**SCENTED CANDLES**

[www.ocoeehouse.co.uk](http://www.ocoeehouse.co.uk)

Hand poured in Loch Lomond.

Ocoee House is a design studio and atelier based in Glasgow and Loch Lomond.

Founded in the later half of 2020, we felt passionately about simple and functional design that stands the test of time. This is why we created Ocoee House. Each product has been formulated with the utmost care and attention with our values and individual aesthetic ingrained through out the entire process from manufacture to finish.

Our candles are lovingly hand poured every week and are organic & vegan. They are made with 100% natural soy wax, each scented with sustainably sourced fragrance oils. All candles are poured in small batches and left to set in our workshop, where on completion and quality control, they are packaged into bespoke recycled cardboard tubes.

Our main ambition is to create high quality, simple and value for money products, which are carefully produced in the most sustainable and attainable way possible. We have meticulously drawn on these core principles whilst designing and creating our candle collection. Before progressing to production we devised a list of key criteria which we wanted to achieve, from the responsibly sourced organic European soy wax we source, to the recycled brown paper used in our packaging, and the avoidance of any plastics in our products. It was fundamental to keep our environmental impact as minimal as possible. We feel really proud having successfully achieved this.

# Scent Profiles

Our collection offers a range of eight unique scents that have been carefully crafted from a blend of complementary and high quality fragrances.

## Wild Forest

This fragrance has a distinctive woody & warm aroma with a hint of musk. Think of autumn leaves. Top notes of fig leaves, bergamot & cedarwood.

## Island Living

Full, fresh notes of tropical coconut, bergamot, with hints of amber, vanilla and shea butter. This candle blooms with a gorgeous blend of island fragrances and rightly deserves a top spot amongst candle aficionados.

## Black Currants

This scent has a rich and luscious blend of ripe black raspberries, strawberries, and sweet fig. It also has undertones of musk and vanilla to create a very full and complex fruit.

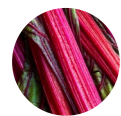

## Clean Citrus

A must have for citrus lovers, this scent has a lively and strong blend of orange, pink grapefruit, pineapple & lemon, with a subtle undertone of thyme which offsets the sharpness.

# Scent Profiles

Our collection offers a range of eight unique scents that have been carefully crafted from a blend of complementary and high quality fragrances.

## Sweet Rhubarb

This fragrance is an all time candle favourite. With rich, sweet confectionery notes, this ripe rhubarb has a base note of vanilla custard.

## Winter Alpine

Filled with fragrances of snow covered pines, woody tones of cedarwood & sandalwood and an undertone of coastal sea-fennel, this winter candle has a crisp and fresh profile.

## Fresh Linen

Similar profile of a well known fabric softener. This fragrance has a fresh floral citrus top note, with underlying tones of mandarin, apple, freesia and a base of vanilla

## Summer Holiday

This has a clean, fresh, and uplifting scent profile. Full of flavour and sweet notes of coconut, pineapple & grapefruit, with undertones of peach to finish on the nose.

# Specifications

Ingredients	90% Soy wax, 10% Fragrance oil
Wick	German made ECO wick
Dimensions	90mm x 80mm
Weight	450g
Volume	295ml
Burn Time	Approx. 45 Hours

## The Wick

The wick used is a premium spec wick and highly rated for soy candles. This is a flat, core-less cotton wick braided with thin paper filaments and creates a strong flame, with a clean and even burn. All wicks should be trimmed to 4-6mm before every burn.

## Fragrance Oils

All fragrance oils added are unique blends, differentiating our candles to our competitors. We use a 10% wax to oil ratio which is at the top end and near saturation point, to provide the strongest scent we can produce. The fragrance oils we source are synthetic and lab made, not tested on animals, and are not essential oils (which are derived from plants).

## Bamboo Topper

The accompanying bamboo topper (with rubber seal) should lock in the scent in between burns and will keep the candle from drying out. Even with infrequent burns, this topper should keep the candle in good condition and increase the longevity and lifespan of the candle.

## Packaging

Finally, all of our candles are packaged into **bespoke cardboard tubes** - 150gsm brown kraft paper, with single colour matte CMYK printing. The structure and rigidity keeps our candles secure in transit. Our subtle recyclable packaging choice is thoughtfully produced with a nod to the circular economy.

# Orders & Pricing

<b>Wholesale Unit Cost</b>	<b>£14.00</b>
<b>Recommended Retail</b>	<b>£24.00 - £28.00</b>
<b>Wholesale Shipping - UK</b>	<b>Free</b> (excluding duties + tax)
<b>Wholesale Shipping - International/EU</b>	<b>Rate calculated upon request</b> (excluding duties + tax)

# Terms & Conditions

## Sample & Display Candles

We recommend having display candles for customers to interact with, leaving remaining stock untouched and in a sellable condition. Display/sample units can be purchased at a one time reduced rate of £50 and will be included on the first invoice.

## Minimum Order Quantities

We ask for a minimum order quantity of **12 units**, split across any combination of candle scents.

## Invoicing

First initial invoices must be paid pro-forma, with following order invoices to be paid on a standard 30 day credit.

# Contact

Get in touch.

We invite you to become a wholesale, B2B partner to sell our scented candle collection in your store. If you are interested in becoming a stockist, please email through for full details.
