Sponsorship and Exhibition Opportunities

Welcome Message

Dear Industry Colleagues,

On behalf of the Symposium Committee, it is our pleasure to invite you to the **SPE/ICoTA Symposium and Exhibition: Well Intervention**, taking place from **2-3 December 2025 in Kuala Lumpur, Malaysia**.

In today's evolving energy landscape, optimising production and managing the well lifecycle is more critical than ever. As energy demand continues to rise and the industry transitions towards greater sustainability, well intervention plays a pivotal role in enhancing production efficiency while leveraging existing infrastructure to maximise recovery, reduce costs, and minimise environmental impact. With production increases of 10% or more achievable through intervention techniques, these operations are key to extending asset life while ensuring both economic and environmental viability.

At the same time, as wells reach the end of their productive life, ensuring safe, efficient, and environmentally responsible abandonment is paramount. Adhering to stringent regulatory and operational standards is essential to achieving long-term sustainability and industry compliance.

This symposium serves as a vital platform for industry professionals, bringing together operators, service providers, and key stakeholders to exchange ideas, share best practices, and address emerging challenges. This collaborative environment fosters innovative discussions and forward-thinking solutions, shaping the future of well intervention and abandonment.

We encourage your organisations to participate in showcasing thought leadership, cutting-edge solutions, and services at the symposium. We look forward to welcoming you to the SPE/ICoTA Symposium and Exhibition: Well Intervention in Kuala Lumpur!

Mohd Abshar Mohd Nor

The SPE/ICoTA Symposium and Exhibition: Well Intervention 2-3 December Kuala Lumpur, Malaysia.

As the energy industry evolves, optimising well production and lifecycle management is more crucial than ever. Well intervention techniques enhance recovery, leveraging existing infrastructure to reduce costs and environmental impact. At the same time, safe and efficient well abandonment is essential to ensure regulatory compliance and long-term sustainability. This event brings together industry experts to explore cutting-edge strategies, best practices, and innovations in intervention and abandonment, driving efficiency and value across the well lifecycle.

300+
participants from
20+ countries
