Symposium Preview

Message from the Symposium Co-Chairs

Dear Industry Colleagues,

On behalf of the Symposium Committee, it is with great pleasure that we invite you to the **SPE Symposium and Exhibition: Decommissioning and Abandonment**, scheduled to be held from **3 - 4 December 2024** in **Kuala Lumpur, Malaysia**.

Amidst the global transition towards cleaner energy, the reuse and repurposing of disused oil and gas infrastructure should be seriously considered as viable decommissioning options to promote sustainability and cost-efficiency.

Although the challenges of decommissioning and abandonment are formidable, adopting a holistic, sustainable, and collaborative approach enables us to envision and create a future where trust, credibility, and a sense of responsibility to the environment take centre stage.

These endeavours are typically costly and lack revenue generation, yet they are vital for mitigating safety and environmental risks. Emerging trends and technologies are applied to optimise costs, manage risks, and ensure regulatory compliance.

Topics and discussions at the symposium will encompass policies, regulations, offshore and onshore decommissioning, cost optimisation, lessons learnt and best practices. Despite challenges, collaborative efforts have the potential to spur innovation, promote sustainability, and drive responsible energy practices in Asia Pacific and globally.

We welcome and encourage the support and collaboration of our industry and its leaders to join us in showcasing your thought leadership, solutions, and services at the symposium. We eagerly anticipate your participation at the SPE Symposium and Exhibition on Decommissioning and Abandonment in Kuala Lumpur!

About the Symposium

The 6th edition of the SPE Symposium: Decommissioning and Abandonment is scheduled to be held on 3 – 4 December 2023 in Kuala Lumpur, Malaysia.

The symposium aims to support professionals and stakeholders in decommissioning and plugging and abandonment (P&A) projects.

Amidst the global shift towards cleaner energy, repurposing oil and gas infrastructure promotes sustainability and cost-efficiency. The challenges of decommissioning and abandonment are formidable, however by approaching them with a holistic, sustainable, and collaborative mindset, we can create a future where trust, credibility, and environmental responsibility take centre stage.

These endeavours are costly and traditionally lack revenue generation, but are vital for reducing health and environmental risks. Emerging trends and technologies are applied to optimise costs, manage risks, and ensure regulatory compliance.

Discussions at the symposium will cover policies, regulations, offshore and onshore decommissioning, cost optimisation, and best practices. Despite challenges, collaborative efforts can drive innovation, sustainability, and responsible energy practices in the Asia Pacific region and beyond.

Executive plenary and panel sessions by industry business leaders

300+ participants from **20+** countries

40+ industry and subject matter speakers and technical presentations

15+ hours of engaging plenary, panels, technical, and ePoster sessions

6+ hours of targeted networking breaks

Exhibit showcase of cutting-edge services and solutions

Create new network links among industry experts and professionals globally

Collaborate with industry players, regulators, research institutions, and NGOs to foster common goals through knowledge sharing

Communicate ideas, experiences, and technological innovations to streamline costs and enhance existing decommissioning and well P&A methodologies.

Join decision makers, business executives, technical professionals, and academia specialising in:

- Asset Management
- Civil and Environmental Engineering
- Cost Engineering and Estimation
- Decommissioning and Abandonment
- Drilling and Completions
- Front End Engineering and Development
- Health, Safety and Environment
- Offshore Facilities and Structural Management
- Operations Engineering
- Production Engineering
- Project Delivery
- Regulations and Policy
- Research and Academia
- Subsea and Subsurface Management
- Supply Chain
- Well Plug and Abandonment (P&A)
- Wells Fluid and Cementing
- Wells Management

REGISTRATION NOW OPEN

Register by **2 Oct 2024** to take advantage of the Super Early Bird offer. Group registration packages are also available – Register 5 people and pay for the price of 4.

Visit go.spe.org/25SM03S to register for the SPE Symposium and Exhibition: Decommissioning and Abandonment

Collaborative decommissioning in the oil and gas industry involves a wide range of stakeholders including governments, regulators, financiers, operators, industry players and environmental agencies that work together to find the optimal balance between technical feasibility, environmental impact, and social well-being.

Key focuses include environmental and biodiversity impact, waste management, regulatory compliance, technical feasibility, and social impact. Leveraging technology may lead to safer operations, enhanced efficiencies, and cost compression in decommissioning execution. While long-term planning integrates proactive stakeholder engagement and community involvement, fostering inclusive decision-making. From a regional perspective, cross-border collaborations and synergies will ensure continuous decommissioning campaigns that reduce competition for resources. A harmonised regional understanding and approach to decommissioning can also benefit all involved.

This session will feature senior industry leaders discussing critical aspects of responsibly managing assets during the decommissioning phase. Knowledge sharing and capacity building play pivotal roles in continuous improvement and readiness to address risks effectively. While a review of milestones achieved over the previous five editions of this symposium would enable celebrations of successes and solutioning of areas for improvement.

Panel Sessions

Panel Session 1: The Dynamics and Evolution of Policies and Regulations

Over the past 20 to 30 years, the policies and regulations governing decommissioning and abandonment (D&A) have undergone significant changes. As global energy landscapes evolve, governments and regulatory bodies are continually revisiting and reformulating frameworks to address the environmental, economic, and social impacts associated with D&A. Key drivers for these changes include the need to enhance safety standards, mitigate environmental risks, and manage liabilities.

This session will explore the dynamic evolution of decommissioning policies and regulations, with a focus on trends towards sustainability and responsible resource management. It will examine the integration of advanced technologies and innovative practices aimed at streamlining decommissioning processes while minimising environmental impacts (or even resulting in a net positive impact to the environment). Additionally, the session will highlight the importance of collaboration and regulatory alignment in fostering efficient and transparent D&A strategies. Panellists will discuss diverse approaches and emerging best practices in D&A policies, concluding with insights into future directions and the industry's commitment to achieving operational excellence and environmental stewardship through adaptive policy frameworks.

Panel Sessions

Panel Session 2: Technology Implementation and Innovative Solutions for Cost Efficient Execution

Tuesday, 3 December 2024 | 1400-1530 hours | Grand Ballroom 2, Level 6A

Decommissioning of offshore oil and gas infrastructure presents a significant challenge that demands technological and innovative solutions. These solutions are crucial for enhancing cost efficient in decommissioning execution while upholding the highest standards of safety and environmental preservation.

Among the challenges faced in decommissioning execution are operational complexities and stringent regulatory demands. Addressing these challenges necessitates the integration of state-of-the-art technologies and innovative approaches within the industry. The adoption of such technologies is instrumental in driving significant enhancements in project timelines, cost compression, and ensuring strict adherence to regulatory requirements.

By harnessing technology and innovative solutions, the industry is expected to effectively manage the complexities of the decommissioning execution, while contributing positively to sustainable practices and achieving excellent project delivery.

In this panel session, industry experts will discuss the challenges and the implementation of technology and innovative solutions that facilitate decommissioning execution efficiency.

Panel Sessions

Panel Session 3: Talent Development and Capability Building in D&A

Wednesday, 4 December 2024 | 0900-1030hours | Grand Ballroom 2, Level 6A

Malaysia Assets, Upstream Business
PETRONAS Carigali Sdn Bhd

Talent development is critical for the future of oil and gas decommissioning and abandonment (D&A), inclusive of both wells plug and abandonment (P&A) and facilities decommissioning, to ensure ongoing expertise and capability across the industry. Strategies for building a workforce with the right skills to effectively manage complex D&A projects are essential for ensuring On-Time, On-Budget, On-Scope (OTOBOS) projects.

This session will explore training programmes, knowledge transfer initiatives, and partnerships between industry, academia and governments, aimed at enhancing capabilities in D&A planning, engineering, effective execution and regulatory compliance. Successful talent development models will be highlighted, emphasising the importance of continuous learning and professional development in addressing current and future D&A challenges. Creating a talent pool is essential to ensuring that the ecosystem for D&A is well maintained. Therefore, the right skill sets need to be identified and embedded in the education system as early as possible.

Panel Sessions

Panel Session 4: Environmental, Social, and Governance (ESG) Landscape in D&A

Wednesday, 4 December 2024 | 1100-1230hours | Grand Ballroom I, Level 6A

The ESG landscape in oil and gas decommissioning and abandonment (D&A) is continuously evolving. Recent developments in industry initiatives and regulatory frameworks aim to pursue sustainable development goals (SDGs), protect the environment, enhance community engagement, and promote ethical governance.

This panel session will address key topics such as the evolution of environmental impact assessments, contributions to socio-economies, and governance structures, including updates to multi-criteria decision analyses (MCDA) that prioritise transparency and accountability. It will explore innovative ESG strategies and their impacts on operational efficiency and stakeholder management. The session aims to provide perspectives on integrating contributions to SDGs and ESG principles into D&A strategies and execution.

Technical and Knowledge Sharing ePoster Sessions

More than 60 technical presentations will be presented across a vast variety of technical topics at the Technical and Knowledge Sharing ePoster Sessions.

Technical Sessions include:

- Asset Ownership Transition Policy and Challenges in D&A
- Attracting and Retaining Talent for the Decommissioning Ecosystem
- Decommissioning Alternatives and Innovations
- Dismantling and Disposal Challenges
- Facilities and Site Clearance Management
- Funding Strategy for Late Life Asset Management and Decommissioning
- Impacts of Delaying Decommissioning
- Lessons Learned and Best Practices for Facilities Decommissioning
- Lessons Learned and Best Practices for Wells P&A
- Managing Uncertainties in Projects
- Maturing Regional Resources
- Post-Decommissioning Monitoring
- Regulatory Challenges for Facilities Decommissioning and Wells P&A
- Sustainable Decommissioning, Circular Economy, and Environmental Best Practices
- The Evolution of Technology in Facilities Decommissioning and Wells P&A
- The Role of Decommissioning in Energy Transition
- Transitioning to Decommissioning

Sponsorship Opportunities

Sponsorship opportunities for the SPE Symposium and Exhibition: Decommissioning and Abandonment have been designed to provide exposure and visibility for organisations in the energy industry. We offer a variety of sponsorship packages to strengthen your brand identity and enhance your organisation's image at the symposium.

As sponsorship packages are limited and available on a first-come first-served basis, we appreciate your support and request that you confirm your preferred sponsorship packages as soon as possible.

Please contact **Jessica Lee**, Sales Manager at jeslee@spe.org for more information. Following is the list of available sponsorship packages:

Sponsorship Packages

Early Bird Rates - Deadline 26 August 2024

List of Packages	By 26 August	After 26 August
Principal Sponsor	USD 10,000	USD 11,500
Gold Sponsor (With 4 sqm Exhibit Showcase Display Kiosk)	USD 7,900	USD 8,200
Welcome Reception - Day 1 (3 December)	USD 7,500	USD 8,000
Lanyards	USD 7,000	USD 7,500
Symposium Bags	USD 7,000	USD 7,500
Directional Signage	USD 6,000	USD 6,500
Silver Sponsor (With 4 sqm Exhibit Showcase Display Kiosk)	USD 5,900	USD 6,200
Digital Symposium Preview and Mobile App	USD 5,500	USD 6,000
Networking Luncheon - Day 1 (3 December)	USD 5,500	USD 6,000
Networking Luncheon - Day 2 (4 December)	USD 5,500	USD 6,000
Symposium Water Bottles	SOLD	SOLD
Symposium Caps	USD 4,500	USD 5,000
Symposium Writing Pads and Pens	USD 4,500	USD 5,000
Daily Coffee Breaks	USD 4,000	USD 4,500
Symposium Bag Insertion	USD 3,500	USD 4,000

Airport

Kuala Lumpur International Airport (KLIA) and KLIA 2 is the main airport in Malaysia for many international and domestic destinations. It is approximately 50km from Kuala Lumpur with various options of transportation via airport/hotel limousine, taxis, buses. The most convenient way to travel into Kuala Lumpur is via the KLIA Express, which takes 28 minutes to reach Kuala Lumpur.

Badge Collection

Event badges can be collected during the event at the venue. Badges are required for admission into the event and must be worn at all times during event days.

Photography and Audio Visual Copyright

All symposium sessions and the exhibition/technical showcase are protected by international copyright laws.

Photography and video/audio recording of any kind in symposium sessions and the exhibition are prohibited without prior written permission by SPE.

The Society of Petroleum Engineers (SPE) is a not-for-profit organisation. Income from this event will be invested back into SPE to support many other Society programmes. When you attend, sponsor, or exhibit at an SPE event, you help provide even more opportunities for industry professionals to enhance their technical and professional competence. Scholarships, certification, the Distinguished Lecturer programme, and SPE's energy education programme Energy4me® are just a few examples of programmes supported by SPE.
