Jewellery inspired by  
colour and the patterns in nature

Behind Nimanoma is the artist, designer and maker, Naomi Southon. She creates jewellery ranges influenced by her background in biology. The forms and intricate details found in nature have always inspired her and are illustrated in much of her artwork and photography. By manipulating images of her larger artwork and embedding it in a dome of resin, and embellishing with colourful tiny glass beads Naomi creates unique, wearable art. Her work carries through its colour and detail, often from a microscopic perspective.

Her newest range uses cyanotype printing to capture botanical forms and shapes in a signature cobalt blue print.

Many of her pieces are silver plated and come in a variety of pendants and earrings in different shapes and sizes.
