The topic of industry disruption- “A process whereby a smaller company with fewer resources is able to successfully challenge established incumbent business” is the way that [this Harvard Business Review article](#) describes how industry disruption is affecting most industries.

I think that the live events industry, including trade shows, conferences, corporate events,

# Some final thoughts...

**Why is Event Tech finally happening?**  
*Remember “software is eating the world”*

**Cultural / not technological**  
change=digital mindset  
and engagement

**Brands/Exhibitors and Buyers/Visitors** will be leading event tech changes faster than organizers.

## Some final thoughts...

- **4. The snowball effect** event owners will move fast when they see concrete results
- **5. Critical mass** of talented entrepreneurs building event tech companies
- **6. Partnerships and collaboration** are more critical than ever

**How are companies  
and executives  
reacting to disruption  
and innovation?**
