SPE/IADC Asia Pacific Drilling Technology Conference and Exhibition
Advancing Drilling and Well Technologies for a Resilient Future
7–8 August 2024 | Bangkok Convention Centre at CentralWorld, Bangkok, Thailand

go.spe.org/24APDTC
JOURNEY TO THE ENDLESS POSSIBILITIES

At PTTEP, we rise to the challenge of balancing energy security and sustainability. Our unwavering commitment drives us to secure the energy needs of today while safeguarding the future for generations to come. As we navigate towards a low-carbon organization, innovation and determination power our quest for a cleaner and more sustainable world. Join us on this transformative journey as we pave the way for a brighter tomorrow.

www.pttep.com
On behalf of the Society of Petroleum Engineers (SPE), the International Association of Drilling Contractors (IADC), and the Conference Organising Committees, it is our pleasure to extend to you a warm welcome to the SPE/IADC Asia Pacific Drilling Technology Conference and Exhibition (APDT) 2024, taking place from 7 – 8 August 2024 in Bangkok, Thailand.

We are also honoured and delighted that PTT Exploration and Production Public Company Limited (PTTEP) is the Host Organisation for this 2024 edition, supporting APDT in Bangkok since 2018.

Under the overarching theme, “Advancing Drilling and Well Technologies for a Resilient Future,” this year’s conference promises to catalyse transformative discussions and insights. The conference programme, shaped by the Technical Programme Committee, offers a comprehensive agenda featuring senior executive dialogues in its opening, keynote and executive plenary sessions, and industry and technical best practices through its panels and special sessions.

Our commitment to delivering unparalleled value is evident in the diverse array of over 100 technical presentations to be showcased in technical and ePoster sessions. These presentations promise to be a source of inspiration and knowledge, covering a spectrum of topics that encapsulate the cutting-edge developments and innovations driving our industry forward.

All programmes shaped for APDT 2024 will provide industrial leaders, experts, professionals and energy companies with crucial insights on technological advancements, technologies and practices that address opportunities and challenges that lie ahead. During this dynamic and collaborative environment, it will also foster connections, spark new ideas, and chart the course for a resilient future in drilling and well technologies.

We expect the APDT conference this year to be beneficial to all. The event is poised to facilitate advancements in drilling operations, improving procedure, introducing the state-of-the-art technology and promoting solutions to common problems to increase operational efficiency for our industry.

We look forward to welcoming you to the engaging discussions and discoveries at APDT 2024. See you in Bangkok!
Since 1983, the Society of Petroleum Engineers (SPE) and the International Association of Drilling Contractors (IADC) have conducted industry-leading conferences for the drilling industry globally.

In Asia Pacific, the SPE/IADC Asia Pacific Drilling Technology Conference and Exhibition (APDT) has been held biennially since 1996, rotating amongst major cities in Asia Pacific. Over the past decade, APDT has established itself as a major business and technical conference on drilling technology and operations for the region.

APDT 2024 will bring together industry leaders, subject matter experts, contractors, and energy companies to share new perspectives and discuss technological advancements through a comprehensive two-day conference programme with stimulating plenary, panel, case studies and multidisciplinary technical sessions.

As the premier drilling technology conference in Asia Pacific, APDT 2024 is set to provide a platform for attendees to stay at the forefront of the industry. By staying updated with the latest trends and advancements, participants will be better equipped to tackle the evolving demands of the drilling sector and drive sustainable growth.
A world-leading provider of Offshore and Onshore drilling services
About SPE and IADC

About the Society of Petroleum Engineers

The Society of Petroleum Engineers (SPE) is a not-for-profit professional association with 127,000 members in 145 countries engaged in the exploration and production of oil and gas and related energy resources. SPE is a key technical and professional resource providing opportunities to exchange information at in-person and online events and through training, publications, and member programs. SPE maintains offices in Calgary, Dallas, Dubai, Houston, Kuala Lumpur, and London.

About the International Association of Drilling Contractors

Since 1940, the International Association of Drilling Contractors (IADC) has exclusively represented the worldwide oil and gas drilling industry. IADC’s mission is to catalyse improved performance for the drilling industry by enhancing operational integrity and championing better regulation to facilitate safer, cleaner and more efficient drilling operations worldwide. For more information, visit IADC at www.iadc.org and www.DrillingContractor.org.

Under the conference theme “Advancing Drilling and Well Technologies for a Resilient Future”, this session will gather senior leaders and experts to dissect and forecast the trends shaping our industry. The esteemed panel will discuss a diverse range of topics critical to the industry’s resilience in an era of unprecedented challenges and opportunities:

- **Digital Transformation**: Uncover how the fusion of data analytics, artificial intelligence, and automation is revolutionising drilling and well operations to enhance efficiency, safety, and sustainability.

- **Energy Transition**: Examine the role of drilling technologies in supporting the shift towards cleaner energy sources and in addressing environmental concerns, including carbon capture and utilization.

- **Resilience in Extreme Environments**: Learn about the latest breakthroughs in drilling technologies for harsh and unconventional environments.

- **Innovation and Collaboration**: Explore the importance of industry collaboration, knowledge sharing and innovation ecosystems in driving advancements and mitigating risks.

- **Sustainability and ESG**: Discuss strategies for achieving sustainability goals, aligning with ESG principles, and adapting to evolving regulations.

This session aims to be a focal point for leaders, innovators, and stakeholders seeking to navigate the evolving landscape of the drilling industry and discipline.

This panel session aims to delve into the cutting-edge realm of drilling technologies to explore the latest advancements in autonomous drilling systems, the transformative impact of artificial intelligence (AI) and machine learning (ML) on drilling and well operations, and the integration of new technologies on drilling rigs.

Senior industry leaders will discuss the revolutionary strides made in autonomous drilling systems, dissecting how these innovations are reshaping the landscape of drilling operations by significantly enhancing safety, improving operational efficiency, and driving cost-effectiveness.

Key discussions include:

• Cutting-edge drilling technologies such as AI and ML to optimise drilling strategies, predictive maintenance, understanding intelligent algorithms, and data-driven decision-making.
• The transformative impact on safety, efficiency, and cost-effectiveness.
• How autonomous drilling innovations reshape operations and examine practical applications from automated rigs to real-time monitoring.
• Insights into the transformation of the energy sector into a dynamic, data-driven powerhouse.
• Game-changing tools that streamline processes, enhance precision, and contribute to a sustainable future.
Panel Sessions

Panel Session 2: Advancing Environmental Stewardship in Drilling and Well Technologies for CCS Applications and Sustainable Practices: Our Path to Net Zero Carbon Emissions

Wednesday, 7 August 2024 | 1600 – 1730 hours | Lotus Suite 7, Level 22

PTT Exploration and Production
Public Company Limited

With the global push for net-zero carbon emissions, this session focuses on drilling technologies tailored for carbon capture and storage (CCS) applications.

Key discussions include:

• Innovative Drilling for CCS: Explore cutting-edge drilling technologies optimising carbon capture through novel methodologies and smart technology integration.

• Environmental Stewardship: Delve into sustainable drilling practices, minimising impact through reduced emissions, efficient water management, and eco-friendly drilling fluids.

• CCS Case Studies: Learn from real-world applications, gaining insights from successful projects and identifying areas for improvement.

• Regulatory Landscape and Collaboration: Navigate regulations and emphasise industry collaboration for successful sustainability initiatives.

This collaborative session brings together experts to share knowledge, experiences, and best practices, providing valuable insights into the journey towards a sustainable future in drilling and well technologies aligned with global net-zero carbon emission goals.
In the dynamic realm of technological advancements, companies must innovate staff training to ensure a secure and efficient working environment. Traditional PowerPoint presentations for HSE training are questioned for their efficacy, prompting a need for engaging and collaborative techniques to attract, retain and train talent effectively. However, the adoption of new technologies faces resistance from decision-makers unfamiliar with the preferences of the Generation Z workforce.

- **Challenge:** Traditional HSE training (PowerPoint slides) is often ineffective, leading to talent retention issues and a lack of information transfer with training models designed to tick a box. Furthermore, due to unfamiliarity and cost concerns, decision-makers hesitate to adopt new technologies.

- **Solution:** Virtual Reality (VR) training offers an engaging and immersive alternative. Affordable devices like Meta Quest and various technological advancements address initial concerns about cost and motion sickness.

- **Benefit:** VR training's ability to improve safety awareness, attract and retain talent, and boost efficiency. Embracing VR bridges the knowledge gap between generations and fosters a culture of continuous learning.
When we ended the last edition of APDT in 2022, the drilling industry had just emerged from an existential crisis in the preceding years. It gradually ended 2022 with a year of cautious recovery, followed by a tremendous wave of drilling capital expenditure.

As the energy transition continues to gather pace worldwide, the booming reminder of an “Energy Trilemma” that exists rings true to this day.

The drilling industry remains essential to achieving energy security, affordability and sustainability. Without us, it is highly improbable to usher in an age of clean energy without facing challenges to provide for a region that will continue to grow in energy needs.

This session will seek to unpack what each critical industry stalwart and contributor in a vertically integrated chain has in store for the drilling industry in the future.

Technical and Knowledge Sharing ePoster Sessions

More than 100 technical presentations will be presented across a vast variety of technical topics at the Technical and ePoster Sessions.

Technical Sessions include:

- Advanced Drilling Fluid & Cementing Technologies
- Advancements in Coiled Tubing Intervention
- Advances in Well Technology
- Case Studies in Advanced Drilling and Well Technologies I
- Case Studies in Advanced Drilling and Well Technologies II
- Delivering the Energy Transition - CCS
- Digital Drilling: Harnessing AI for Operational Excellence
- HSE and Sustainability
- Innovative Intervention Technology
- Novel Approaches in MPD
- Optimising Well Construction
- Revolutionising Exploration – Innovations for Efficiency and Success
- Smart Tubular Solutions
- Strategic Well Design & Optimisation

Registration Enquiries

spekl@spe.org
**General Information**

**Venue**

Bangkok Convention Centre at CentralWorld  
999/99 Rama 1 Road, Pathumwan, Bangkok 10330 Thailand  
Tel: +66 2 100 1234  
Website: https://www.centarahotelsresorts.com/centaragrand/cgcw

**Airport**

Travellers arrive in Bangkok, Thailand at the Suvarnabhumi International Airport (BKK) and Don Mueang International Airport (DMK). Both airports are approximately 30 minutes by car from Bangkok Convention Centre at CentralWorld. Event attendees may arrange for ground transfers with their selected hotels or secure a taxi at the arrival hall.

**Badge Collection**

Event badges can be collected during the event at the venue. Badges are required for admission into the event and must be worn at all times during event days.

**Delegate Pack**

The delegate pack consisting of event brochure and other relevant information can be collected upon collecting your badge during the event at the venue.

**Photography and Audio Visual Copyright**

All conference sessions and the exhibition are protected by international copyright laws.  
Photography and video/audio recording of any kind in conference sessions and the exhibition are prohibited without prior written permission by SPE.

**Visa**

Event attendees travelling to Bangkok, Thailand must be in possession of passports valid for at least six (6) months with proof of onward passage out of the country. Visa requirements depend on the country of origin. Please check with your travel agent, or the Thailand Embassies, High Commissions or Consulates on regulations relating to immigrationvisa before your departure. 
An invitation letter to facilitate the application of visa will be issued to registered attendees if required. Please download the invitation letter request form. Please send the request to Faezah Saaban.

Please note that it is the sole responsibility of the attendee to obtain the necessary supporting document(s) for entry into Bangkok, Thailand. The invitation letter does not guarantee that you will be granted a visa.

**Accommodation**

The following hotel is within proximity of the event. All accommodation and hotel bookings are to be made directly with the hotel.

**Centara Grand at CentralWorld**  
Website: https://www.centarahotelsresorts.com/centaragrand/cgcw  
Booking Deadline: Thursday, 4 July 2024
