Sponsorship and Exhibition Opportunities

Message from the Conference and Executive Committee Chair

Reinhard Oswald
SVP Tech Center, Energy,
OMV E&P GmbH

Dear Energy Community and Industry in General,

It is with great pleasure that we welcome you to the **2025 Europe Energy Conference and Exhibition** in the city of Vienna! Known for its rich history, great architecture, and vibrant culture, Vienna provides the perfect backdrop for our gathering. We are excited to host you in this magnificent city as we come together to explore and innovate for a responsible energy transition.

Our conference theme, “Innovating Together: Solutions, People, and Energy for a Responsible Transition,” underscores the critical importance of collaboration in addressing the energy challenges of our time. We invite energy companies from around the world to join us in this endeavor, bringing their expertise, innovation, and commitment to sustainable practices.

We are honored to have OMV as our host company. OMV, headquartered in Vienna, is leading the way with its ambitious Strategy 2030 and 2050. By 2030, OMV aims to become a leading provider of sustainable fuels, chemicals, materials, and energy with a strong focus on circular economy solutions. Our commitment to achieving net-zero emissions by 2050 reflects their dedication to a sustainable future. OMV’s strategy includes significant investments in renewable energy, carbon capture and storage, and the reduction of oil and gas production for energy use.

At the heart of OMV’s success in its three Energy core regions – North, CEE, and South – are its employees in three powerhouses: Exploration & Production (E&P), Gas Marketing & Power, and Low Carbon Business. The deep expertise in geology, geoscience, drilling, subsurface and surface engineering, advanced production technologies, gas trading, low carbon technologies, and digitalisation

is essential in driving OMV’s strategic and transformation efforts to becoming a net-zero company and ensuring a secure, affordable, and diversified energy supply.

This year’s conference will dive into a range of critical topics, including:

- Sustainable Integrated Projects and Operations Management
- Circular Production Cycle and Responsible Transformation
- Low Carbon and New Energy Solutions
- Underground Storage Technologies
- Field Development and Geoscience – Facts and Challenges in an Evolving Energy Scenario
- Digital Transformation and Artificial Intelligence
- Efficient Drilling and Completion Applications
- Talent Development and Diversity

These topics are at the forefront of our industry’s evolution, addressing both current challenges and future opportunities. With SPE under the tagline Solutions, People and Energy, as the driving force behind this gathering, we are uniquely positioned to leverage the global network and technical expertise in subsurface technologies to inspire transformation.

We look forward to your participation and contributions as we work together to create innovative solutions for a sustainable energy future. Let us take this opportunity to network, share knowledge, and drive forward the energy transition.

Welcome to Vienna, and welcome to the 2025 Europe Energy Conference!

Welcome from the SPE President – SPE Europe Energy Conference 2025

Olivier Houzé
SPE President

Dear Energy Community and Industry in General,

After many years of fruitful collaboration with EAGE, Europe Energy Conference also known as EuropEC had its first independent edition in Torino, Italy in June 2024, becoming an event entirely dedicated to Energy Transition. It was a challenge, it could have failed, but it worked. I want to take off my hat to the sponsors, committee, staff and board members who made it happen. No need for names, you know who you are.

In a single event EuropEC has become SPE's de facto flagship event for Energy Transition. It makes sense for such event to be in Europe, which is moving towards New Energy at a rate that many other regions are not able or (sometimes) not willing to match.

The second edition of the new EuropEC will take place in Vienna, Austria on 10-12 June 2025, with the support of OMV as the host organization and with Mr. Reinhard J. Oswald, SVP Value Center Operations, as the conference chair. EuropEC's broad technical spectrum will attract interest beyond the Atlantic and the Bosphorus Strait. We will speak low carbon, CCUS, emissions reduction and decarbonisation, geothermal, storages, hydrogen, etc.

Our new tagline (Solutions. People. Energy.) is what EuropEC is all about.

And do not forget to book your flights to Vienna!

Welcome to Vienna, and welcome to the 2025 Europe Energy Conference!

About SPE

**Solutions.
People.
Energy.SM**

The Society of Petroleum Engineers (SPE) is a not-for-profit professional association with 127,000 members in 145 countries engaged in the exploration and production of oil and gas and related energy resources. SPE is a key technical and professional resource providing opportunities to exchange information at in-person and online events and through training, publications, and member programs. SPE maintains offices in Calgary, Dallas, Dubai, Houston, and Kuala Lumpur. www.spe.org/en/

Innovating Together: Solutions, People, and Energy for a Responsible Transition

It is a pivotal time in the industry as the energy landscape changes at pace and the drive for decarbonisation forges ahead to meet global net-zero goals. SPE is focused on the future of our industry, the energy transition, and the process and technological developments surrounding lower carbon emissions.

Formerly known as SPE Europec, the **SPE Europe Energy Conference and Exhibition** is an established unique event where leaders from the energy, environment, geoscience, underground engineering and policymaking communities will convene to integrate knowledge and expertise and to share technological solutions to the challenges posed by the energy transition.

The 2025 event will focus on the net-zero concept creating a uniquely integrated event and broadening our network to the wider energy, environmental, and economic communities. Through this collaboration, the event will aim to fuel innovation to hasten decarbonisation and showcase the latest science and technology needed by the E&P industry to achieve net-zero emissions.

> With an attendee profile comprised of senior professionals from the energy, engineering and policymaking communities, the event provides an ideal backdrop to associate your company with the themes driving innovation within decarbonisation.

> SPE's peer-reviewed and selected technical content is internationally renowned and will focus on innovation and technology as well as operational challenges and solutions.

Technical Sessions

Technical sessions will provide content from practitioners and professionals from across multiple technical disciplines in the industry who will share ideas, best practices, innovative solutions, progress and technological advances that address the current industry challenges in the energy transition space.

Engage with leaders from the energy, geoscience and engineering communities

Sponsorship and exhibiting at this unique event will deliver a high return on investment by enabling you to meet the decision-makers that matter to your business and to provide visibility for your company and its brand.

Who you will meet

Job Classification

- Engineer
- Executive
- Manager
- Consultant
- Research and Development
- Regulator/Public official
- Academia

Discipline

- Reservoir Engineering
- Geoscience
- Energy Transition
- Subsurface Technology
- Carbon Management
- Data Science
- Technology Development
- Petroleum Engineering
- Regulatory / Environmental policymaking

Organisation type

- Energy companies
- Service companies
- Academia

Geographical Reach

- Europe
- North America
- Asia- Pacific
- Middle East

Position your organisation as a progressive industry player at the forefront of innovation needed by the E&P industry in the drive towards net-zero.

Showcase your expertise and new technologies to a unique audience of energy leaders.

Reach and network with a highly targeted audience of industry stakeholders at the forefront of energy transition technological developments.

Associate your brand with the highest calibre of technical content in the industry.

Gain maximum brand exposure as part of a targeted international marketing campaign.

To find out more about how you can elevate your brand at the SPE Europe Energy Conference, please contact:

Zunaid Jooma, Sales Manager Europe & Caspian M: +971 50 574 3805

Exhibiting

Exhibition stands will be positioned next to the main session rooms. The area will be the location for all refreshment breaks, eposter sessions, the welcome reception as well as the Energy Transition Innovation Stage.

There are two easy ways to exhibit:

1

Space Only

Stands between 18 and 24 square metres

2

Stand Package

9 square metres only

SPACE ONLY (18 to 24 SQM)

Space Only provides an area on the exhibition floor for you to construct your stand. It is **ONLY** available for stands that are between 18 and 24 square metres in size.

Space Only Exhibitors receive:

- Space on the exhibition floor to build your own stand
- 1 x complimentary delegate registrations to attend the conference per 6 sqm booked
- Exhibitor name listed on the Conference website

Price: 420 EUR / per square metre

Price exclusive of any applicable taxes

STAND PACKAGE (9 SQM)

The Stand Package provides a pre-constructed, customised two-sided backdrop mounted on the walls of the booth. The stand is fully equipped and ready to use for exhibitors on arrival at the exhibition. **Size:** 9 square metres only.

Stand Package Exhibitors receive:

- 1- Reception display counter
- 1- Table
- 2- Chairs
- 1- waste basket.
- Area Carpet
- General lights
- 1- Power Socket, with 13Amp power
- Vinyl cut out of the company name and stand number for fascia board
- Digital printed logo for the reception counter
- 1- 50" LED TV screen with floor stand.

Price: 4410 EUR

Price exclusive of any applicable taxes

Sponsorship Opportunities

Platinum Partner (Exclusive)		EUR 42,000 (plus VAT if applicable)
Pre-Event Thought Leadership	<ul style="list-style-type: none"> • Opportunity for senior representative to join the Programme Committee • Content upload on Industry Insights page on the conference website 	
Pre-Event Branding	<ul style="list-style-type: none"> • Acknowledgement and logo in all pre- and post-event promotional email activity • Acknowledgement and logo on social media promotional campaign • Logo will be displayed on the conference website with a link to the sponsor's website • Digital banner advertisement on event website 	
Event Thought Leadership	<ul style="list-style-type: none"> • Opportunity for senior representative to join an Executive Dialogue session • Opportunity to present 3 x 20-minute presentations at the Energy Transition Innovation stage on the exhibition floor 	
Event Branding	<ul style="list-style-type: none"> • Acknowledgement of Platinum Partner support by the SPE President at the Opening Session • Logo prominently placed on sponsorship signage throughout the event venue • Logo prominently placed on conference holding slides between conference sessions and during the Opening Session • Logo with a link to sponsor's home page and a company description on the mobile app used by attendees at the event • Digital banner advertisement on mobile app • 2 x mobile app notifications to deliver a promotional message on behalf of sponsor to all attendees

Event Branding	<ul style="list-style-type: none"> • Logo will be placed on signage at the lunch distribution points • Logo prominently placed on sponsorship signage throughout the event venue • Logo prominently placed on conference holding slides between conference sessions and during the Opening Session • Logo with a link to sponsor's home page and a company description on the mobile app used by attendees at the event
Exhibition	<ul style="list-style-type: none"> • 15% discount on exhibition space (subject to availability) including complimentary registrations for exhibition stand staff
Delegate Participation	<ul style="list-style-type: none"> • 3 complimentary full conference delegate registrations (including lunches, refreshment breaks, event reception and access to proceedings, etc.)
Additional sponsorship discount	<ul style="list-style-type: none"> • 15% discount on additional sponsorship items (subject to availability).

Sponsorship Opportunities

Digital Conference Proceedings Sponsor

EUR 10,750 (plus VAT if applicable)

Exclusive sponsorship of the Proceedings giving digital access to the papers from the technical sessions

Pre-Event Branding	<ul style="list-style-type: none"> • Acknowledgement and logo in all pre- and post-event promotional email activity • Acknowledgement and logo on social media promotional campaign • Logo will be displayed on the conference website with a link to the sponsor's website
Event Thought Leadership	<ul style="list-style-type: none"> • Opportunity to present 1 x 20-minute presentation at the Energy Transition Innovation stage on the exhibition floor
Event Branding	<ul style="list-style-type: none"> • Logo displayed exclusively on the email sent to all registered delegates post-event with login information to access the digital proceedings • Logo placed on sponsorship signage throughout the event venue • Logo prominently placed on conference holding slides between conference sessions and during the Opening Session • Logo with a link to sponsor's home page and a company description on the mobile app used by attendees at the event
Exhibition	<ul style="list-style-type: none"> • 15% discount on exhibition space (subject to availability) including complimentary registrations for exhibition stand staff
Delegate Participation	<ul style="list-style-type: none"> • 2 complimentary full conference delegate registrations (including lunches, refreshment breaks, event reception and access to proceedings, etc.)
Additional sponsorship discount	<ul style="list-style-type: none"> • 15% discount on additional sponsorship items (subject to availability).

Sponsorship Opportunities

Associate Sponsor

EUR 7,500 (plus VAT if applicable)

Pre-Event Branding	<ul style="list-style-type: none"> • Acknowledgement and logo in all pre- and post-event promotional email activity • Acknowledgement and logo on social media promotional campaign • Logo will be displayed on the conference website with a link to the sponsor's website
Event Branding	<ul style="list-style-type: none"> • Logo prominently placed on sponsorship signage throughout the event venue • Logo prominently placed on conference holding slides between conference sessions and during the Opening Session • Logo with a link to sponsor's home page and a company description on the mobile app used by attendees at the event
Delegate Participation	<ul style="list-style-type: none"> • 1 complimentary full conference delegate registration (including lunches, refreshment breaks, event reception and access to proceedings, etc.)

Theme, Categories and Topics

This year's conference theme, **"Innovating Together: Solutions, People, and Energy for a Responsible Transition,"** underscores the critical importance of collaboration in addressing the energy challenges of our time.

We invite energy companies from around the world to join us in this endeavor, bringing their expertise, innovation, and commitment to sustainable practices.

We believe the SPE Europe Energy Conference 2025 is set to be a pivotal event, addressing the most pressing topics in the energy sector, including key areas such as traditional energy sources, low carbon initiatives, and new energy solutions.

This year's focus, **Innovating Together: People, Energy, and Solutions for a Responsible Transition**, highlights our collective dedication to promoting sustainable energy solutions through both collaboration and innovation.

Sustainable Integrated Projects and Operations Management

01. Sustainable Design and Construction Practices in Oil and Gas Facilities
02. Integration of Renewable Energy Sources in Oil and Gas Projects
03. Technologies for Optimizing Construction and Operations
04. Designing Carbon Capture Utilization and Storage (CCUS) Hubs given the category
05. Modular Construction for Sustainable Oil and Gas Projects
06. Retrofitting Existing Facilities for Enhanced Energy Efficiency
07. Energy Efficiency Best Practices in Oil and Gas Operations, including Challenges to transition
08. Sustainable Water Management in Oil and Gas Operations
09. Facility Management and Asset Performance Optimisation: Challenges, Technologies, and Innovative Practices
10. Large Scale Projects or Feasibility Evaluation on CO₂, Hydrogen, or Geothermal

Low Carbon and New Energy Solutions

11. Methane Emissions Monitoring & Reduction: Technologies and Practices
12. Sustainable E&P Data Management
13. Electrification of Oilfields
14. Carbon Footprint Management
15. Hydrogen Production and Utilization in Oil and Gas Industry
16. Geothermal operations
17. Mineral extraction from Geothermal reservoirs
18. Low Carbon Policy Frameworks
19. Innovative Approaches to Reduce Carbon Footprint in Construction
20. Incorporating Solar and Wind Energy into Oil and Gas Projects
21. Decarbonization Strategies in field development and drilling
22. Renewable Energy Technologies
23. Advanced Biofuels
24. Gas as transition fluid and renewable energy

Underground Storage Technologies

25. Hydrogen Storage: feasibility assessment, material compatibility, pilots and development plans
26. Natural gas storage in aquifers or depleted oil/gas reservoirs & best practices
27. Carbon Capture and Storage (CCS): scientific and technical challenges
28. Cavern storage: Planning, construction, integrity and operation
29. CO₂ Sequestration and Carbon Capture: Development Plans and Case Studies

Theme, Categories and Topics

Field Development and Geoscience

- 30. Innovative Oil and Gas Development Plans: Case Studies and Best Practices
- 31. Challenges in Oil and Gas Field Development: Marginal Fields, Complex Reservoirs, and Mature Fields
- 32. Water Production Lifecycle Management: Strategies and Case Studies
- 33. Reservoir Modelling and Simulation: Integrating

Geoscience and Engineering

- 34. Fluid Characterisation and SCAL: Advances and Case Studies
- 35. Enhanced Oil Recovery (EOR): Chemical, CO₂, and Gas Applications
- 36. Breakthrough Technologies in Field Development: Maximising Recovery Factors
- 37. Role of Geoscience in Uncertainty Assessment and Decision Making
- 38. Advances in Seismic Acquisition, Processing, and Reservoir Characterisation
- 39. Emerging Logging Technologies and Interpretation Methods
- 40. Geostatic and Geological Modelling: Innovations and Applications
- 41. R&D in Geoscience: Technology Development, Deployment, and Case Studies
- 42. Novel Well Testing and Design for Geoenery Reservoirs and storages
- 43. Geoenery Reservoir Management Under Uncertainty and Risk
- 44. Geophysics – Exploration and Appraisal of New Geoenery Resources
- 45. Flow assurance: Evaluation Remediation and Control
- 46. Advancement in Flow Measurement and Profiling
- 47. Well Performance Diagnostics and Control
- 48. Reservoir surveillance: Case Studies and Best Practices
- 49. Integrated Asset Modeling & Optimization: Opportunities and Challenges

Digital Transformation and Artificial Intelligence

- 50. AI and Digital Transformation in Oil and Gas
- 51. Digital Twins and Computer Vision in Energy
- 52. Cybersecurity in Digital Energy Operations
- 53. Digital Reservoir Solutions: Data-Driven Applications
- 54. Advances in Data Science in Geoscience and Field Development
- 55. Use of Machine Learning and AI in Subsurface Operations and Reservoir Optimisation
- 56. Drilling, completion and Well Placement Optimisation through AI
- 57. Decision-making under Uncertainty and Risk through AI, ML & Others
- 58. Data Analytics and Machine Learning in Drilling

Efficient Drilling and Completion Applications

- 59. Innovative Technologies in Drilling and Completions
- 60. Qualifications and Techniques for New Drilling and Completion Technologies
- 61. Advancements in Downhole Monitoring: Technologies and Applications
- 62. Well Integrity: Design and Intervention Strategies
- 63. Optimizing Drilling Operations: Best Practices
- 64. Challenges in Drilling Environments
- 65. Real-Time Monitoring in Drilling Operations
- 66. Automation and Remote Operations in Drilling and Completions
- 67. Breakthrough Stimulation Techniques with Fit-for-Purpose Designs
- 68. Sustainable Drilling Practices and Environmental Impact
- 69. Risk Management and Safety in Drilling Operations
- 70. Future Trends in Drilling and Completion Technologies
- 71. Advancements in Well Completions and Artificial Lift Technologies

Circular Production Cycle and Responsible Transformation

- 72. Waste Minimization and Recycling
- 73. Sustainable Supply Chain Management
- 74. Sustainable Business Models
- 75. Regulatory Compliance and Innovation
- 76. Stakeholder Engagement
- 77. Socioeconomic Impacts of the Energy Transition
- 78. Health, Safety, Security & Environment
- 79. NetZero Business Structures for Current E&P Businesses
- 80. Sociological Impacts and social acceptance of the Energy Industry
- 81. Best Practices in Gas Flaring and Emission Reduction
- 82. Social Responsibility in Energy

Talent Development and Diversity

- 83. Attracting and Retaining Talent in Oil and Gas
- 84. Shaping the future through Education and Curriculum Development: Industry, academia and authorities collaboration
- 85. Building an Inclusive Workplace Culture and supportive environment in Oil and Gas
- 86. Promoting Cultural Sensitivity in the Oil and Gas Workforce
- 87. Stress Management for Energy Sector Employees
- 88. Empowering Women in Leadership within the Energy Sector
- 89. Developing Future Leaders for the Energy Transition
- 90. Vital skills for Petroleum Engineer for the Energy Transition
- 91. Transferable Skills: Core Skills to shape the Low-Emission Energy Transition
