D&R NTR Challenges in Brunei

The journey began about a decade ago...

Non-technical risks posed many challenges for the D&R team, including:

- Regulatory environment
- Environmental impact
- Community engagement
- Financial considerations
- Technological constraints

Findings:

- Regulatory alignment
- Environmental management
- Stakeholder collaboration
- Financial planning
- Technology Adoption

Taking holistic approach that integrates all the above to implement the best practices.

NTR Best Practices

- Early planning
- Risk Assessment
- Capacity Building
- Accountability

The aim is to navigate the decommissioning process effectively while safeguarding environmental and social interests for future generations.

Spotlight on NTR management: Community Engagement
