Super cute! Takes ages to put up (I think that's more with the fact that I have a fire door and it's got metal inside this door!) also the bolts that come with it are very long. But you can just buy some more or cut the ones you have. But looks lovely and have had a lot of compliments!

This is so cool! We haven't decided to put it on the front door or music room door yet but I have a feeling I'll be buying another one 😊

It is a beautiful door knocker that is very loud and effective when knocked, and looks great installed on our front door.

Although it took three trips to the hardware store for me to install this item to get the right drillbit and the right length bolt — the ones supplied were too long for my door— I am now very pleased with how it looks on my door. The only thing is I wish there was another way to install it because I had to make a hole right through the door, so you do you see the bolt tips from the inside of the house.
