GAS FIELD DEVELOPMENT AND PRODUCTION - STATE OF PLAY

15-16 JANUARY 2024 | BANGKOK, THAILAND

About the Workshop

Gas Field Development and Production – State of Play

Gas field development and production in the region is a dynamic and strategic endeavor that plays a vital role in a country's energy landscape. Drawing upon the rich gas reserves in the South China Sea, countries in the region engage in comprehensive exploration, drilling, and production activities to meet its energy demands. Leveraging advanced technologies and industry best practices, the nation ensures efficient extraction and processing of natural gas.

This well-coordinated approach, combined with a commitment to environmental stewardship, underscores the regional position of Asia Pacific as a responsible player in the global energy sector. Through the gas field development and production efforts, every nation continues to drive economic growth while embracing sustainability principles.

SHARE lessons learnt and best practices in developing difficult and challenging gas resources, environment, and infrastructure

DISCUSS advanced approaches to optimise operations and maximise returns

EXCHANGE ideas and network with fellow industry players and technology enablers

NETWORK with peers and experts in the field

Who Should Attend?

-  **DRILLING AND COMPLETION OPERATIONS**
-  **FACILITIES AND PRODUCTION ENGINEERING**

Sponsorship Opportunities

Sponsorship support of the event helps offset the cost of producing workshops and allows SPE to keep the attendance price within reach of operation level-individuals, those who benefit most from these technical workshops.

Sponsors benefit both directly and indirectly by having their names associated with a specific workshop. While SPE prohibits any type of commercialism within the workshop room itself, the Society recognises that sponsoring companies offer valuable information to attendees outside the technical sessions.

Who We Are

SPE is the largest individual member organisation serving managers, engineers, scientists and other professionals worldwide in the upstream segment of the oil and gas industry.

The Society of Petroleum Engineers (SPE) is a not-for-profit organisation. Income from this event will be invested back into SPE to support many other Society programmes. When you attend an SPE event, you help provide even more opportunities for industry professionals to enhance their technical and professional competence. Scholarships, certification, the Distinguished Lecturer programme, and SPE's energy education programme Energy4Me® are just a few examples of programmes supported by SPE.
