We manufacture our products in small-batches using traditional methods and are based in gorgeous Kintyre on the West Coast of Scotland. Our products are lovingly made with special oils, butters, waxes and healing botanicals, all handpicked for their wonderful soothing qualities. We like to use premium essential oils to harness the fragrant scent of nature, but also offer a Nude (unscented) range.

We care deeply about making sure that our products are gentle and soothing while also caring for our planet – we try our best to make sustainable choices with our suppliers and keep away from everlasting plastics by choosing a zero-waste route through packaging that is both recyclable and compostable.

botanical soaps • candles • haircare • lotion bars

Sustainable Candles

Our candle collection includes **Eterna**, our large refillable forever candle with a soothing wood wick, and **Glow**, our amber jar candle with a classic cotton wick.

Both are hand-poured using sustainable rapeseed and coconut wax, and scented only with **pure essential oils** for gentle, non-irritating aromatherapy. Each candle is designed for an exceptionally long, even burn and a **naturally calming scent experience**.

Solid Hand Lotion Bars

Our solid lotion bars are rich, waterless moisturisers made for **nourishing skin on the go**. They come in three varieties, including an unscented option. Made with jojoba wax, cocoa butter, and coconut oil, they're available in a pocket travel size and a larger body bar. Warm the bar between your hands and let it melt into the skin for **deep, lasting hydration**.

Solid Haircare

Available in full bars with a mini travel duo for convenience, our solid formulas are **super gentle, mild, and naturally scented**.

Oat & Thistle Trade

Own a shop and would like to stock O&T?

Our Ethics & Values

Plastic Free Promise

We've chosen materials that break down naturally or can be reused or recycled — keeping our packaging out of landfill, and out of your conscience.

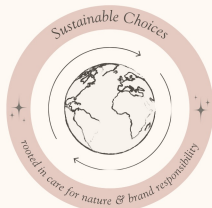

All-Natural Always

Every product is carefully made using botanicals, clays, oils, and essential oils — nothing artificial, ever, because we believe nature knows best.

Plant-Based / Vegan

Every Oat & Thistle product is created without animal-based ingredients or any animal testing — a choice rooted in care for all living beings.

Sustainable at Every Step

We always consider our impact and make sure to work with suppliers who share our values and focus on minimising waste at every stage of production.

Zero-Waste Commitment

Designed to be fully used and easily disposed of, our solid formats and minimal packaging help reduce long-term environmental impact.

Palm-Oil Free

We consciously avoid palm oil in every recipe, choosing alternative ingredients that are gentler on wildlife habitats and communities.

Certified Quality

All of our recipes are professionally assessed for safety and effectiveness — full transparency and compliance for your peace of mind.

Supporting Local

We work with nearby suppliers and support other small businesses — strengthening our community while reducing shipping footprints.

Wellness & Mindfulness

We hope our products bring a sense of calm to your everyday rituals, gently encouraging pauses for care, presence, and connection.
