“As we reflect, innovate and evolve, let us think boldly, act courageously and innovate relentlessly – together we can redefine what is possible, not just for Malaysia or ASEAN, but for the world.”

YAB Dato' Sri Haji Fadillah Bin Haji Yusof
Deputy Prime Minister and
Minister of Energy Transition & Water Transformation
Malaysia

ENERGY FOR ALL: REFLECT ► INNOVATE ► EVOLVE

Proudly hosted by PETRONAS and co-hosted by SLB, the 17th edition of the **International Petroleum Technology Conference (IPTC)** – the Eastern Hemisphere's premier multi-society, multi-disciplinary energy event – represented a collective commitment of the industry to advancing innovative solutions, sustainable practices, and energy accessibility for all.

CONFERENCE

Global energy leaders tackled industry challenges and opportunities through executive plenaries, expert discussions, and groundbreaking technical sessions.

EXHIBITION

Leading companies showcased next-generation technologies, solutions, and innovations, playing a key role in advancing industry dialogue.

INDUSTRY RECOGNITION

The IPTC Excellence Awards celebrated pioneering achievements in innovation, sustainability, and operational excellence, setting industry benchmarks.

DEVELOPMENT PROGRAMMES

Future talent was nurtured through hands-on learning, knowledge exchange and career development insights.

NETWORKING AND ENGAGEMENT

A platform for high-impact networking sessions, exclusive collaborations, strategic connections and business growth.

“The oil, gas and energy industry remains firm in its commitment to deliver reliable, affordable and emissions-abated energy required by the world amid heightened market and geopolitical risks.

These profound shifts further underscore the urgent need for greater collaboration among players. Such collaboration can accelerate the innovation of technologies much needed to adapt to an evolving ecosystem, while also enabling partners to progress in a financially prudent and strategically agile manner.

Strategic partnerships, such as the ones expected to be created over the course of this conference, will play a key role in ensuring that a resilient and sustainable future is attainable for all. ”

YM Tan Sri Tengku Muhammad Taufik
President & Group CEO
PETRONAS

INVESTING IN YOUR INDUSTRY

The International Petroleum Technology Conference (IPTC) is uniquely organised by four professional societies: AAPG, EAGE, SEG & SPE, leveraging our collective strength to industry opportunities, serving as the only fully integrated major joint event in the Middle East and Asia.

With one of the largest global technical programmes, we are a vital hub for geoscientists and engineers, fostering collaboration to address the evolving needs of the energy sector while promoting impactful decarbonisation solutions.

The income generated from this event is reinvested into IPTC's energy education programmes and the initiatives of sponsoring societies, providing the younger generation and industry professionals with opportunities to enhance their technical and professional skills.

The American Association of Petroleum Geologists (AAPG), founded in 1917, has been a pillar of the world-wide scientific community. The original purpose of AAPG, to foster scientific research, to advance the science of geology, to promote technology, and to inspire high professional conduct, still guides the Association today. Currently the world's largest professional geological society with approximately 40,000 members in 129 countries, AAPG provides publications, conferences and education opportunities to geoscientists and disseminates the most current geological information available to the general public.

For more information, visit: www.aapg.org

The Society of Exploration Geophysicists (SEG) is a not-for-profit organisation committed to connecting the world of applied geophysics. With more than 20,000 members in 128 countries, SEG provides educational and technical resources to the global geosciences community through publications, books, events, forums, professional development courses, young professional programmes, and more. Founded in 1930, SEG fosters the expert and ethical practice of geophysics in the exploration and development of natural resources, characterisation of near surface, and mitigation of earth hazards.

For more information, visit: www.seg.org

EAGE

EUROPEAN
ASSOCIATION OF
GEOSCIENTISTS &
ENGINEERS

The European Association of Geoscientists & Engineers (EAGE) is a professional association of geoscientists and engineers. Founded in 1951, it is an organisation with a worldwide membership, providing a global network of commercial and academic professionals. The association is truly multi-disciplinary and international in form and pursuits. EAGE operates two divisions: the Oil & Gas Geoscience Division and the Near Surface Division. EAGE has around 19,000 members worldwide representing over 100 countries. All members of EAGE are professionally involved in (or studying) geophysics, petroleum exploration, geology, reservoir engineering, mining and civil engineering.

For more information, visit: www.eage.org

Society of Petroleum Engineers

The Society of Petroleum Engineers (SPE) is a not-for-profit professional association with more than 132,000 members in 146 countries engaged in the exploration and production of oil and gas and related energy resources. SPE is a key technical and professional resource providing opportunities to exchange information at in-person and online events and through training, publications, and member programs. SPE maintains offices in Calgary, Dallas, Dubai, Houston and Kuala Lumpur.

►► Project Excellence Award

The **Coral South project, operated by Eni**, is Mozambique's first ultra-deepwater FLNG development, positioning the country as an LNG exporter while delivering significant economic and social benefits. Achieving first LNG production in 2022, it has shipped over 80 LNG cargoes with exceptional efficiency and sustainability.

The project created over 800 local jobs, improved healthcare for 500,000 people, and supported education and clean energy initiatives, aligning with UN SDGs. Its innovative technologies and outstanding execution set a new benchmark for FLNG developments worldwide.

►► Sustainability Excellence Award

The **Sea Water Injection Department Journey toward Sustainability Excellence by Aramco** is the world's largest seawater treatment plant for oil reservoir injection. This project set a new standard for sustainability by conserving billions of gallons of groundwater and enhancing energy efficiency through digitalisation and renewable energy.

►► Distinguished Achievement Award

Montri Rawanchaikul
Chief Executive Officer
PTTEP

His visionary leadership has transformed PTTEP into a global energy leader, achieving exceptional growth while prioritising sustainability and safety. He has driven technological innovations in natural gas production, CCUS, and renewable energy integration, positioning PTTEP at the forefront of the energy transition.

As part of IPTC's Corporate Social Responsibility initiatives, an art exhibition featuring local Malaysian artists was organised to raise awareness and funds for two local charities, ANGSANAcare and Sejolly. A total of 18 art pieces were sold, raising USD10,700 for these two charities.

The funds raised have supported ANGSANAcare in providing essential emotional and therapeutic support to underprivileged children with chronic illnesses and their families. Through this funding, ANGSANAcare has expanded its art therapy, music therapy, and counseling programmes, helping to improve the well-being of children undergoing medical treatment.

Meanwhile, Sejolly has utilised the funds to enhance its community outreach programmes, focusing on educational support, mentorship, and skill-building initiatives for marginalised youth. These initiatives empower young individuals by equipping them with practical skills, fostering confidence, and improving their future opportunities.

This initiative highlights IPTC's commitment to creating meaningful social impact by supporting organisations that improve the lives of communities.

IPTC is focused on the dissemination of new and current technology, best practices and multi-disciplinary activities designed to emphasise the importance of the value chain and maximising asset value. The knowledge, capabilities and strengths of the participating countries and the sponsoring societies global membership, over the spectrum of multi-disciplinary technologies, are central to the success of the conference and the corresponding exhibition.
