# IADC/SPE Asia Pacific Drilling Technology Conference and Exhibition

Efficient Energy through Collaboration and Technology

**18-19 August 2020**

Yangon, Myanmar  
Lotte Hotel Yangon

**SAVE THE DATE**

Registration will be open  
by April 2020

The IADC/SPE Asia Pacific Drilling Technology Conference (APDT) has established itself as a major technical conference on drilling technology and operations in the region. The 2020 edition will provide participants with crucial insights into the latest industry trends, technical expertise, best practices and innovative applications related to the field of drilling to continue to enhance the business value chain and propel the industry forward.

## What to Expect

- **600+** participants from over **30+** countries
- **100+** multi-disciplinary technical presentations from **30+** organisations
- **5+** hours of interactive panel sessions with senior executives and industry leaders
- **10+** hours of targeted networking functions at the exhibit floor
- **20+** hours of focused technical sessions

## Panel Sessions

Artificial Intelligence and Automation in Drilling

Collaboration To Improve Efficiencies

Technologies To Enhance Operations Performance

Challenges and Opportunities in Myanmar Oil & Gas Industry

## Technical Sessions

Well Delivery through Fluid and Barrier Design	Geopressure and Geomechanical Challenges
--	--

Well Technology Advancements	Optimising Well Delivery through Novel Technologies and Processes
------------------------------	---

Field Development & Optimisation	Production Enhancement Techniques	Improvement through Intelligent Analysis Design and Processing
----------------------------------	-----------------------------------	--

Deepwater Subsea and Offshore Technologies	Drilling Efficiency Applications
--	----------------------------------
