

Angela Learoyd Studio Jeweller

Jewellery which makes an understated statement!

Interesting and unusually shaped gemstones are combined with textured silver to create 'Statement Pieces'. I make themed, evolving collections which include necklaces, pendants, earrings, bracelets, rings, brooches and cufflinks.

The gemstones used in my collections continually change to provide interest and variety.

I often start with the stone itself and this informs my design process. Texturing silver enables me to echo the markings of the stone. I use silver sheet, tube and wire to form my shapes.

The metalsmithing techniques I use are doming, swaging, press forming and corrugation, which allow me to produce three dimensional, sculptural shapes.

My aesthetic is modern and bold with simple clean lines. My pieces are comfortable and wearable. They are often matt with subtle colourings.

My work has been sold in shops and galleries throughout the UK since 2006.

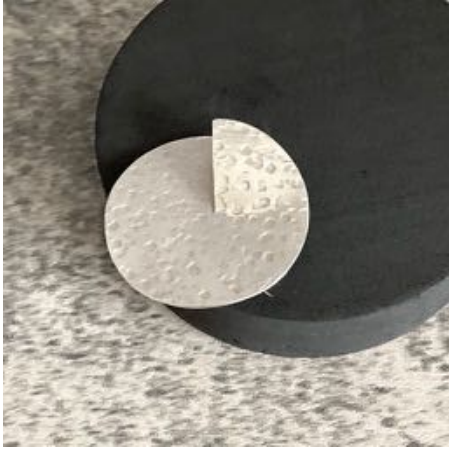

Sticks and Stones Collection

My very first collection, Sticks and Stones is back - bigger and bolder. One of a kind and Limited Edition necklaces sit alongside repeatable items in this collection.

Flip Collection

An unusual 'flip' design with a hammered and frosted texture. The original Limited Edition necklace was so popular that it has developed into a collection.

Wave Collection

Interesting and unusually shaped gemstones are combined with wave textured silver.

Concertina Collection

A collection developed around the technique of corrugation.

Wrapped

Cylinder

Curve

Encased

Simply silver

Flip Collection
Sculptural textured pieces.
