# ATCE 2025 POST EVENT REPORT

ATCE 2025 brought the global energy community together for three inspiring days of collaboration, learning, and innovation. Centered around the theme **Solutions. People. Energy.**, the event enabled more than 5,300 professionals to connect, explore new technologies, and share valuable insights across the upstream sector. From technical programs and panel discussions to exhibition activity and networking events, ATCE delivered the ideas, insights, and connections **driving meaningful progress across the industry.**

This report highlights the strength, scale, and impact of ATCE as SPE's global technical conference for knowledge exchange and industry advancement. Planning is already underway for 2026 ATCE, returning to Houston in October 2026 with the theme **Exploring New Horizons with Innovative Solutions.**

## OPENING GENERAL SESSION

### *Enabling Solutions Inspired by People for the Future of Energy*

Featured a panel moderated by Elena Melchert, President, Energia Consulting. Prominent panellists included Horacio Daniel Marin, President & CEO, of YPF S. A., Clay Gaspar, President & CEO, Devon Energy, along with Christine Verchere, CEO, OMV Petrom and Girish Saligram, CEO, Weatherford. The industry leaders explored how human-centered solutions can shape the future of our industry, highlighting the critical role of people in developing technologies, policies, and strategies for a more sustainable energy landscape.

# CONFERENCE HIGHLIGHTS

## KEYNOTE LUNCHEON

Timothy Latimer, Co-Founder and Chief Executive Officer of Fervo Energy delivered a compelling keynote as he explored how this coming decade will be defined by geothermal's rise from a niche resource to a cornerstone of the global energy mix.

## PRESIDENT'S LUNCHEON

At the President's Luncheon and Annual Meeting of Members, 2025 SPE President Olivier Houzé delivered the "State of the Society" address, reflecting on a year of reflection and resolve. He emphasized SPE's adaptation to change and its enhanced relevance going forward.

Houzé also announced the completion of the EnRG LLM project (in partnership with Aramco Americas and i2k Connect) which SPE will now license to industry partners.

Olivier Houzé passed the gavel to the 2026 SPE President Jennifer Miskimins, department head of petroleum engineering at Colorado School of Mines. Miskimins expressed her vision: to inspire members to progress from ideas to action, with focus on upskilling workforce, attracting and retaining talent, and deepening our role in the global energy discussion.
