

EMERGING LEADERS WORKSHOP

Thursday, 2 March 2023 • 0800 – 1800 hours • Bangkok, Thailand

Young Leaders' Roadmap Towards Energy Transition and Beyond

The Emerging Leaders Workshop is a programme designed for Young Professionals (YPs) under the age of 35 or with less than 10 years of experience in the energy industry. This programme offers participants a great opportunity to network with the industry experts and to discuss their perspectives on how to energise the industry.

Young Leaders' Roadmap Towards Energy Transition and Beyond

Climate change and global warming are considered by many to be the biggest threats that humanity has faced. As such, the United Nations (UN) has set affordable and clean energy (Goal 7) and climate action (Goal 13) as two of its Sustainable Development Goals, which form part of the 2030 agenda for Sustainable Development.

Nearly 200 countries agreed to limit global warming to less than 1.5 degrees Celsius at the 2021 UN Climate Change Conference (COP26) in Glasgow. Most COP26 attendees indicated support for a strong push to reduce reliance on fossil fuels, and instead redirect investment to diversified and cleaner sources of energy. Meanwhile, many predict “peak oil” will occur during the coming decades. Clearly, the energy transition has begun and is likely to only accelerate.

The process of decarbonisation is not simple and is highly uncertain. Surges and plunges in energy supply and demand were witnessed over the last few years due to the COVID-19 pandemic and shifting geopolitics. Clean energy in E&P is now no longer a choice but an obligation. To this end, clean energy technologies, including carbon capture, utilisation, and storage (CCUS) and low-carbon hydrogen, are the new requirements for all oil and gas companies. Successfully meeting this significant set of challenges will require a strategy of partnership and collaboration among E&P companies. Innovation and technology are also needed today more than ever. The unique landscape of the energy transition demands a new type of leader, equipped with skills in collaboration, innovation, and adaptability.

The IPTC 2023 Emerging Leaders Workshop, themed “Young Leaders’ Roadmap Towards Energy Transition and Beyond”, is designed to establish the next generation of leaders. The workshop aims to cover the hard and soft skills necessary for a sustainable transition, how existing skillsets might be repurposed, and what role E&P leaders will play in a net-zero world. During the workshop, young professionals and industry experts will be given the chance to exchange views, to collaborate, and to contribute towards the roadmap, while senior leaders will share their knowledge and wisdom with attendees. Finally, the workshop will provide a great opportunity for participants from various backgrounds and disciplines to exchange their experiences and to network.

PRELIMINARY AGENDA

0800 – 0830 hours	Arrival of Delegates
0830 – 0845 hours	Welcome Remarks by Emerging Leaders Workshop Chair
0845 – 0900 hours	Opening Remarks
0900 – 0945 hours	Keynote Address and Q&A
0945 – 1015 hours	Ice Breaker
1015 – 1100 hours	Group Photo and Coffee Break
1100 – 1230 hours	Panel Session: Reshaping the Future Together
1230 – 1400 hours	Lunch
1400 – 1615 hours	Mentoring Session
1615 – 1630 hours	Closing Remarks by Emerging Leaders Workshop Chair
1630 – 1800 hours	Networking Reception

Welcome Remarks

0830 – 0845 hours

Adisorn Smathimanant
Senior Vice President
Human Resources Division
PTT Exploration and Production
Public Company Limited

Opening Remarks

0845 – 0900 hours

Montri Rawanchaikul
Chief Executive Officer
PTT Exploration and Production
Public Company Limited

Keynote Address

0900 – 0945 hours

Amy Chua
President, Asia Basin
SLB

Panel Session: Reshaping the Future Together

1100 – 1230 hours

Egon van der Hoeven
Senior Vice President
Business Development
ExxonMobil
Cepu Ltd.

Hasliza Othman
Senior Vice President
Malaysia Assets
Upstream
PETRONAS

Piya Sukhumpanumet
Executive Vice President
International Production
Asset Group
PTTEP

Nurzalina Jamaluddin
Vice President
Low Carbon Ventures
SEA Hibiscus

Lee Meng Keong
Managing Director
East Asia
SLB

Moderator

Sarah Hanes Lokman Hakim
Production Engineer
SLB

We live in a dynamic and ever-changing world that continues to disrupt in many ways. Energy transition, technological advancement, cultural changes, global markets, and economic shifts have impacted our industry's business. We also face growing pressure to deliver on long-term commitments to fulfil stakeholders' expectations through digitalisation, low carbon, and greener energy. While this added many challenges for young professionals to adapt to this new world, it has also created an opportunity to make positive and fundamental changes. Hopefully, it opens the door for young professionals to lead the future energy industry.

As we respond to uncertainties, organisations must develop strategic imperatives to remain competitive in business operating models, leadership styles, and talent development. We understand that change is not an easy feat; it has been seen that organisational business model transformation will require highly skilled yet nimble future workforce to support the need for change.

This panel session invites esteemed industry leaders to share their perspectives on how we, as young professionals, can contribute to this transformation, understand the knowledge and skillsets expected from leaders, and grow as future leaders for the continuance of our industry.

Mentoring Session

1400 – 1615 hours

The Emerging Leaders Workshop mentoring session provides Young Professionals an opportunity to discuss industry trends and career development with industry leaders and experts in small group breakout groups. Topics to be covered in this session include:

- Future of E&P Business
- Impact of Climate Change on Oil and Gas Industry
- Decarbonising and Enhancing Upstream Portfolio
- Carbon Footprint Mechanism
- Energy Transition as a Crucial Enabler of Sustainable Development
- Addressing Business Strategy in a Dynamic and Uncertain Energy Landscape Leading Innovation for Future Energy Sustainability
- Importance of CCUS in Oil and Gas Business
- Hydrogen Energy (New Energy)
- Young Leaders
- Partnership and Collaboration
- Talent Attraction and Retention

Your Mentors

Ramanrao Abdullah
Group Chief Executive Officer
Deleum Berhad

Helge Hove Haldorsen
Senior Fellow
Switch Energy Alliance

Patricia Seevam
General Manager Transformation
and Energy Transition
Shell

More updates coming soon!

Closing Remarks

1615-1630 hours

Bundit Pattanasak
Senior Vice President
Technology Management
PTT Exploration and Production
Public Company Limited
