NAVIGATING THE CHANGING WORLD OF RESERVES AND RESOURCES IN THE CONTEXT OF THE PRMS

20-21 AUGUST 2024 | BRISBANE, AUSTRALIA

About the Workshop

Navigating the Changing World of Reserves and Resources in the Context of the PRMS

Reporting compliant recoverable volumes has become increasingly important as a driving force behind various business decisions across National Oil Companies (NOCs), International Oil Companies (IOCs), small and medium-sized operators, and regulators operating in the turbulent energy scenario. We aim to leverage industry expertise to discuss reserves and resources business models, re-imagine the economic outlook, and strategise and transform portfolio management through cost reduction initiatives to deliver real value.

The workshop aims to empower participants with the technical knowledge, tools, and strategic insights necessary to navigate the complexities of conventional and unconventional reserves assessment, reporting, and decision-making in today's rapidly evolving energy sector.

IMPROVE knowledge and understanding of reserve and resource estimates and potential issues

SHARE thoughts, examples, and experiences in reporting and estimating reserves and resources, as well as the use of PRMS and alternative systems

CLARIFY questions and uncertainties in reserve and resource evaluation

NETWORK with peers and experts in the field

Sponsorship Opportunities

Sponsorship support of the event helps offset the cost of producing workshops and allows SPE to keep the attendance price within reach of operation level-individuals, those who benefit most from these technical workshops.

Sponsors benefit both directly and indirectly by having their names associated with a specific workshop. While SPE prohibits any type of commercialism within the workshop room itself, the Society recognises that sponsoring companies offer valuable information to attendees outside the technical sessions.

Who We Are

SPE is the largest individual member organisation serving managers, engineers, scientists and other professionals worldwide in the upstream segment of the oil and gas industry.

The Society of Petroleum Engineers (SPE) is a not-for-profit organisation. Income from this event will be invested back into SPE to support many other Society programmes. When you attend an SPE event, you help provide even more opportunities for industry professionals to enhance their technical and professional competence. Scholarships, certification, the Distinguished Lecturer programme, and SPE's energy education programme Energy4Me® are just a few examples of programmes supported by SPE.
