## Location of sea glass

Each item comes with a map that marks which beach the sea glass was found on.

I have glass from over 50 Scottish shores. The order form allows you to state which locations in Scotland you would like the sea glass to come from. If not specified, each order will come with a variety of locations from all over Scotland. Popular locations will always be included (i.e. Arran, Orkney etc). Each order will also be tailored to your location.

---

## Package option:

To save time you can simply fill in the Package Option at the very bottom of the order form. State the amount you would like to spend, adding as much or as little detail about what items and locations you would like, and I can create a package with a variety of styles and locations tailored to your location.
