# Let's Talk Coffee

## Specifically, Ecobean Coffee

There is a fine balance to strike between the need for increased coffee supply and the impact this has on the environment, we believe that one should not come at the cost of the other!

Ecobean delivers coffee that helps to maintain this delicate balance.

With our Zero Waste, Circular Economy Technology we can deliver you a fresh, delicious and ethical coffee that will also reduce your waste, cut your Carbon Footprint, improve your Corporate Social Responsibility and save you money!

# Quality Coffee

Our coffees are skillfully crafted by our master roasters operating our Eco Roasters. We pride ourselves in the quality of our finished products. We know you will also love what we produce as much as how we produce it.

**ECO ROAST**  
DELICIOUSLY RESPONSIBLE COFFEE

# Ethical Coffee Blends

We have a comprehensive range of deliciously responsible coffee blends to choose from.

Each of our core blends has its own unique attribute to it as well as being Eco Roasted & Carbon Neutral.

High Caffeine – Direct Trade – Fairtrade – Rainforest Alliance – Triple Certified – Ethical Decaf – Social Impact

ECO ROAST

DELICIOUSLY RESPONSIBLE COFFEE

STEP 1

Deliciously Responsible Coffee beans are firstly delivered to you to serve to your customers. The used coffee grounds are then collected and stored in the bags they arrived in, sealed and ready for collection.

STEP 2

The Used Coffee Grounds are collected and returned to the Eco Roaster, who sieves, dehydrates and mechanically compresses the coffee into Eco Fuel.

STEP 3

Custom made Eco Roasting machines turn this Eco Fuel into large amounts of heat energy, which is needed to roast large batches of this delicious, fresh coffee for you.

STEP 4

The last step of the process is the beans that have just been roasted, they are quickly cooled and packed to lock in the freshness, ready for dispatch to the customers.

# Ethical Packaging

We have super environmentally conscience packaging options.

One of our foodservice packaging options can be recycled in widely available paper recycling systems.

Our latest retail offering is also a compostable ziplock pouch, which will biodegrade once composted.

# ZERO WASTE FOODSERVICE

To enable our customers to become truly ZERO Waste, we can offer a delivery and collection service that will allow our foodservice customers to receive their coffee in reusable “eco tubs” as well as grounds collection tubs too. Each time you have a fresh delivery, the used coffee is collected at the same time. Reducing our impact on the planet as well as your waste costs.

# Carbon Neutral

In addition to our Zero Waste roasting technology, we also set up the Carbon Neutral Coffee initiative and work with the organization Sustainably Run to plant fruit trees in 3<sup>rd</sup> world regions.

This offers numerous benefits in addition to offsetting the Carbon emissions produced in getting this great coffee to the consumer.

# Training & Support

Ensuring our clients are set up using Ecobean properly is key. We invest in our customers by offering continued training and support for their coffee offering.
