Exhibition and Sponsorship Opportunities

About the Symposium

This Symposium is designed to engage and educate through live panel discussions, interactive breakout sessions, and case study presentations outlining operators' recent success and failures as Montney and Duvernay transition into a more mature development mode which has brought new challenges and concerns. By fostering a collaborative environment for knowledge sharing and networking, The 2026 Symposium aims to explore a wide range of real-world topics including development strategies, production optimization, execution challenges in non-ideal situations, water management, ESG and regulatory best practice, as well as new technologies and innovation to unlock the full potential of the Montney and Duvernay for the benefit of all stakeholders involved.

Who Will Be There?

Attending the symposium are operating companies, service providers, consulting firms, regulators, academia and more.

Why You Should Sponsor?

This highly attended event is the place to stand out as an influential leader and give your organization maximum exposure within this renowned unconventional resource. Sponsorships are proven to give your company immediate visibility and impact. Your support also helps to offset the cost of producing symposiums and allows SPE to keep the registration fee as low as possible for our attendees.

Why You Should Exhibit?

The Montney Duvernay Symposium is one of SPE Canada's most popular events. Over 450 leaders in this sector attended in 2025. Operators from ARC Resources, Athabasca Oil, Birchcliff Energy, Strathcona Resources, Tourmaline, PETRONAS, ConocoPhillips, Canadian Natural, and more attend this sold out event each year.

Benefits Include:

- Recognition on the Symposium website, including a link to your company's website
- Recognition on sponsor slides displayed between technical sessions
- Company logo, listing and handout option in the SPE International mobile app
- Event Signage

“The SPE Montney/Duvernay Symposium is my favorite event of the year for people in Canada working on Unconventionals – it’s a great place to see what other operators are working on through case study presentations, learn about new technologies to potentially implement, and network with other professionals working on similar problems”.

Pat Miller, PETRONAS Canada

“We exhibit because it’s one of the most focused and well-attended events in the region. It brings together the right people—decision-makers, engineers, and operators—who are driving real progress in completions. The conversations are meaningful, the attendance is strong, and the connections we make here continue to drive real value for our business and our customers.”

Kelly Williams, Yellow Jacket Oil Tools
