Asia’s premier offshore energy event

Founded in 1969, the Offshore Technology Conference (OTC) organises the world’s foremost events for the development of offshore resources in the fields of drilling, exploration, production and environmental protection. The flagship OTC is held annually in Houston, Texas, U.S.A.

The biennial OTC Asia is where energy professionals meet to exchange ideas and opinions to advance the scientific and technical knowledge for offshore resources and environmental matters.

The first OTC Asia was held in 2014. OTC Asia’s vision and goal is to fulfil OTC’s mission to promote and further the advance of scientific and technical knowledge of offshore resources and environmental matters. Furthermore, OTC Asia aims to:
- Meet the demand for technical information to support the growth of the offshore oil and gas industry in Asia.
- Provide opportunities for industry professionals and their employers to share their applied technologies and best practices with other producing areas in the world.
- To create opportunities to institute and strengthen intersociety collaboration and cooperation with member societies based in Asia.

What is the OTC Asia 2020 Virtual Event?

The look and feel of the virtual environment will provide attendees with a comprehensive event experience, including interactive pages. As with the physical event, a virtual event will include the conference programme components and presentations from industry experts and technical authors. Auditoriums will host online keynotes and seminars by leading executives and industry professionals. The interactive exhibition hall and lounge area will also be available for attendees to network through live-chat features with exhibitors and fellow participants. Being delivered online mean attendees, speakers, and exhibitors can join OTC Asia from anywhere in the world.
