

Scott Livingston

President, Energy Products and Services, NOV Inc.

Scott Livingston currently serves as President, Energy Products and Services, one of two operating segments for NOV, comprising several businesses that provides the critical technologies, equipment, and services to safely maximize operational efficiency, reliability, and economics in the upstream oil and gas, renewables, and industrial markets.

Scott has worked for NOV since 2001, garnering increasing levels of responsibilities with projects and operations for newbuild offshore vessels, including six years in Asia. After returning to Houston in 2012 Scott spent the remainder of his career leading business units involved in drilling, completions, and production workover equipment before assuming his current role at the beginning of 2024.

Prior to joining NOV, Scott served 8 years in the US Air Force involved in maintenance, logistics, and program management for new aircraft weapons systems.

Scott graduated from Texas A&M with a BS in Industrial Engineering, earned an MS in Logistics Management, and attended the Advanced Management Program at the Wharton Business School.
