21-23 February | Riyadh, KSA

LETTER FROM IPTC 2022 EXECUTIVE COMMITTEE CHAIR

Dear Industry Colleagues,

We are once again honoured to welcome the global energy industry to the Kingdom of Saudi Arabia for the next International Petroleum Technology Conference (IPTC), to be held February 21-23 2022 at the Riyadh International Convention and Exhibition Centre in Riyadh.

Building on the outstanding success of IPTC 2020—the first edition to be held in Saudi Arabia—this flagship conference returns to the Kingdom offering a much-anticipated chance for us to collaborate and reconnect in person. IPTC is a collaborative effort among the American Association of Petroleum Geologists (AAPG), the European Association of Geoscientists and Engineers (EAGE), the Society of Exploration Geophysicists (SEG), and the Society of Petroleum Engineers (SPE), and has become one of the most insightful and influential oil and gas conferences in the Eastern Hemisphere.

With the theme of “Fuelling Global Recovery through Sustainable Energy,” IPTC 2022 will showcase upstream sector resilience, technological advancement, and ecosystem evolution during these critical times. Over 18,000 participants from around the world are expected to benefit from a world-class conference program, field trips, and state-of-art exhibitions exploring emerging technologies and applications. In addition to the many experts in attendance, IPTC provides numerous learning opportunities for students and strongly encourages the participation and development of our talented young professionals.

On behalf of the IPTC Board of Directors and Executive Committee, our host organisation Saudi Aramco, and our organising committees, it is my pleasure to invite you to join us as we bring together global thought leaders, technologists, and strategists to share their views on how innovation and collaboration will shape our role in a circular carbon economy, and pave the way for sustainability, economic growth, and prosperity for generations to come.

We greatly look forward to welcoming you to Riyadh in February 2022!

Sincerely,

Nasir K. Al-Naimi

IPTC 2022 Executive Committee Chair
Senior Vice President, Upstream
Saudi Aramco

WELCOME TO THE INTERNATIONAL PETROLEUM TECHNOLOGY CONFERENCE (IPTC) 2022

Founded in 2005, the International Petroleum Technology Conference is the flagship multidisciplinary technical event in the Eastern Hemisphere. The scope of the conference programme and associated industry activities address technology and relevant industry issues that challenge industry specialists and management around the world.

IPTC is focused on the dissemination of new and current technology, best practices and multidisciplinary activities designed to emphasise the importance of the value chain and maximising asset value. The knowledge, capabilities and strengths of the participating countries and the sponsoring societies' global membership, over the spectrum of multidisciplinary technologies, are central to the success of the conference and the corresponding exhibition.

Be part of a multidisciplinary, inter-society oil and gas conference and exhibition which returns to the Kingdom of Saudi Arabia in 2022.

SUCCESS OF IPTC 2020

“ Our ambition, vision, excitement, and determination, is to lead this transformation and transmit transition with all its challenges and opportunities. ”

**His Royal Highness
Prince Abdulaziz bin Salman Al Saud**
Minister of Energy
Kingdom of Saudi Arabia

“ If we can offer real solutions to real energy needs of the many, not just the few, then I am confident that our industry's place at the heart of global energy for decades to come will be assured. ”

His Excellency Yasir Al-Rumayyan
Chairman of the Board
Saudi Aramco

“ The issues facing all of us in the upstream industry are getting more complex and their solutions are proving to be more challenging, and require the usage of the most advanced technologies. IPTC provides the most suitable platform for discussions and exchange of ideas about these technologies and integrated solutions. ”

The International Petroleum Technology Conference (IPTC) is an international oil and gas conference and exhibition. The event is to rotate in various venues in the Eastern Hemisphere. The scope of the conference programme and associated industry activities will address technology and relevant industry issues that challenge industry specialists and management around the world, particularly in the gas business and certain overarching issues such as HSE, Security, HR and training. IPTC is a collaborative event between the following societies:

The American Association of Petroleum Geologists (AAPG), founded in 1917, has been a pillar of the world-wide scientific community. The original purpose of AAPG, to foster scientific research, to advance the science of geology, to promote technology, and to inspire high professional conduct, still guides the Association today. Currently the world's largest professional geological society with approximately 40,000 members in 129 countries, AAPG provides publications, conferences, and educational opportunities to geoscientists and disseminates the most current geological information available to the general public.

For more information, visit: www.aapg.org.

The European Association of Geoscientists & Engineers (EAGE) is a professional association for geoscientists and engineers. Founded in 1951, it is an organization with a worldwide membership, providing a global network of commercial and academic professionals. The association is truly multi-disciplinary and international in form and pursuits. EAGE operates two divisions: the Oil & Gas Geoscience Division and the Near Surface Geoscience Division. EAGE has around 19,000 members worldwide representing over 100 countries. All members of EAGE are professionally involved in (or studying) geophysics, petroleum exploration, geology, reservoir engineering, mining and civil engineering.

SOCIETY OF EXPLORATION
GEOPHYSICISTS

The Society of Exploration Geophysicists (SEG) is a not-for-profit organization committed to connecting the world of applied geophysics. With more than 20,000 members in 128 countries, SEG provides educational and technical resources to the global geosciences community through publications, books, events, forums, professional development courses, young professional programs, and more. Founded in 1930, SEG fosters the expert and ethical practice of geophysics in the exploration and development of natural resources, characterisation of near surface, and mitigation of earth hazards.

For more information visit: www.seg.org.

Society of Petroleum Engineers

The Society of Petroleum Engineers (SPE) is a not-for-profit professional association whose more than 140,600 members in 144 countries are engaged in oil and gas exploration and production. SPE is a key resource for technical knowledge providing opportunities to exchange information at in-person and online events and training courses, publications, and other resources.
