Message from the Technical Programme Chairs

Dear Industry Colleague,

The International Petroleum Technology Conference (IPTC) will be returning to Saudi Arabia for its fourteenth edition. It is scheduled to be held in Dhahran Expo in Dhahran on 21-23 February 2022, with Saudi Aramco serving as the Exclusive Host.

Since its inaugural edition in 2005, IPTC has established itself as one of the most prestigious multidisciplinary conferences in the Eastern Hemisphere. The 2022 edition aims to build on the outstanding success of IPTC 2020 by offering another world-class technical programme and exhibition.

As we continue to emerge from the unprecedented times brought about by the pandemic, the resilience of the oil and gas sector relies more than ever on technological advancements and exchange of knowledge. On behalf of the IPTC Technical Programme Committee, it is our pleasure to invite you to share your technical knowledge by submitting your abstract for consideration in the IPTC 2022 technical programme [here](#).

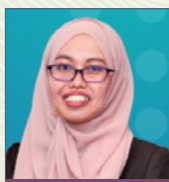

The 2022 edition of IPTC will feature a diverse range of technical disciplines to address the various challenges faced by our industry. Topics related to geology, geoscience, exploration, reservoir, production, drilling, completion, human resources, and industry revolution 4.0 will be presented throughout the technical programme. In addition to this, we are pleased to introduce new topics under midstream operations and sustainability.

We look forward to your contribution and knowledge-sharing in making IPTC 2022 a remarkable event, and to welcoming you to Saudi Arabia in February 2022.

Sincerely,

Ashraf Tahini

Enhance Your Reputation as an Industry Professional

Be part of this prestigious multidisciplinary, inter-society oil and gas conference and exhibition which returns to Saudi Arabia in 2022. As an author you will have the opportunity to contribute to the technical knowledge transfer between 18,000+ international experts, regional and local industry professionals.

Submit your paper proposal for consideration by the Technical Programme Committee by the deadline of **30 June 2021**.

Technical Categories

- Geoscience
- Reservoir Engineering
- Integrated Reservoir Engineering and Geoscience
- Drilling and Completions
- Midstream Operations
- IOR/EOR
- Production Engineering
- Unconventionals
- Overarching Themes
- IR 4.0
- Sustainability

Authors are strongly encouraged to submit their abstracts electronically at the IPTC website—2022.iptcnet.org/callforpapers

Submission Guidelines:

1. Obtain the necessary clearance from your management and start preparing now.
2. Authors whose paper proposals are accepted will be required to provide a manuscript, extended abstract and/or abstract only for inclusion in the conference proceedings.
3. If accepted, your paper proposal may be published, as submitted, in conference media, including OnePetro®.

Please Note: An agreement to present a paper at the IPTC conference carries an obligation to participate in the event.
