## Energy Startup Competition Sponsorship Opportunities

Destination Partner

## About Energy Startup Competition

Launched in 2017, the Energy Startup Competition is a fast-paced competition showcasing emerging energy technology companies. Competitors will receive visibility among leaders in the upstream energy industry, recognition as technology leaders, the opportunity for cash prizes, networking with leading energy investors, and mentoring.

The finalist companies selected to present will have the opportunity to participate in a coaching session before the Competition and will receive complimentary admission to ATCE.

During the competition, each company will have 5 to 8 minutes to provide information about their company and technology to a group of venture capitalists, angel investors, and industry leaders.

All participants will have an opportunity to ask questions and gain insights from investors, industry representatives, and veteran entrepreneurs about building startups.

For more information, please visit [www.atce.org/atce-startup-village](http://www.atce.org/atce-startup-village).
