Dear Colleagues,

On behalf of SPE and the Program Committee, I am pleased to invite you and your organization to join us at the **2026 SPE Latin American and Caribbean Petroleum Engineering Conference (LACPEC)**, on 09 – 11 June 2026, Rio de Janeiro, Brazil.

The program of more than 140 technical presentations serves as a crucial platform for technology dissemination, knowledge sharing, and collaboration. The conference also features timely panel sessions and networking opportunities.

The program and networking experience with colleagues from Brazil and the region will offer your staff the chance to learn from global experts, share knowledge, and discuss the opportunities influencing and shaping our geographic region. In addition, the delegates will be able to explore and enjoy our beautiful and vibrant city.

LACPEC 2026 is an ideal venue to showcase your company's latest technological accomplishments, products, and services. Through exposure to regional oil and gas providers, energy officials, and key executives, you can sharpen your business strategy and leverage your goals.

This year's conference promises to be a remarkable and beneficial 2.5- days for all who attend. To learn more please visit www.spe-events.org/LACPEC or email sales@spe.org.

I look forward to the opportunity to meeting with you and with our colleagues in Rio de Janeiro.

Sincerely,

Fernando Mendes
Petrobras
2026 LACPEC General Chairperson
