session 15: Decarbonisation Strategies: Effective Carbon and Methane Management	Meeting Room 305, Level 3

Executive Plenary Session

Commitment to Action: Unlocking the Full Potential of CCUS

Tuesday, 26 August 2025 | 1030 – 1200 hours | Conference Hall 1, Level 3

As the energy industry navigates the transition towards a low-carbon future, carbon capture, utilisation, and storage (CCUS) remain a pivotal solution for balancing sustainability with energy security. With global net-zero ambitions gaining momentum, CCUS provides the industry with a viable pathway to decarbonise operations while ensuring reliable energy production. However, unlocking its full potential requires addressing persistent challenges, including high capital costs, infrastructure development, regulatory complexities, and cross-sector collaboration.

This Executive Plenary session will convene energy leaders, policymakers, and key industry stakeholders to discuss the critical enablers for scaling up CCUS deployment. Discussions will focus on strategies to accelerate investment, strengthen regulatory frameworks, and advance infrastructure development to drive large-scale adoption. The session will also highlight successful case studies, innovative business models, and policy incentives that can mitigate risks and unlock new opportunities across the CCUS value chain.

Stephen Stokes
Global Head of CO2
Transport and Storage
Wood PLC

To ensure the safe transport of CO2 across the CCS value chain, the right infrastructure must be in place. For cross-border CO2 transport, this includes capture facilities, processing units, export and import terminals, transport networks (including shipping, pipelines and rail), intermittent storage sites, and injection facilities.

This panel session will provide key insights, lessons learnt, and solutions for establishing the backbone of successful CCS projects. It will explore critical design considerations, including CO2 specifications, operating pressure envelopes, multi-emitter CCS hub models, and the importance of effective interfaces and seamless integration across the value chain.

What are the key considerations for CO2 transport? How can existing infrastructure be repurposed? And what unique factors shape APAC's model of cross-border CCS hubs? This session will take a deep dive into the complexities of CO2 transportation and the essential infrastructure required to support it.

Advisory, Baker Hughes**

Katarina Van Der Haar
CCS Engagement Lead
Wood PLC

CCUS is widely recognised as essential for achieving net zero and features prominently in many countries' long-term decarbonisation strategies. While climate change policies are advancing rapidly and supporting the development of CCUS projects, robust business models and financing mechanisms must evolve to unlock the market volumes required to meet net zero ambitions.

This session will bring together representatives from the energy industry, governments, financial institutions and advisory firms for an in-depth exploration of the commercial support mechanisms driving CCUS deployment.

With carbon pricing, government grants, and green premiums all playing a role, it is imperative for CCUS stakeholders to collaborate in developing fit-for-purpose financial frameworks.

Focusing on what is arguably the final and most critical piece of the CCUS value chain—commercial viability and bankability, this session will provide valuable insights into unlocking investment and scaling up CCUS projects.

Panel Sessions

Panel Session 3: Managing CCUS: Risk and Liabilities

Wednesday, 27 August 2025 | 0900 - 1030 hours | Conference Hall 1, Level 3

Speakers

Vipul Shetty
Director

Lead Advisor Reservoir
Engineering
PTT Exploration & Production PLC

Understanding and managing risks in CCUS are crucial to unlocking financial returns on investment. The risks involved extend beyond the technical aspects of capture, transport, storage and containment to include environmental, scheduling, financial, and liability concerns, amongst others. Undefined liabilities or poorly assessed exposures can deter potential investment in CCUS.

Without clear regulations and policies, investors are unlikely to commit significant capital to CCUS projects or may delay those already in development. Establishing robust international and local regulations, alongside addressing operational and financial challenges, is essential to ensuring that operators can effectively manage long-term capture, transport, and storage liability risks.

This session will explore global approaches to managing CCUS risks and liabilities. The panel will share insights and strategies for mitigating long-term storage liabilities and fostering investor confidence, ultimately paving the way for the successful development and execution of CCUS projects.

Panel Sessions

Panel Session 4: Harmonising Policy, Public Acceptance and Regional Synergy: Advancing CCUS for Global Impact

Wednesday, 27 August 2025 | 1100 - 1230 hours | Conference Hall 1, Level 3

The Asia Pacific region is emerging as a pivotal player in CCUS. However, the world will not achieve its decarbonisation targets unless this region makes a meaningful contribution to the global need for CO₂ sequestration to reach net zero by 2050. Unlike more established regions such as Europe and the US, Asia Pacific faces distinct technical and non-technical challenges. Policy frameworks and regulations are either immature and untested or struggling to address the unforeseen complexities of CCUS. Additionally, the incentives that have successfully driven first-of-a-kind project development in Western countries may be difficult to replicate on a regional scale in the East. This session will compare Australia, Indonesia and Malaysia, each endowed with world-class geological storage capacity, and contrast them to identify the constraints that might impede project development and the rate of growth in the sector that is needed to achieve net zero.

The panel will also consider how countries in the region can collaborate to maximise the potential of CCUS. What lessons can be drawn from Europe and the US to stimulate sustainable economic growth in Asia Pacific? Are there innovative approaches to risk-sharing at both government-to-government and business-to-business levels? What competitive advantages does the region hold, and how can these be leveraged to enhance the viability of CCUS?

Panel Sessions

Panel Session 5: Technologies, Digitalisation and Utilisation

Technologies and digitalisation are integral to the successful implementation and long-term viability of CCUS projects. This panel session will delve into applied digital technologies, focusing on utilisation and injection, project end of life, and monitoring.

The utilisation and injection phases involve transporting captured CO₂ to a storage site and either using the captured CO₂ as an input to create products/services or injecting it into deep geological formations. Technologies used in this phase include pipelines, which are the most common method for transporting CO₂, designed to handle high pressures and prevent leaks. Compression systems are also essential, as CO₂ is compressed to a supercritical state, making it easier to inject into storage sites. CO₂ is today primarily used in the fertiliser industry and for enhanced oil recovery. New uses such as producing CO₂-based synthetic fuels, chemicals and building aggregates are gaining momentum. For CO₂ storage, specialised injection wells are drilled into suitable geological formations, such as depleted oil and gas fields or deep saline aquifers.

Digitalisation plays a pivotal role in enhancing the efficiency and safety of CCUS projects. Real-time monitoring systems, equipped with sensors and IoT (Internet of Things) devices, provide continuous data on pressure, temperature, and CO₂ flow rates, ensuring safe and efficient injections. Simulation and modelling tools are used to simulate CO₂ behaviour in geological formations, helping to optimise injection strategies and predict long-term storage performance. Additionally, data analytics and AI are employed to analyse vast amounts of data, identifying patterns, predicting potential issues, and improving decision-making processes.

At the end of a CCUS project's operational phase, ensuring the long-term integrity of the storage site is critical. This involves site closure and sealing, where injection wells are sealed with materials like cement to prevent CO₂ leakage, and the site is decommissioned according to regulatory standards. Post-closure monitoring is essential to verify that CO₂ remains securely stored. Techniques used in this phase include seismic surveys to detect changes in the geological structure, groundwater sampling to ensure no CO₂ contamination in nearby water sources, and surface monitoring to track any potential CO₂ leaks at the surface.

From efficient CO₂ utilisation and injection to rigorous end-of-life monitoring, these digital advancements ensure that CCUS remains a key tool in the fight against climate change.

Technical and Knowledge Sharing ePoster Sessions

More than 130 technical presentations will be presented across a vast variety of technical topics at the Technical and Knowledge Sharing ePoster Sessions.

Technical Sessions include:

- Carbon Markets, Pricing, and Credits
- CCS/CCUS and EOR/EGR
- CCS/CCUS Commercialisation and Project Financing
- CCS/CCUS Wells Design and Management
- CO2 Capture and Transportation
- CO2 Utilisation
- Contaminant Management
- Emissions Reduction: Carbon and Methane Management
- Geological Storage Development
- Injection Strategies and Risk Management
- Integrated CCS/CCUS MMV (Measurement, Monitoring and Verification) Strategies
- Integrated CCS/CCUS Projects
- Leakages and Integrity
- Policy and Regulations
- R&D, Innovation and New Technologies

Sponsorship Opportunities

Sponsorship opportunities for the Asia Pacific CCUS Conference and Exhibition are designed to offer maximum exposure and visibility for organisations. For a cost-effective method to strengthen your brand identity and enhance your company's image at the conference, we offer a variety of sponsorship items.

We appreciate your generous support and request that you confirm your preferred sponsorship package as soon as possible. Sponsorship items are limited and available on a first-come first-served basis.

Sponsorship Category	Early Bird by 27 January 2025	Standard Rate after 27 January 2025
Principal Sponsor	USD 30,000	USD 35,000
Platinum Sponsor	USD 20,000	USD 23,000
Gold Sponsor	USD 15,000	USD 18,000
Lanyards	USD 9,000	USD 10,000
Conference Bags	USD 8,000	USD 9,000
Networking Luncheon and Coffee Breaks – Day 1 (26 August)	USD 8,000	USD 8,500

General Information

Venue

Kuala Lumpur Convention Centre

Kuala Lumpur City Centre, 50088 Kuala Lumpur Malaysia

Tel: +603 2333 2888

Website: www.klccconventioncentre.com

Airport

Attendees arrive in Kuala Lumpur International Airport (KLIA), it's approximately 45 minutes by car from Kuala Lumpur Convention Centre (KLCC). Event attendees may arrange for ground transfers with their selected hotels or secure a taxi at the arrival hall.

Badge Collection

Event badges can be collected during the event at the venue. Badges are required for admission into the event and must be worn at all times during event days.

Photography and Audio Visual Copyright

All conference sessions and the exhibition/technical showcase are protected by international copyright laws.

Photography and video/audio recording of any kind in conference sessions and the exhibition are prohibited without prior written permission by SPE.

Visa

Event attendees travelling to Malaysia must be in possession of passports valid for more than six (6) months on arrival. It is the sole responsibility of the participants to obtain the necessary paperwork for entry to Malaysia. Please contact the nearest Malaysian Embassies, High Commissions or Consulates to verify your visa requirements.

An invitation letter to facilitate the application of visa will be issued to registered attendees if required. Download Invitation Letter Request Form [here](#). Complete and return the Invitation Letter Request Form to Faezah Saaban at email fsaabab@spe.org.

Please note that it is the sole responsibility of the attendee to obtain the necessary paperwork for entry into Australia. The invitation letter does not guarantee that you will be granted a visa.

The Society of Petroleum Engineers (SPE) is a not-for-profit organisation. Income from this event will be invested back into SPE to support many other Society programmes. When you attend, sponsor, or exhibit at an SPE event, you help provide even more opportunities for industry professionals to enhance their technical and professional competence. Scholarships, certification, the Distinguished Lecturer programme, and SPE's energy education programme Energy4me® are just a few examples of programmes supported by SPE.
