## ► Empowering Tomorrow's Leaders: Inspire, Innovate, Lead

The IPTC 2025 Emerging Leaders Workshop, themed “**Empowering Tomorrow’s Leaders: Inspire, Innovate, Lead,**” is crafted for young professionals (YPs) under 35 or with less than 10 years of experience in the energy industry. Join fellow rising stars and industry experts to shape the future of energy together!

This immersive program offers a unique blend of networking, learning, and collaboration. Explore the essential skills needed for a sustainable transition, learn how to adapt and repurpose your expertise, and dive into the crucial role E&P leaders will play in a net-zero world. Senior leaders will share invaluable insights, while interactive sessions encourage you to exchange ideas, collaborate, and co-create a roadmap for the industry’s future. Connect with peers from diverse backgrounds and disciplines, broaden your perspective, and strengthen your leadership potential. Don’t miss this opportunity to be part of a dynamic community driving positive change!

1045-1230 hours

### Building a Career in Sustainable Energy: Navigating Transitions and Seizing Advancement Opportunities

This panel explores career transitions within sustainable energy, focusing on how emerging leaders can strategically position themselves to advance in this rapidly evolving field. The panel will discuss key aspects such as skill development, networking, overcoming challenges, and seizing opportunities in the sustainable energy sector.

Industry leaders will share their perspectives on how young professionals can contribute to this transformation, understand the skills and knowledge required for advancement, and grow into roles that support the industry's continuity.
