Glencairn is a family run business, we believe that a focus on family values delivers a better product and more efficient service. We treat everyone with the respect and warmth that a family would demand.

The company's success has been built on quality. Our family have been supplying the whisky industry with creative, premium, quality glassware for thirty years. We are proud to work with great whisky companies and their brands. Knowledge of the industry is the cornerstone in satisfying customer requirements.

All engraving designs are produced in-house after careful discussion with the client to create the best presentation to compliment the occasion.
