## LETTER FROM IPTC 2020 EXECUTIVE COMMITTEE CHAIR

Dear Colleagues,

The 12<sup>th</sup> edition of the International Petroleum Technology Conference (IPTC) will be held 13–15 January 2020, at the Dhahran EXPO in the Kingdom of Saudi Arabia, with Saudi Aramco serving as the Exclusive Host Organisation.

Themed “**Vision to Prosperity: A New Energy Era Emerges**”, this will be the first international multi-disciplinary, inter-society oil and gas conference and exhibition to be held in Saudi Arabia. The Kingdom, with some of the world’s largest oil reserves, occupies a unique position at the crossroads of Europe, Africa and Asia, making it a fitting location for one of the largest and most prestigious international conferences for petroleum engineering.

IPTC is a collaborative effort among the American Association of Petroleum Geologists (AAPG), the European Association of Geoscientists and Engineers (EAGE), the Society of Exploration Geophysicists (SEG), and the Society of Petroleum Engineers (SPE) and is widely regarded by industry professionals as a unique opportunity to promote technology dissemination and knowledge sharing on a global scale in a truly integrated manner.

On behalf of the IPTC Board of Directors, the Executive Committee, the Conference Programme Committee and the Host Organisation, it is our pleasure to invite you to participate, and benefit from, the many technical papers, field trips and workshops at this prestigious event.

With over 8,000 participants from around the world expected to attend, IPTC provides organisations with a world-class platform to showcase new and emerging technologies, and will enhance your company’s profile to a diverse group of industry professionals and decision-makers.

In addition to the many experts in attendance, IPTC provides many learning opportunities for students and proudly encourages the participation and development of our talented young professionals.

We look forward to your support in making IPTC 2020 a banner event and to welcoming everyone to the Kingdom of Saudi Arabia in January 2020. I look forward to seeing everyone at the Grand Opening Ceremony on 13 January 2020.

The International Petroleum Technology Conference (IPTC) is an international oil and gas conference and exhibition. The event is to rotate in various venues in the Eastern Hemisphere. The scope of the conference programme and associated industry activities will address technology and relevant industry issues that challenge industry specialists and management around the world, particularly in the gas business and certain overarching issues such as HSE, Security, HR and training. IPTC is a collaborative event between the following societies:

The American Association of Petroleum Geologists (AAPG), founded in 1917, has been a pillar of the world-wide scientific community. The original purpose of AAPG, to foster scientific research, to advance the science of geology, to promote technology, and to inspire high professional conduct, still guides the Association today. Currently the world's largest professional geological society with approximately 40,000 members in 129 countries, AAPG provides publications, conferences, and educational opportunities to geoscientists and disseminates the most current geological information available to the general public.

For more information, visit: [www.aapg.org](http://www.aapg.org).

The European Association of Geoscientists & Engineers (EAGE) is a professional association for geoscientists and engineers. Founded in 1951, it is an organization with a worldwide membership, providing a global network of commercial and academic professionals. The association is truly multi-disciplinary and international in form and pursuits. EAGE operates two divisions: the Oil & Gas Geoscience Division and the Near Surface Geoscience Division. EAGE has around 19,000 members worldwide representing over 100 countries. All members of EAGE are professionally involved in (or studying) geophysics, petroleum exploration, geology, reservoir engineering, mining and civil engineering.
