HOW WE MAKE OUR JEWELLERY

Quirky, unique, colourful and handmade jewellery always grabs everyone's attention. Here at Colourific Designs we draw our designs by hand then digitise them to make them stand out. We love to use lots of colour and pattern to come up with unusual designs.

Paper Earrings & Matching Pendants

We make our paper earrings and matching pendants from 5 layers of recycled card which we glue all together with a printed front and back to finish the design. The sides are then coloured with a water based paint to match the design. The middle layer of card houses the eye pin which holds the sterling silver ear wire or bail. We complete the pieces with a water based gloss varnish to make our earrings and pendants water resistant and glossy. The pieces are super light but extremely strong and very easy to wear. Our earrings are for pierced ears only.

Wooden Necklaces

Our wooden beads are made from natural wood which are first of all sanded to make them smooth ready for decorating. We use water based acrylic in various colours. Each bead is painted and decorated then coated with various coats of water based varnish and left to dry. Once the beads have been left to dry for a few days we string them on to a faux suede cord and are finished with hypoallergenic silver plated findings.

HOW TO ORDER OUR JEWELLERY

We have included an Order Form here, if you would like to order any of our jewellery. Just select the item you would like and add the code which is located underneath the item and the quantity you require.

All jewellery pieces will take approximately 2 weeks to make but we may have some items already in stock. As soon as we have the complete order ready we will send you an invoice. We require payment before the order is sent out. All orders will be sent by Royal Mail, first class tracked delivery. There will be free postage on all orders over £100 and there will be no minimum quantity on orders.
