Why CIBSE Training?

We Empower

CPD. Build up your CPD hours; we offer a multitude of different courses and modules, ranging from two to 18 CPD hours.

Listening and learning. We keep evaluating and improving our training programme based on the feedback we receive from our training attendees.

We Lead

Topic variety. We offer a wide variety of building services topic areas to choose from. Browse through this brochure to explore them all.

New and updated training. Our trainers make sure our training courses are updated regularly and in line with the current regulations, legislation and standards.

We Champion

Expert trainers. Our trainers are highly knowledgeable in their topic area and provide you with updated information and recent examples from the industry.

Training blogs. Find out what happens 'behind the scenes' of the hard working CIBSE Training team and get to know your trainers with our training blogs. **View now.**

We Inspire

All levels catered for. Looking for an introductory or advanced course? Need a refresher or topic overview? We have everything you need.

Member benefits. In 2021 CIBSE members will benefit from an increased discount of up to 20% off training, as well as the existing unlimited access to the Knowledge Portal.

What's New in 2021?

New and updated training

Fundamentals of Drainage

In this course you will cover the key legislation and standards relating to drainage and how the impacts from water efficiency and flood management can affect drainage design and land.

[> View details](#)

Energy Efficiency Building Regulations: Part L2 2020

The Energy Efficiency Building Regulations: Part L2 2020 has been released and is now available in our 2021 training programme. The course will focus on energy efficiency within a building.

[> View details](#)

Heat Networks Code of Practice (CP1 2020)

The Heat Networks Code of Practice (CP1) training was postponed in 2020 until the release of the updated version CP1 (2020). The course will provide you with knowledge on implementing the CIBSE Heat Networks Code of Practice by taking a comprehensive look at the themes and technical challenges found in the code. Upon completion of the course, there is an opportunity to take an exam which allows entry to the CIBSE Certification Heat Networks Consultant register.

[> View details](#)

Building Services Overview

This training has been converted into an online learning core engineering course; giving you with the same quality content as the face-to-face course but in a video format. The course will provide you with knowledge on the different types of heating and cooling systems available for both commercial and domestic complexes. It will also include guidance on effective maintenance, management and pertinent legislation affecting building services.

[> View details](#)

Services Explained

Mechanical Services Explained

Mechanical Services Explained covers common HVAC systems, including: heating, cooling, ventilation and water systems, and important legislation. It also includes how and why many different mechanical building services systems are designed, operated and maintained.

DATE	STANDARD PRICE	CIBSE MEMBER PRICE
18-20 January	£975 + VAT	£780 + VAT
22-24 February		
22-24 March		
12-14 May		
22-24 June		

"You do get to meet lots of great people on the courses and they all have their own stories to tell, so a lot of shared knowledge comes to the table."

Gordon Hudson, Mechanical Services Explained trainer

Building Services Explained

Building Services Explained focuses on commercial buildings, providing you with knowledge on how to use heating and cooling systems efficiently and how they fit within a building. It will also provide you with knowledge on electrical and renewable systems and their considerable impact on the buildings' energy use.

DATE	STANDARD PRICE	CIBSE MEMBER PRICE
26-28 January	£975 + VAT	£780 + VAT
03-05 March		
18-20 May		
16-18 June		

"I enjoy being a CIBSE trainer because it involves meeting like-minded people where we can discuss issues that they may have in their buildings and hopefully come up with suggestions for improvements."

Kevin Noyce, Building Services Explained trainer

Electrical Services Explained

Electrical Services Explained will provide you with a solid grounding in electrical services and equipment. It will also cover many of the issues associated with design, installation and maintenance of electrical systems, enabling you to develop your own engineering judgements and confidence when dealing with electrical issues.

DATE	STANDARD PRICE	CIBSE MEMBER PRICE
09-11 February	£975 + VAT	£780 + VAT
21-23 April		
01-03 June		

"I embrace questions and encourage students to ask, ask and ask again until they fully understand the concepts."

Gary Marshall, Electrical Services Explained trainer

Online Learning

CIBSE Training online learning is a flexible alternative to live training that is divided into two main topic areas:

1. Core Engineering Modules and Courses
2. Digital Engineering Series

> cibse.org/onlinelearning

Does not require you to travel

You can log into your CIBSE online learning account from anywhere you want or whichever place you find comfortable and easy to access.

Offers you time flexibility

You can dip in and out of an online learning module or course whenever you want so you can fit your personal development within your daily schedule.

Interactive content

CIBSE online learning has quizzes and supportive visuals or videos to keep you engaged along your learning journey.

Different learning formats

Whether you learn better by hearing the information or by reading it, now our online learning is presented in different formats to suit your preference.

Counts towards your CPD hours

Each of our online learning modules offers you a different number of CPD hours. Upon completion, you will receive a CPD certificate.

Accessible content

The content of each module was designed to enhance the learning journey; the topics are broken into sub-topics, improving the flow and making it more organised and memorable.

Corporate Offerings

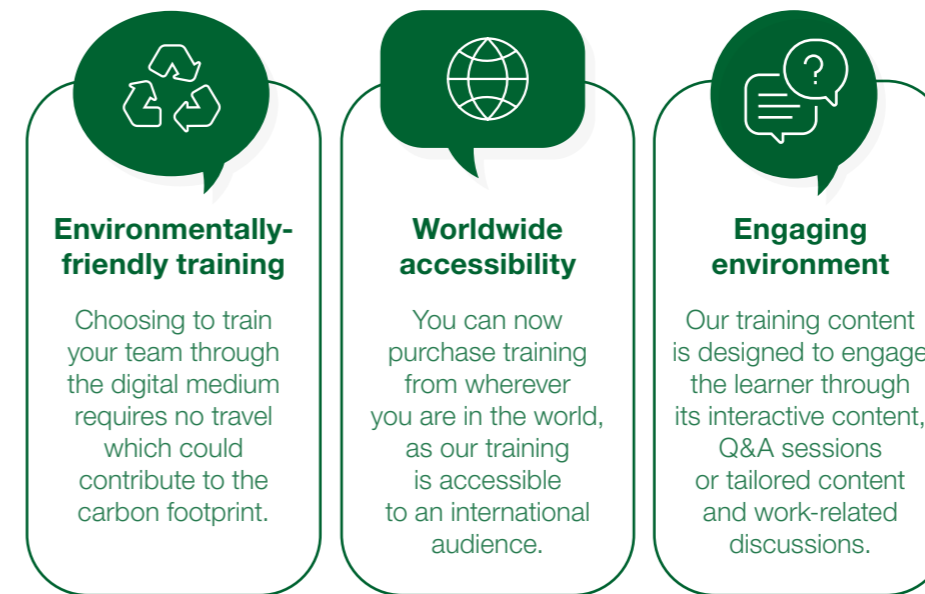

Investing in training means maintaining your employees' work performance and efficiency during the current situation. By keeping their knowledge updated and their skills sharp your position in the marketplace strengthens.

> cibse.org/corporate-offerings

What's the most suitable CIBSE Training option for your employees and your business? Live training and online learning offer different benefits for corporate clients, but the same quality content.

Purchase training for five or more of your employees and benefit from:

Live Training

- ✓ Live interactive environment for your employees to learn together
- ✓ Ask for clarifications and explanations during the presentation
- ✓ Tailored training to fit your company's needs
- ✓ Updated industry examples from our knowledgeable CIBSE trainers
- ✓ Topic and issue discussions that would help your employees with their work performance

*Only applies to core engineering courses

Online Learning

- ✓ Flexible learning where your employees can study individually and at their own pace and fit their learning within their busy schedule
- ✓ Ask for clarifications and explanations after finishing the online learning course*
- ✓ Monitor progress - allocate training and keep track of your employees' learning performance
- ✓ Interactive content - quizzes, supportive images, videos*
- ✓ Topics broken down into sub-topics - improving the flow and making the content learning more memorable

> cibse.org/training

Stay ahead of your competition -
"The more you learn, the more you earn."

Warren Buffett

Regulations, Legislation and Standards Related Training

All CIBSE Training courses cover regulations, legislation and standards, but we have highlighted courses that focus heavily on them for you.

"Building services change all the time and there are always new methods or technologies that we can employ to improve things. Keeping up to date is essential."

Heather Beaumont, Electrical Services Explained trainer

Live Training

Featured Course

Overview of Current Fire Legislation and Guidance

This training provides you with an overview of the current fire safety legislation and guidance. It is especially aimed at those in charge of workplaces and fire safety within buildings, those involved in designing and refurbishing buildings, employers who are not familiar with the current fire legislation and those working within fire safety management requiring a refresher course.

Energy Assessor Training

Our comprehensive portfolio of courses will support you to develop your energy performance specialisms and help you work towards becoming a certified energy assessor, namely a:

- > CIBSE Low Carbon Consultant (LCC)
- > CIBSE Low Carbon Energy Assessor (LCEA) (produce Energy Performance Certificates (EPCs) and Display Energy Performance Certificates (DECs))
- > CIBSE Air Conditioning Inspector
- > CIBSE Heat Networks Consultant

> cibse.org/Energy-Assessor-Training

Live Training

Featured Course

Low Carbon Consultant Building Operations Training

This course is designed for those wishing to become a Low Carbon Consultant (LCC) and who want to gain certification as Low Carbon Energy Assessors (LCEAs). It will provide you with understanding of the legislative framework, building regulations Part L, energy performance certification, low and zero carbon technologies and factors affecting building efficiency.

CIBSE Certification Online Register

Easy to access and searchable, CIBSE Certification's online register provides you with a search tool to find the most qualified and experienced consultants and assessors near you.

CIBSE Certification certifies personnel that can provide an impartial source of knowledge and guidance in the design and operation of energy-efficient buildings. These certified personnel are widely recognised for their extensive experience in the sustainable building industry.

Find an energy expert near you:

> cibsecertification.co.uk/online-register

Electrical Services

High quality electrical building services are essential for the modern world to operate, so our electrical services courses will provide you with the necessary knowledge on electrical systems to be able to meet this professional requirement.

> cibse.org/Electrical-Services

Live Training

Featured Course

High Voltage (11kV) Distribution and Protection

This training will cover the design and application of 11kV electrical systems, including transformers, distribution systems, protection and discrimination, legislation and health and safety issues.

Digital Engineering

> cibse.org/Digital-Engineering

Online Learning

Digital Engineering Series (Basics of BIM)

This online training is aimed at those involved in all stages of a project: engagement, design, construction, handover, and use of a constructed asset.

Digital Engineering (DE) is a nine-part series that covers the basics of Building Information Modelling (BIM) and consists of a total of 18 hours of CPD training content. Each module includes a complimentary PDF copy of the matching CIBSE Digital Engineering Series publication which would individually cost £25.

The Digital Engineering (DE) modules are:

- > DE1: Pre-Qualification Questionnaire
- > DE2: Employer's Information Requirements
- > DE3: BIM Execution Plans
- > DE4: Common Data Environments
- > DE5: Asset Information Requirements
- > DE6: Security Requirements
- > DE7: Organisation Information Requirements
- > DE8: Project Information Requirements
- > DE9: Soft Landings

Packages

Purchase each DE module individually or as a package and save £60.

NAME	STANDARD PRICE	CIBSE MEMBER PRICE
DE modules individually	£40 + VAT	£34 + VAT
DE (1-9) series package	£300 + VAT	£255 + VAT

Fundamentals of Digital Engineering | 5 CPD

This online training will give you the necessary knowledge on how to implement BIM throughout each stage of a building project. The training will focus on real-world application of digital technologies and workflows.

STANDARD PRICE	CIBSE MEMBER PRICE
£200 + VAT	£170 + VAT

Please note:

These Digital Engineering Series modules reflect the contents of the BS and PAS 1192 series. These have now been largely superseded by the ISO 19650 series. However, the processes and procedures remain the same, even if some of their names have changed. For better understanding of these changes, please refer to PD 19650-0, which covers the transition from the "1192 series" to the ISO 19650 series.

Fire Safety

Not adhering to the fire safety best practice and regulations can have serious consequences. That is why, our fire safety training courses are designed to keep you updated with the latest aspects, standards, guidance and regulations on fire safety.

> cibse.org/Fire-Safety

Live Training

Featured Course

Fire Risk Assessment to PAS 79

This course covers PAS 79, virtually the industry standard for carrying out fire risk assessments, and the issue of competence of risk assessors.

	19 May		

Online Learning Modules

Featured Modules

Hot and Chilled Water Pipework Systems | 7 CPD

In this module you will learn how to size pipes, pumps and valves, how to layout the system and how to control its operation.

STANDARD PRICE	CIBSE MEMBER PRICE
£300 + VAT	£255 + VAT

Above Ground Drainage | 7 CPD

This module covers the pipework installation within a building that carries away waste-water from sanitary fittings including WCs, wash basins, showers, sinks and floor gullies.

STANDARD PRICE	CIBSE MEMBER PRICE
£300 + VAT	£255 + VAT

"It gave me a better understanding of the behaviour of water flows round complicated heating and cooling circuits."

"I now understand what the principles are and how I should use the concepts in designing above ground drainage."

"...interesting and well developed module."

Weather Data Sets

Weather data is an essential component of virtually every new building design and major refurbishment.

CIBSE supplies the industry's standard weather data files used in building performance analysis and simulation. The new data files have been created to better represent our current climate and weather pattern.

[cibse.org/Weatherdata](https://www.cibse.org/Weatherdata)

Energy Efficiency

Our energy efficiency training will keep you updated with industry developments and provide you with the necessary tools to successfully apply an energy efficiency strategy.

> cibse.org/Energy-Efficiency

Live Training

Featured Course

Energy Efficiency Building Regulations: Part L2 2020

The Energy Efficiency Building Regulations: Part L2 2020 has been released and it is now available in our 2021 training programme. The course will focus on energy efficiency within a building.
