SCOTTISH AND UK MADE

Cath Waters

SCOTTISH LANDSCAPES

Hello, I'm Cath Waters, a Scottish Landscape artist working from my studio on the beautiful Isle of Skye.

My artworks are atmospheric digital collages inspired by my love of the Scottish landscape and reflect the solitude and calm of the special places I find on my travels around Scotland.

I design high quality and unusual gifts, jewellery, homeware and stationery products to complement my popular ranges of wall art and prints.

Our company ethos is to focus on quality British made products (Scottish where possible). In fact, all of our wall art, glassware, ceramics and jewellery are produced by a small team of fabulous ladies at my

workshop in central Scotland. The rest of my products are made for me by Scottish or UK suppliers with a similar small business ethos.

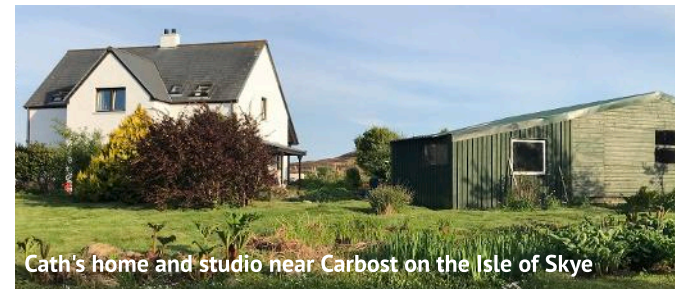

We know we could have versions of our products made cheaply overseas but printing on demand ourselves means we can supply our stockists with a choice of a huge number of designs on all of our products and keep a watchful eye on quality and colour.

Best of all we can employ local people and support Scottish and UK businesses. Besides, we really like making things!

I hope you enjoy looking through my brochure. Turn to the back pages to see all 21 designs in the trade range.

Ordering tips. We find that all ranges sell well across the whole country, you won't need to order "local" images. Our best selling ranges for the last year were SK01 Skye from the Bealach Na Ba, Applecross, BA01 Red Croft Barra and SK11 Western Isles from Skye but the entire trade range sells very well and there really isn't much between the different images so you should pick what grabs your attention! There are currently 21 images in the trade range and you can log in to your account to see the complete collection and to check stock availability. Prints are available in all Cath's work.

In most cases products sell best when displaying several different products featuring the same image. We think it's better to make an impact with fewer images but a wider range of products *eg a few designs - mug, coaster, print, and tile in each*, rather than lots of different images on one product *eg a coaster in every design*.
