

ANNOUNCEMENT

IADC/SPE Asia Pacific Drilling Technology Conference and Exhibition – New Dates

Due to the ongoing global public health concerns related to COVID-19, and following extensive consultation with our key partners and stakeholders, the decision has been made to reschedule the International Association of Drilling Contractors (IADC) and the Society of Petroleum Engineers (SPE) Asia Pacific Drilling Technology Conference and Exhibition (APDT) originally scheduled 1-2 September 2020 in Yangon, Myanmar.

APDT will now be held 10-11 June 2021 at the Lotte Hotel Yangon in Yangon, Myanmar, with the Myanmar Oil and Gas Enterprise (MOGE) and PTT Exploration and Production Public Company Limited (PTTEP) continuing as co-hosts for the event.

With these rescheduled dates, we are committed to delivering a successful event and platform to provide our participants with the foundations of a quality technical programme for knowledge-sharing and professional development, and business exhibition.

Since 1996, the SPE and IADC have conducted the APDT biennially, rotating amongst major cities in Asia Pacific. This collaborative event is where leaders and innovators can discover, network and advance the scientific understanding of drilling in oil and gas exploration and production. This platform is also dedicated to the drilling community and brings unrivalled technical content highlighting the latest industry trends, innovations and technical solutions affecting the sector.

We look forward to the support of our industry and its leaders for APDT to continue to achieve this objective.

SPE will be reaching out to all participants to confirm their rescheduling arrangements.

We thank you for your understanding given these complex circumstances and look forward to your participation in APDT in 2021.

U Nyan Tun
APDT 2020 Conference Co-Chair
 Managing Director
MOGE

Phongthorn Thavisin
APDT 2020 Conference Co-Chair
 President and Chief Executive Officer
PTTEP
